Learning Electronics Communications Through Experimentation Using Electronics Workbench Multisim:

Learning Electronics Communications Through Experimentation Using Electronics Workbench Multisim Richard H. Berube, 2002 This unique and innovative manual reinforces the theories learned in electronic communications classes By performing a series of interactive experiments simulated on the computer and by answering questions about the results of each experiment students will develop a clearer understanding of the theories that they have learned in the classroom The 23 computer simulated experiments do not require extensive laboratory facilities and circuits can be modified easily with on screen editing The analysis results provide faster and better feedback than a series of lab experiments using hardwired circuits For those who desire a hardwired laboratory environment circuit diagrams and parts lists are provided for each experiment An extensive theory section and a series of troubleshooting problems are also included in each experiment The CD ROM packaged with the text contains the circuits needed to perform the experiments the troubleshooting circuits and a student version of Electronics Workbench Multisim TM
