Logan Turner,1927 **"A Time to Heal"** Jerry L. Gaw,1999 In the 19th century Joseph Lister related the germ theory of fermentation to the cause of putrefaction in wounds Listerism was adopted because its success was greater and more consistent than other methods of healing the sick The circumstances which made this possible were a theory for explaining the scientific evidence and a courageous person like Joseph Lister who was capable of bringing about the necessary changes This study records how with much pain and trial and error the prevention of nosocomial infections was achieved in the 19th century Today we have learned we must implement again Lister s prevention techniques and other precautions in our hospitals to prevent the spread of nosocomial infections Illus Joseph, Baron Lister Dr. Arthur Logan Turner,1927

Rutkow,1988 Annotated bibliography of surgical material published in eighteenth and nineteenth century America Covers general surgery gynecology orthopedic surgery ophthalmology urology otorhinolaryngology neurological surgery anesthesia plastic surgery and thoracic surgery Empire of the Scalpel Ira Rutkow,2022-03-08 From a renowned surgeon and historian with five decades of experience comes a remarkable history of surgery s development spanning the Stone Age to

the present day blending meticulous medical studies with lively and skillful storytelling There are not many events in life that can be as simultaneously life frightening and life saving as a surgical operation Yet in America tens of millions of major surgical procedures are performed annually but few of us pause to consider the magnitude of these figures because we have such inherent confidence in surgeons And despite passionate debates about healthcare and the endless fascination with surgical procedures most of us have no idea how surgeons came to be because the story of surgery has never been fully told Now *Empire of the Scalpel* elegantly reveals the fascinating history of surgery's evolution from its earliest roots in Europe through its rise to scientific and social dominance in the United States From the 16th century saga of Andreas Vesalius and his crusade to accurately describe human anatomy while appeasing the conservative clergy who clamored for his burning at the stake to the hard to believe story of late 19th century surgeons' apathy to Joseph Lister's innovation of antisepsis and how this indifference led to thousands of unnecessary surgical deaths *Empire of the Scalpel* is both a global history and a uniquely American tale You'll discover how in the 20th century the US achieved surgical world supremacy heralded by the Nobel Prize winning seemingly impossible feat of transplanting a kidney and how the heart lung machine was developed along with much more Today the list of possible operations is almost infinite from knee and hip replacement to heart bypass and transplants to fat reduction and rhinoplasty and Rutkow draws on his five decade career to show us how we got here Authoritative captivating and comprehensive *Empire of the Scalpel* portrays the evolution of surgery in all its dramatic and life enhancing complexity and shows that its history is truly one awe inspiring triumph after another
