French Italian and Spanish one purpose of the book is thus to provide relatively uniform up to date accounts of all major collections of the period At the same time the book argues that the collections are much more directly influenced by the social milieux from which they emerged and that more groups were involved in the development of high medieval canon law than it has previously been thought In particular the book seeks to replace the still widely held belief that the development of canon law in the century before Gratian s Decretum ca 1140 was largely driven by the Reform papacy Instead it is crucial to take into account the contribution of bishops monks and other groups with often conflicting interests Put briefly local needs and conflicts played a considerably more important role than central papal reform on which older scholarship has largely focused
