Transfer of Learning Stephen M. Cormier,Joseph D. Hagman,2014-06-28 Since the mid 1970s scientific and educational research has left a gap in the field of basic and applied research on transfer of learning This book fills the gap with state of the art information on recent research in the field emphasizing methodological paradigms and interpretive concepts based on contemporary cognitive information processing approaches to the study of human behavior Issues discussed include how transfer is measured how its direction and magnitude are determined how training for transfer differs from training for acquisition and whether different principles of transfer apply to motor cognitive and meta cognitive processes **Learning Strategies** Harold F. O'Neil,2014-05-10 Learning Strategies describes a program of research in learning strategies initiated by the Defense Advanced Research Projects Agency DARPA in 1976 The goal of the program is to improve learning decrease training time and reduce training costs by developing and evaluating instructional materials designed to teach basic intellectual and affective skills This book records the program s progress and suggests further avenues for research Comprised of eight chapters this book begins with an overview of the theoretical underpinnings of the teaching and learning approaches to the improvement of education followed by a discussion on DARPA s preliminary work on an empirically based learning strategy training program as well as its efforts to expand and modify the program In order to provide an intellectual foundation for this program several fields are surveyed for potential learning strategies namely cognitive psychology artificial intelligence behavioral modification and motor learning An instructional systems development approach for learning strategies is also proposed The final chapter deals with models of evaluation extant in education and training and discusses the specific application of transactional evaluation to the DARPA Learning Strategies Research Program This monograph should be of interest to students teachers and educational psychologists **Designing Usable Texts** Thomas M. Duffy,Robert Waller,2014-06-28 Designing Usable Texts covers the analysis of textual communication processes in the real world of publishing systems and work sites The book presents topics on designing and understanding of written texts authoring editing and the production process and training authors of informative documents The text also describes the policies and processes of editing lessons in text design from an instructional design perspective and graphics and design alternatives such as studying strategies and their implications for textbook design The identification of information requirements such as understanding readers and their uses of texts modeling users and their use of technical manuals is also considered Psychologists and people involved in communication design document design information mapping and educational technology will find the book invaluable **Procedures for Instructional Systems Development** Harold F. Classroom Computers and Cognitive Science Alex Cherry Wilkinson,1983   From Diagnostics to Learning Success Klaus Beck,2013-06-12 Accelerated substantial progress regarding many fields of production and services imposes pressure upon the labor market Employers are desperately looking for skilled workers in nearly all technological fields All over the world this pressure reaches the national systems of vocational education and training Along with the output orientation turn new standards are imposed forcing firms and schools to make every endeavor to improve and remodel their programs as well as their practices to reach more and more ambitious goals To be successful they need the results of scientific research from which they demand reliable information on methods to diagnose the state and learning progress of students and on means to foster and promote competencies of heterogeneous groups of leaners The book offers 22state of the art articles covering the central fields of vocational education and training and reporting on new and adequate ways to deal with these challenges

Instructional Models in Computer-Based Learning Environments Sanne Dijkstra,Hein P.M. Krammer,Jeroen J.G. van Merrienboer,2013-11-11 In the last decade there have been rapid developments in the field of computer based learning environments A whole new generation of computer based learning environments has appeared requiring new approaches to design and development One main feature of current systems is that they distinguish different knowledge bases that are assumed to be necessary to support learning processes Current computer based learning environments often require explicit representations of large bodies of knowledge including knowledge of instruction This book focuses on instructional models as explicit potentially implementable representations of knowledge concerning one or more aspects of instruction The book has three parts relating to different aspects of the knowledge that should be made explicit in instructional models knowledge of instructional planning knowledge of instructional strategies and knowledge of instructional control The book is based on a NATO Advanced Research Workshop held at the University of Twente The Netherlands in July 1991   Resources in Education ,2000
