Experimental architecture** Massimo Mucci, 2022-03-25 Nell ampia produzione dell architetto americano Lebbeus Woods 1940 2012 alcuni progetti risalenti alla prima met degli anni Novanta del secolo scorso sono particolarmente rappresentativi del suo impegno nel ridefinire il ruolo politico dell architettura nei processi di trasformazione della societ I tre progetti per le citt di Zagabria Sarajevo e L Avana si distinguono per la ricerca originale e innovativa svolta dall architetto su concetti quali freespace free zone heterarchical city fino ad arrivare a temi progettuali di pi ampia portata Lo studio di questi progetti attraverso l uso della rappresentazione dell architettura come strumento di analisi compositiva permette di addentrarsi nelle procedure ideative e grafiche del progettista e di chiarire i punti di contatto e le distanze rispetto alle tendenze architettoniche di quegli anni I lavori grafici sono qui considerati espressioni di un pensiero teorico critico sull architettura elaborato attraverso l uso esplorativo simultaneo del disegno e della scrittura intrecciati tra loro su pi livelli semantici in una catena di invenzioni figurative Questo permette di riconoscere nell opera di Woods l uso del disegno come progetto e di capire aspetti non conosciuti del suo linguaggio architettonico approfondendone la genesi compositiva all interno di un quadro culturale caratterizzato da temi a lui vicini come quello della experimental architecture il Deco struttivismo la trasformazione

Origins Lebbeus Woods, 1985 Description System Wien is an experimental sketch of Vienna s first District and shows how it might find a way to change even radically New York architect Lebbeus Woods founder of the Research Institute for Experimental Architecture RIEA is deeply involved in architectural theory and experimental work Rather than approach individual building plans he develops visionary projects that embrace science philosophy and art His design process a complex intellectual model also inspired by science fiction icons has influenced generations of architects Woods sets his hypothetical projects in zones of crisis he believes that the architect s task is to design spaces and urban structures that react to the full range of human living conditions The transdisciplinary treatment documented here is a series of architectural interventions on the urban structure of Vienna s first district The accompanying essays provide a broader context for the project and analyze the work and ideas of one of the most important architects of our time Bound with exposed boards and an open spine the book s stitches glue and fragmented images draw a parallel between Woods s work and the architecture of the book **Drawing Futures** Bob Sheil, Frédéric Migayrou, Luke Pearson, Laura Allen, 2016-11-11 Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture Despite numerous developments in technological manufacture and computational design that provide new grounds for designers the act of drawing still plays a central role as a vehicle for speculation There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world In

reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation Drawing Futures will present a compendium of projects writings and interviews that critically reassess the act of drawing and where its future may lie Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments The book coincides with an international conference of the same name taking place at The Bartlett School of Architecture UCL in November 2016 Bringing together practitioners from many creative fields the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas

Lebbeus Woods: Exquisite Experiments, Early Years Aleksandra Wagner, Neil Spiller, 2024-03-18 American architect Lebbeus Woods 1940 2012 remains a quiet hero not only among his colleagues but also for architectural students intrigued by the ideas and fluent beauty of his powerful graphic verve as well as of his writing His projects from the mid 1980s until the end of his life have been widely published However this AD in collaboration with the Estate of Lebbeus Woods explores the earlier period beginning in the late 1960s when Woods was honing his draughtsmanship and theoretical positions while experimenting with a variety of themes and different modes of expression When he burst onto the international architectural scene with a solo exhibition and accompanying catalogue Lebbeus Woods Origins at the Architectural Association London in 1985 some wondered how anyone could emerge so fully formed from nowhere Working against the logic of nowhere this issue charts his early trajectory through the largely unpublished drawings and texts linking them with what came after Aiming to generate new scholarship its roster of international interdisciplinary critics and commentators offer a new understanding of Woods's work and of his formative years also shining a light on how we might think about the early work of any architect's career Contributors Joseph Becker Aaron Betsky Peter Cook Mark Dorrian Riet Eeckhout Kevin Erickson Joerg Gleiter Sharon Irish Eliyahu Keller Lawrence Rinder Ashley Simone Ben Sweeting

Drawing Sir Peter Cook, 2014-01-13 Drawing The Motive Force of Architecture Focusing on the creative and inventive significance of drawing for architecture this book by one of its greatest proponents Peter Cook is an established classic It exudes Cook's delight and his wide ranging catholic tastes for the architectural Readers are provided with perceptive insights at every turn The book features some of the greatest and most intriguing drawings by architects ranging from Frank Lloyd Wright William Heath Robinson Le Corbusier and Otto Wagner to Frank Gehry Zaha Hadid Coop Himmelblau Arata Isozaki Eric Owen Moss Bernard Tschumi and Lebbeus Woods as well as key works by Cook and other members of the original Archigram group For this new edition Cook provides a substantial new chapter that charts the speed at which the trajectory of drawing is moving It reflects the increasing sophistication of available software and also the ways in which hand drawing and the digital are being eclipsed by new hybrids injecting drawing with a fresh momentum These crossovers provide a whole new territory as attempts are made to release drawing from the boundaries of a solitary moment a single

viewing position or a single referential language Featuring the likes of Toyo Ito Perry Kulper Izaskun Chinchilla Kenny Kinugasa Tsui Ali Rahim John Berglund and Lor ne Faure it leads to fascinating insights into the effect that medium has upon intention and definition of an idea or a place Is a pencil drawing more attuned to a certain architecture than an ink drawing or is a particular colour evocative of a certain atmosphere In a world where a Maya drawing is creatively contributing something different from a Rhinoceros drawing there is much to demand of future techniques **Dwell** ,2005-12 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines

Architecture's Pretexts Aarati Kanekar,2014-11-13 The aim of this book is to expose readers to architecture s pretexts that include literary narratives film theatre painting music and ritual as a bridge between diverse intellectual territories and architecture It introduces a selection of seminal modern and contemporary architectural projects their situation within the built environment and their intellectual and formal situation context as pretexts and design paradigms Connections between diverse bodies of information will be cultivated along with the ability to posit consequential relationships for the production of architecture Architecture s Pretexts seeks to cultivate a vision for architecture that sponsors operative links between the discipline of architecture and those outside of architecture Exploring the works of various architects including Guiseppe Terragni Peter Eisenman Peter Zumthor Perry Kulper and Smout Allen and Rem Koolhaas this book provides the framework to understanding architecture through the lens of art Key concepts discussed are allegories diagrams form material montage movement musical ratios narrative sequence and representation A valuable tool with over 75 black and white illustrations for students and professionals interested in interdisciplinary methods of design thinking **Dwell** ,2005 *A + U, architecture and urbanism* ,2005 *Origins* Lebbeus Woods,1985 Description System Wien is an experimental sketch of Vienna s first District and shows how it might find a way to change even radically New York architect Lebbeus Woods founder of the Research Institute for Experimental Architecture RIEA is deeply involved in architectural theory and experimental work Rather than approach individual building plans he develops visionary projects that embrace science philosophy and art His design process a complex intellectual model also inspired by science fiction icons has influenced generations of architects Woods sets his hypothetical projects in zones of crisis he believes that the architect s task is to design spaces and urban structures that react to the full range of human living conditions The transdisciplinary treatment documented here is a series of architectural interventions on the urban structure of Vienna s first district The accompanying essays provide a broader context for the project and analyze the work and ideas of one of the most important architects of our time Bound with exposed boards and an open spine the book s stitches glue and fragmented images draw a parallel between Woods s work and the architecture of the book **Metropolis** ,2005 **Parnass** ,2005 **Die Bühne** ,2005 **Ottagono** ,2005
