Dowd, 2000-07-01 Most fathers parent less than most mothers. Those fathers who do parent equally or more so than mothers are poorly supported by our society. For children this means a loss of adult care as well as an ongoing and sharply defined differentiation between fathers and mothers Fathers are not present in children's lives to a significant degree if at all or when they are present they are often rendered socially invisible For many men their parenthood is defined as biological or economic while a minority of men struggle against the presumption that they are not caregivers In Redefining Fatherhood Nancy Dowd argues that this skewed social pattern is mirrored and supported by law Dowd makes the case for reenvisioning fatherhood away from genes and dollars and toward nurture Integrating economic social and legal aspects of fathering she makes the case for focusing on social nurturing behavior as the core meaning of fatherhood In this nuanced and complex analysis she explores the barriers to redefinition including concepts of masculinity the interconnections between fathers and mothers male violence and homophobia Redefining Fatherhood offers a progressive view on how men and society at large can change understandings and practices of fatherhood Redefining Families Adele Eskeles Gottfried, Allen W. Gottfried, 2013-06-29 Families are undergoing dramatic changes in our society Our traditional views are being challenged by new family arrangements These new family arrangements are forcing redefinitions of what constitutes a family and raising significant issues regarding the potential developmental consequences for children in these families if such exist Moreover the ramifications of redefined families and their bear ing on children's development extend into the legal political and societal arenas This book focuses on the relationships between di verse family arrangements and children's development as well as on legal and social implications Our interest in this area emanates from our experience in directing the Fullerton Longitudinal Study In the course of this investigation we observed families undergoing transformation most commonly in maternal employment and marital status Our initial research on the role of maternal employment in children's development provided the scientific foundation for our interest Just as we feel that maternal employment and dual earner families should be comprehensively re searched regarding their relationships to children s development we also believe that other contemporary family arrangements should receive extensive attention in the developmental literature Hence the idea for this book emerged Cruel but Not Unusual Ramona Alaggia, Cathy Vine, 2013-05-21 Violence in families and intimate relationships affects a
