**Joseph Smith's United Order: A Non-Communalistic Interpretation** Kent W. Huff, 2020-07-17 Socialism was never a part of Mormon doctrine but internal and external proponents of socialism have nonetheless been able convince many members and outsiders through perpetuating myths and legends that it has been or is a part of church doctrine The Mormon Church The Church of Jesus Christ of Latter day Saints was organized in 1830 and immediately began moving westward from New York to Kirtland Ohio and Independence Missouri and later from about 1838 to 1845 to Nauvoo Illinois The next move was to Utah beginning in 1847 Numerous cooperative efforts were necessary at each stage to help the poorer and weaker members of the Church move along with the others Some of its first converts had been members of communal societies before their contacts with the Mormons Also the enemies of the Church found an untrue but effective epithet against those sheep stealing Mormons by calling their new organization common stock communalism or socialism a damning charge in the political atmosphere of the time Joseph Smith went to great efforts to speak and write against this falsehood declaring that it had nothing to do with the church His successor Brigham Young continued the practice of denouncing this false claim declaring that such a doctrine could destroy the church especially in its precarious Utah setting Nonetheless it appears that the external enemies of the church and some of its politically leftwing members have by sheer weight of repetition made it part of the unofficial lore of the church The term united order came from the united firm one name for the early church business partnerships The term united order also comes from the Brigham Young era of the church s history and needs to be further explained in that unique context as is done in the subsequent book Brigham Youngs United Order With no powers of self government granted the Mormons for the first 22 years of their time in Utah some unusual and creative temporary substitutes were invented The official history of the church makes it clear that various practical methods were used to solve problems as they arose many involving cooperation as one might expect of any tight knit religious body but none required any doctrinaire overriding of the principle of private ownership of property as the centralizing socialists would like to see For one thing that would be severely inconsistent with the constitution of the United States In the first 8 years of the church s existence it was not legally possible to organize it as a corporation as it is today As an unsatisfactory but necessary stop gap measure a common law business partnership was organized to carry on church business of all kinds The partners also constituted a temporary Quorum of the Twelve for ecclesiastical purposes In the normal accounting practices of partnerships all partners are assumed to be agents of all the others and also to share equally in the both the liabilities and profits of the business including being personally liable for all the partnership s debts There is thus no escape from full liability but the use of silent unknown partners can give those unknown partners a small amount of financial protection It is strange to see that misunderstandings of the British common law and misunderstandings of many other events and circumstances as well have been used in political and polemical efforts to justify pressing socialism into the canon of church doctrine but socialism

centralized ownership and control of nearly everything can never be part of a value system that emphasizes individual responsibility It is no accident that Utah is mostly a conservative Republican state This apparent inconsistency deep within the doctrines of the church will likely lead to a whole set of difficulties as the church grows in size and influence At some point this issue must be cleared up and this book should help     *Joseph Smith's United Order* Kent W. *Grappling with Societies and Institutions in an Era of Socio-Ecological Crisis* Hans A. Baer,2020-12-10 Grappling with Societies and Institutions in an Era of Socio Ecological Crisis is an autobiographical ethnography of the journey through various societies and institutions and how they function in the midst of an era of socio ecological crises The volume traces the steps of the author in becoming a radical anthropologist namely through the experience of immigration and naturalization from Peru to the United States and then to Australia politicization while working as an engineer in the aircraft industry during the late 1960s socialization in and subsequent exit from Roman Catholicism and experiences as an academic working in the corporate university As well the author illuminates the practices of research and engagement as a scholar activist on various topics such as the Levites of Utah and African American Spiritual churches socio political and religious life in East Germany complementary and alternative medicine the Australian climate movement and democratic eco socialism

*Railroading Religion* David Walker,2019-08-13 Railroads tourism and government bureaucracy combined to create modern religion in the American West argues David Walker in this innovative study of Mormonism s ascendancy in the railroad era The center of his story is Corinne Utah an end of the track hell on wheels railroad town founded by anti Mormon

businessmen In the disputes over this town s frontier survival Walker discovers intense efforts by a variety of theological political and economic interest groups to challenge or secure Mormonism s standing in the West Though Corinne s founders hoped to leverage industrial capital to overthrow Mormon theocracy the town became the site of a very different dream Economic and political victory in the West required the production of knowledge about different religious groups settling in its lands As ordinary Americans advanced their own theories about Mormondom they contributed to the rise of religion itself as a category of popular and scholarly imagination At the same time new and advantageous railroad related alliances catalyzed LDS Church officials to build increasingly dynamic religious institutions Through scrupulous research and wide ranging theoretical engagement Walker shows that western railroads did not eradicate or diminish Mormon power To the contrary railroad promoters helped establish Mormonism as a normative American religion
