Identification of Learning Disabilities Renee Bradley,Louis Danielson,Daniel P. Hallahan,2002-12-18 Identification of Learning Disabilities Research to Practice is the remarkable product of a learning disabilities summit conference convened by the Office of Special Education Programs OSEP in August 2001 and the activities following that summit Both the conference and this book were seen as important preludes to congressional reauthorization of the historic Individuals With Disabilities Education Act IDEA scheduled for 2002 and subsequent decision making surrounding implementation The OSEP conference brought together people with different perspectives on LD parents researchers practitioners and policymakers and resulted in this book which examines the research on nine key issues concerning the identification of children with learning disabilities Coverage includes alternative responses to treatment classification approaches processing deficit models and approaches to decision making Chapter Structure Each of the first nine chapters is organized around a lengthy issue oriented paper which presents the most current research on that topic These primary papers are then followed by four respondent papers that reflect a variety of viewpoints

on the topic Summarizing Chapter A small group of researchers listed in the final chapter dedicated an enormous amount of time to summarizing the research and developing key consensus statements regarding the identification of children with learning disabilities Their work is sure to have a tremendous impact on future discussions in this area Expertise The following well known scholars have helped summarize the vast amount of research presented in this book as well as the consensus statements derived therefrom Lynne Cook Don Deshler Doug Fuchs Jack M Fletcher Frank Gresham Dan Hallahan Joseph Jenkins Kenneth Kavale Barbara Keogh Margo Mastopieri Cecil Mercer Dan Reschley Rune Simeonsson Joe Torgesen Sharon Vaughn and Barbara Wise

Subtypes of Learning Disabilities Lynne V. Feagans, Elizabeth J. Short, 2012-11-12 Although experts agree that various types of learning disabilities do exist few attempts have been made to classify learning disabled children into subtypes The editors of this collection feel that the lack of subcategorization has frustrated previous research efforts to obtain a generalizable body of knowledge in the field To meet this critical need for definitive information this book presents basic reviews and theoretical approaches used to subtype learning disabled children ranging from a behavior genetics approach to a dimensional approach It also demonstrates actual research methods utilizing theoretical approaches

Distinguishing Disability Colin Ong-Dean, 2009-08-01 Students in special education programs can have widely divergent experiences For some special education amounts to a dumping ground where schools unload their problem

students while for others it provides access to services and accommodations that drastically improve chances of succeeding in school and beyond Distinguishing Disability argues that this inequity in treatment is directly linked to the disparity in resources possessed by the students parents Since the mid 1970s federal law has empowered parents of public school children to intervene in virtually every aspect of the decision making involved in special education However Colin Ong Dean reveals that this power is generally available only to those parents with the money educational background and confidence needed to make effective claims about their children s disabilities and related needs Ong Dean documents this class divide by examining a wealth of evidence including historic rates of learning disability diagnosis court decisions and advice literature for parents of disabled children In an era of expanding special education enrollment Distinguishing Disability is a timely analysis of the way this expansion has created new kinds of inequality

Treatment Strategies in Child and Adolescent Psychiatry H.B. Ferguson,J.G.

Simeon,2013-06-29 It is clear that child and adolescent psychiatric disorders impose a heavy burden of suffering Recent large scale community epidemiological studies suggest that as many as 20% of children and adolescents in the general population may have clinically important mental disorders These disorders are accompanied by associated impairments in various domains of the child s life resulting in lowered life quality for the child and his or her family In addition for some conditions the onset of the disorder in childhood heralds a lifetime of serious psychosocial disturbance for a significant subgroup of affected children For instance about 40% of children seen in clinic settings with conduct disorder in late childhood and early adolescence will have serious psychiatric disorders in adult life Finally the heavy burden of suffering of these conditions is indicated by the large amounts of both human and financial resources devoted to their assessment and treatment There is a pressing need in the field for effective treatments that is those that have been shown to do more good

than harm that will result in a significant reduction in the burden of suffering resulting from these disorders Further these effective interventions must be readily available and acceptable to clinicians in the settings in which children with mental disorders and their families seek care This book addresses an important need in the treatment field *From "Backwardness" to "At-Risk"* Barry M. Franklin, 1994-07-01 This book examines the joint effort of twentieth century public school administrators and private philanthropy to initiate reforms to provide for children with learning difficulties The author explores the development of these reforms from the establishment of special classes for backward children at the beginning of the century to the creation of programs for learning disabled children He considers what this history tells us about current efforts to provide for at risk students He looks at both the way school administrators conceptualized childhood learning difficulties and the institutional arrangements which they introduced to accommodate these students and pays particular attention to the preference of school administrators throughout this century for accommodating low achieving children in segregated classes and programs **Education's Prisoners** Ken McGrew, 2008 *Education's Prisoners* sheds light on the complicated relationship among the educational system the political economy and the prison industrial system in the United States Working within the tradition of critical theory this critical ethnography posits a more than accidental connection among these phenomena and engages in a debate with existing literature within critical theory related to structure and agency The life stories of the participants and their perspectives on their social circumstances provide a tool for deepening and questioning our understandings of these matters In addition to its substantive findings this book allows us to see in human terms how structures and forces in society contribute to the outcomes of school failure and incarceration that are usually measured in percentages and correlations It suggests ways of improving classroom experiences and improving the life chances of young people
