Metropolitan Natures Stephane Castonguay, Michele Dagenais, 2011-07-30 One of the oldest metropolitan areas in North America Montreal has evolved from a remote fur trading post in New France into an international center for services and technology A city and an island located at the confluence of the Ottawa and St Lawrence Rivers it is uniquely situated to serve as an international port while also providing rail access to the Canadian interior The historic capital of the Province of Canada once Canada's foremost metropolis Montreal has a multifaceted cultural heritage drawn from European and North American influences Thanks to its rich past the city offers an ideal setting for the study of an evolving urban environment Metropolitan Natures presents original histories of the diverse environments that constitute Montreal and its region It explores the agricultural and industrial transformation of the metropolitan area the interaction of city and hinterland and the interplay of humans and nature The fourteen chapters cover a wide range of issues from landscape representations during the colonial era to urban encroachments on the Kahnawake Mohawk reservation on the south shore of the island from the 1918-1920 Spanish flu epidemic and its ensuing human environmental modifications to the urban sprawl characteristic of North America during the postwar period Situations that politicize the environment are discussed as well including the economic and class dynamics of flood relief highways built to facilitate recreational access for the middle class power generating facilities that invade pristine rural areas and the elitist environmental hegemony of fox hunting Additional chapters examine human attempts to control the urban environment through street planning waterway construction water supply and sewerage *Montreal, City of Water* Michèle Dagenais, 2017-11-15 Built within an exceptional watershed Montreal is intertwined with the waterways that ring its island and flow beneath it in underground networks Even as the city has pushed its suburbs deeper into the interior of the island and onto the mainland the daily lives and leisure activities of its inhabitants remain closely bound to water Montreal City of Water focuses on water not only as a physical element of the landscape both shaping and shaped by urban development but also as a sociocultural component of the life of the city In exploring the dynamics governing the relationship between Montrealers and their environment this unique study considers the role of water in the production and transformation of urban space over two centuries It traces the history of urbanization and shines a light on current concerns about water pollution river rehabilitation and renewed public access to the riverfront and the power relations involved in addressing those concerns *L'eau, l'assainissement et l'hygiène dans les établissements de santé* World Health Organization, 2018-11-07 **The Recent Archaeology of the Early Modern Period in Quebec City: 2009** William Moss, 2017-12-02 This volume is the result of collaboration between SPMA and the Association des archéologues du Québec AAQ its guest editor is William Moss Chief Archaeologist for the City of Quebec The publication has arisen from the celebration of the 400th anniversary of the city's founding by Samuel de Champlain in 1608

an occasion which gave momentum to a number of important archaeological projects in the city and surrounding region and provided an excellent opportunity to present their results It contains sixteen papers all translated from French the language of Quebec City They include accounts of exciting discoveries relating to the port the great chateau on the crag above it the defences and the newly discovered remains of the short lived colony of the 1540s The papers underline Quebec s status as one of the leading centres of urban research in North America The volume provides the only modern overview of

archaeological work in the city in the English language **The Archaeology of Urban Landscapes** Alan James Christian Mayne, Alan Mayne, Tim Murray, 2001-12-13 This exciting 2001 collection on a movement in urban archaeology investigates the historical archaeology of urban slums The material that is dug up broken dinner plates glass grog bottles and innumerable tonnes of building debris nails and plaster samples will not quickly find its way into museum collections But properly interpreted it yields evidence of lives and communities that have left little in the way of written records Including eleven case studies five on cities in the United States and one each on London and Sheffield and further chapters on Cape Town Sydney Melbourne and Quebec City it maps out a new field which will attract the attention of a range of students and scholars outside archaeology in particular historical sociologists and historians **Secondary Sources in the History of**

Morris, Richard H.

Trainor, 2017-07-05 This is a coherent and integrated set of essays around the theme of governance addressing a wide range of questions on the organisation and legitimation of authority At the heart of the book is a set of topics which have long attracted the attention of urbanists and urban historians all over the world the growth and reform of urban local government local centre relationships public health and pollution local government finance the nature of local social lives and of participation in local government Approaching these topics through the concept of governance not only raises a series of new questions but also extends the scope of enquiry for the historian seeking to understand towns and cities all over the world in a period of rapid change Questions of governance must be central to a variety of enquiries into the nature of the urban place There are questions about the setting of agendas about when a localised or neighbourhood issue becomes a big city or even

national political issue about what makes a problem Public health and related matters form a central part of the issues especially for the British in North America fire and the development of urban real estate have dominated in India the security of the colonial government had a prominent place The historical dynamic of these essays follows the change from the chartered governments of the seventeenth and eighteenth centuries towards the representative regimes of the nineteenth and twentieth However such historical change is not regarded as inevitable and the effects of bureaucratic growth regulatory regimes the legitimating role of rational and scientific knowledge as well as the innovatory use of ritual and space are all dealt with at length Municipal Services and Employees in the Modern City Michèle Dagenais,Irene Maver,2016-04-15

Municipal Services and Employees in the Modern City considers the roles played by local institutions and particular processes that shaped the urban fabric It rediscovers from models and maps the constituent dynamics of cities since the beginning of the nineteenth century and demonstrates how patterns evolved in the way services and locations were organized how urban transformation was underpinned by structural development and how the municipal workforce became an integral part of the agencies of change Municipal Services and Employees in the Modern City suggests that municipal experiences are central to the development of urban studies Its focus of analysis ranges across Europe and the Americas from high ranking bureaucrats to firefighters engineers to accountants and town clerks to public servants Each essay provides detailed information on how change was formulated or resisted within the administrative apparatus offering insight into a sector of the white collar class and the degree of commitment to public values often at times of social and political upheaval They explore the course of relationships between local and central government and the shifting bounds of municipal interventionism over a broad period whilst incorporating a social history approach to interpret the day to day responsibilities and routine of administration **L'approvisionnement en eau à Montréal** Dany Fougères,2004 *Archaeoentomological and Archaeoparasitological Reconstructions at Îlot Hunt (CeEt-110)* Allison Bain,2001 A detailed study of the correlation between public and private health in 19th century North America based on the analysis of a large number of samples from latrines in domestic and professional buildings in Ilot Hunt Quebec Canadian Journal of Urban Research ,2003

Barcelona-Montréal : développement urbain comparé Horacio Capel Sáez,Paul-André Linteau,Universidad de Barcelona Centre d'estudis canadencs,1998 Proceedings of the XXth International Congress of History of Science (Liège, 20-26 July 1997). Dieter Hoffmann,Michel Lette,1999 Too often technology is seen as inferior to science as a simple practical application of a self sufficient pure knowledge Such a dichotomy is for sure an illusion The contributions met in this volume reflecting the richness and the density of the session Science Technology and Industry during the XXth International Congress of History of Science in Liege in 1997 show all technology as nothing less than the bridge between science on one side society and economy on the other side And this bridge is not a one way road but a place of interactions between the theoretical and the applied between the knowledge and the know how A special section of this book demonstrates that this

equal footing dialogue has been particularly intense as far as the military technical development is concerned and that for many centuries
