Joint Utterance Construction In Japanese Conversation Studies In Discourse And Grammar:

Joint Utterance Construction in Japanese Conversation Makoto Hayashi, 2003 This book focuses on how participants in Japanese conversation negotiate and achieve joint courses of action within a single turn at talk Using the methodology of Conversation Analysis as a central framework this book describes in detail the structures and procedures used by Japanese speakers to jointly produce a coherent grammatical unit in progress and explores the range of social actions that speakers accomplish by employing that practice This study is part of a larger project intended to investigate how humans achieve intricate coordination of their behavior with that of co participants in everyday social encounters and how language plays a constitutive part in making such micro level social coordination possible Through a close examination of joint utterance construction in Japanese this book contributes to a growing body of research into the mutual influence between the grammatical organization of language and the organization of situated human conduct in social interaction Preferred Argument Structure John W. Du Bois, Lorraine Edith Kumpf, William J. Ashby, 2003-01-01 Preferred Argument Structure offers a profound insight into the relationship between language use and grammatical structure In his original publication on Preferred Argument Structure Du Bois 1987 demonstrated the power of this perspective by using it to explain the origins of ergativity and ergative marking systems Since this work the general applicability of Preferred Argument Structure has been demonstrated in studies of language after language In this collection the authors move beyond verifying Preferred Argument Structure as a property of a given language They use the methodology to reveal more subtle aspects of the patterns for example to look across languages diachronically or synchronically to examine particular grammatical relations and to examine special populations or particular genres This volume will appeal to linguists interested in the relationship of pragmatics and grammar generally in the typology of grammatical relations and in explanations derived from data and corpus based approaches to analysis **Multimodality, Interaction and Turn-taking in Mandarin Conversation** Xiaoting Li, 2014-07-17 One major feature of conversation is that people take turns to speak Based on audio and video recordings of naturally occurring Mandarin conversation this book explores the role of syntax prosody body movements as well as their interplay in turn organization in the temporal unfolding of action and interaction Adopting the methodology of interactional linguistics this book offers a fine grained analysis of the three multimodal resources and the sequential environments in which they appear It demonstrates that syntax prosody and body movements not only converge but also diverge in projecting possible turn completion As one of the few systematic studies of multimodality in Mandarin interaction this book will be of interest to researchers in Chinese linguistics interactional linguistics conversation analysis and multimodal analysis **Interactional Linguistics** Elizabeth Couper-Kuhlen, Margret Selting, 2018 Reviewing recent findings on linguistic practices used in turn construction and turn taking repair action formation and ascription sequence and topic organization the book examines the way linguistic units of varying size sentences clauses phrases clause combinations

particles are mobilized for the implementation of specific actions in talk in interaction A final chapter discusses the implications of an interactional perspective for our understanding of language as well as its variation diversity and universality Supplementary online chapters explore additional topics such as the linguistic organization of preference stance footing and storytelling as well as the use of prosody and phonetics and further practices with language

Crosslinguistic Studies of Clause Combining Ritva Laury, 2008-10-29 The study of clause combining has been advanced lately by increasing interest in the study of actual language use in a typologically diverse set of languages A number of received understandings have been challenged among these the idea of clause combinations as being divisible into subordination and coordination in a binary fashion Connected to this idea is the nature of conjunctions a topic treated in several articles here Couched within the larger issue of the nature of categoriality in language several of the papers show that conjunctions are highly polyfunctional items and that clause combining is only one of the uses to which speakers put them Other topics treated in the volume are the historical development of conjunctions and the use of formulaic main clause constructions as projective units in conversation The articles manifest both typological and theoretical breadth They are based on data from Bulgarian English Estonian Finnish Indonesian Japanese and Spanish The theoretical approaches include discourse functional interactional historical and generative linguistics

Grammar and Inference in Conversation Michael C. Ewing, 2005-12-21 This study analyzes how morphosyntactic structures and information flow characteristics are used by interlocutors in producing and understanding clauses in conversational Javanese focusing on the Cirebon variety of the language While some clauses display grammatical mechanisms used to code their structure explicitly and redundantly many other clauses include few if any of these grammatical resources These extremes mark a cline between the morphosyntactic and paratactic expression of clauses The situation is thrown into relief by the frequency of unexpressed referents and conversationalists heavy reliance on shared experience and cultural knowledge In all cases pragmatic inference grounded in the interactional context is essential for establishing not only the discourse functions but indeed also the very structure of clauses in conversational Javanese This study contributes to our understanding of transitivity emergent constituency prosodic organization and the co construction of meaning and structure by conversational interlocutors

Embodied Interaction Jürgen Streeck, Charles Goodwin, Curtis D. LeBaron, 2011-08-15 Leading international scholars provide a coherent framework for analyzing body movement and talk in the production of meaning

The Handbook of Conversation Analysis Jack Sidnell, Tanya Stivers, 2012-08-10 Presenting a comprehensive state of the art overview of theoretical and descriptive research in the field The Handbook of Conversation Analysis brings together contributions by leading international experts to provide an invaluable information resource and reference for scholars of social interaction across the areas of conversation analysis discourse analysis linguistic anthropology interpersonal communication discursive psychology and sociolinguistics Ideal as an introduction to the field for upper level undergraduates and as an in depth review of the latest developments for graduate level students and established

scholars Five sections outline the history and theory methods fundamental concepts and core contexts in the study of conversation as well as topics central to conversation analysis Written by international conversation analysis experts the book covers a wide range of topics and disciplines from reviewing underlying structures of conversation to describing conversation analysis relationship to anthropology communication linguistics psychology and sociology

Usage-based Approaches to Japanese Grammar Kaori Kabata,Tsuyoshi Ono,2014-06-15 This volume brings together papers that take usage based approaches to study the nature of human language with a focus on the grammar of Japanese The 12 chapters provide a rich array of data and methodologies with topics ranging from phonology modality and grammatical morphemes to sentential construction and discourse level phenomena such as turn taking speech register and language change As a whole they demonstrate that usage based linguistics illuminates various phenomena in the language that could not have been well accounted for by resorting solely to a formal theory such as the Universal Grammar based approach Reflecting theoretical methodological and technological advancements made in and outside the field of cognitive functional linguistics in recent years the papers contained in this volume both individually and collectively have significant implications towards linguistics in general and Japanese linguistics in particular as we as Japanese language teaching

Intonation Units in Japanese Conversation Kazuko Matsumoto,2003-10-31 This book explores how speakers of Japanese organize their messages into coherent units as they jointly and interactively construct conversational discourse Specifically it investigates the syntactic informational and functional structures of intonation units IUs as basic units of discourse production and information flow in spoken communication It addresses various research topics clause vs phrase centrality relationship between IUs and clauses functions of independent NPs preferred argument clause structure and transitivity interrelationship among functional components and the role of new and interactional information in the shaping of IU syntax Overall it tries to elucidate not only the preferred IU structures that are typical of the way Japanese speakers talk in connected discourse but also possible relationships between the structures and their implications Besides three main chapters discussing the results of quantitative and qualitative analyses it also includes an introductory chapter comprehensively covering key issues in research on information flow in spoken discourse in general Thus the book will be useful to all students and researchers of functional linguistics and discourse analysis

Grammar and Interaction Emma Betz,2008 This monograph provides a micro analytic description of the structure and communicative use of syntactic pivot constructions in German Using the methodology of Conversation Analysis this work shows that pivots emerge in interaction in response to local communicative needs Exclusively found in spoken German pivots allow a speaker to extend an utterance beyond a possible completion point in a syntactically and prosodically unobtrusive way Speakers utilize this basic property to promote context specific actions managing boundaries of speakership bridging sequential and topical junctures and dealing with different types of interactional trouble Through a close examination of syntactic pivots as an interactional resource this work shows that

spoken linguistic structures can only be fully understood if we acknowledge the temporality of language and view grammar as usage based and negotiable This book thus contributes to a growing body of research at the intersection of grammar and interaction

Conversation Analysis Jack Sidnell, 2009-09-17 Conversation analysis is an approach to the study of social interaction that focuses on practices of speaking that recur across a range of contexts and settings The early studies in this tradition were based on the analysis of English conversation More recently however conversation analysts have begun to study talk in a broader range of communities around the world Through detailed analyses of recorded conversations this book examines differences and similarities across a wide range of languages including Finnish Japanese Tzeltal Mayan Russian and Mandarin Bringing together interrelated methodological and analytic contributions it explores topics such as the role of gaze in question and answer sequences the organization of repair and the design of responses to assessments The emerging comparative perspective demonstrates how the structure of talk is inflected by the local circumstances within which it operates

Units of Talk □ Units of Action Beatrice Szczepek Reed, Geoffrey Raymond, 2013-10-22 In this volume leading academics in Interactional Linguistics and Conversation Analysis consider the notion of units for the study of language and interaction Amongst the issues being explored are the role and relevance of traditionally accepted linguistic units for the analysis of naturally occurring talk and the identification of new units of conduct in interaction While some chapters make suggestions on how existing linguistic units can be adapted to suit the study of conversation others present radically new perspectives on how language in interaction should be described conceptualised and researched The chapters present empirical investigations into different languages Danish English Japanese Mandarin Swedish in a variety of settings private and institutional considering both linguistic and embodied resources for talk In addressing the fundamental question of units the volume pushes at the boundaries of current debates and contributes original new insight into the nature of language in interaction

Request Sequences Carmen Taleghani-Nikazm, 2006-01-01 This monograph provides a micro analytic description of instances of requests in everyday German conversation Using the framework of CA the study systematically analyzes the grammatical and syntactical structure of the request turn and its response and of the conversational exchanges before and within the request base sequence and the placement of the request sequence within the larger social interaction Through an empirical analysis of individual cases of request sequences in German the monograph describes in detail a how speakers employ grammar and syntax as resources to construct turns at talk and accomplish the social action of request b how speakers use grammatical and syntactical forms of the language to coordinate the production of the social action of requests c how speakers use grammar and syntax as interactional resources to manage affiliative and remedial work i e face work when performing delicate social actions such as requests and d how the context of the request activity impacts the grammatical and syntactical constructions of speakers utterances Additionally the monograph demonstrates that both the grammatical construction of turns and their placement within the talk are oriented to the

sequential context of the interaction

Language Typology and Syntactic Description: Volume 2, Complex

Constructions Timothy Shopen, 2007-10-04 This unique three volume 2007 survey brings together a team of leading scholars to explore the syntactic and morphological structures of the world's languages. Clearly organized and broad ranging it covers topics such as parts of speech, passives, complementation, relative clauses, adverbial clauses, inflectional morphology, tense, aspect, mood, and deixis. The contributors look at the major ways that these notions are realized and provide informative sketches of them at work in a range of languages. Each volume is accessibly written and clearly explains each new concept introduced. Although the volumes can be read independently together they provide an indispensable reference work for all linguists and fieldworkers interested in cross linguistic generalizations. Most of the chapters in the second edition are substantially revised or completely new, some on topics not covered by the first edition. Volume II covers coordination, complementation, noun phrase structure, relative clauses, adverbial clauses, discourse structure, and sentences as combinations of clauses.

Negotiation of Contingent Talk Emi Morita, 2005-01-01 LC number 2005048396 *Increments in Mandarin Chinese* Ni-Eng Lim, 2024-06-19 Looking at everyday Mandarin Chinese conversations, this book provides a comprehensive examination of the practices used in producing Chinese increments. Increments have been identified as a key nexus that evinces how human interactional practices are fundamental to the structuration of grammar. Lim examines the common interactional work these increments do in their sequential context and what implications these findings have for our understanding of language and grammar. Based on the examination of actual interactional practices by Chinese speakers, findings show that all types of grammatically fitted and unfitted increments can be produced in a situated context. The research in this book also demonstrates how similar action can be pursued using different types of increments and that more than one task or action may be concurrently and subtly accomplished with the use of a single increment. The results indicate how the regular everyday practices of Chinese increment formulated in moment to moment interaction instantiate and endorse multiple principles expounded in emergent grammar, thereby adding to our wider understanding of language and grammar. This book will primarily interest researchers, graduate students, and educators working within the field of interactional linguistics and conversation analysis, in particular those in Chinese speaking regions. As research on non-English data is still very limited in these areas, the book will also be useful for researchers with broad interests in the Chinese language.

Pragmatics of Japanese Mutsuko Endo, Hudson, Yoshiko Matsumoto, Junko Mori, 2018-04-15 Bringing together the latest studies on Japanese pragmatics, this edited volume showcases the breadth of research conducted in this ever-expanding interdisciplinary field, with the introductory chapter providing a useful summary of developments in the field in the past decades. The twelve chapters address a variety of traditional and emerging topics by adopting diverse theoretical and methodological frameworks and presenting a range of perspectives on grammar, interaction, and culture. They demonstrate a wide scope of pragmatics research, informed by as well as informing usage-based grammar, cognitive linguistics, conversation

analysis sociolinguistics linguistic anthropology and literary and cultural studies Chapters also consider future directions as to how the study of Japanese language in use will continue to offer critical data and analyses to the field dominated by the study of English and other European languages This volume is certain to be of interest to students and scholars engaged in pragmatics in general and the Japanese language in particular Prosody and Embodiment in Interactional Grammar Pia Bergmann, Jana Brenning, Martin Pfeiffer, Elisabeth Reber, 2012-12-06 Studies in Interactional Linguistics have provided impressive evidence of the systematic use of vocal verbal and visual resources in social interaction While members of the field have discussed what role these resources play in a grammar of social interaction they have focused primarily on lexico syntactic structures The contributions to the present volume however focus on prosody and embodiment exploring the role prosody plays in interactional meaning making and how visual spatial resources such as gesture and gaze relate to the use of verbal and vocal resources This volume includes contributions on Danish English French German and Swedish interaction with a primary focus on Interactional Linguistics and additional work from multimodal corpora This volume will be of theoretical and methodological interest to readers with a background in Linguistics Conversation Analysis and multimodal corpora **Stance in Talk** Ruey-Juan Wu, 2004 Guided by the methodology of conversation analysis CA this book explores how participants in Mandarin conversation display stance in the unfolding development of action and interaction and in particular how this is accomplished through the use of two Mandarin final particles Through a close examination of the sequential environments of these two particles and the interactional work accomplished by their use the research presented in this book seeks to demonstrate how a participant oriented action based micro approach to data can help us gain analytic leverage in understanding the functions and meanings of these particles an area which has long posed a challenge to Chinese linguists On the other hand in utilizing a CA based framework applied to Mandarin this study also seeks to contribute to conversation analytic research by revealing previously uninvestigated language specific phenomena while at the same time showing how talk in interaction in a non western language i e Mandarin can also display the same striking systematicity and orderliness as observed in many western languages As one of the pioneering CA studies of Mandarin this book will be of interest to researchers in Chinese linguistics and conversation analysis as well as those in fields which touch upon the relationships between languages and cultures
