Journal Ancient Voyage:

The Journals of Captain James Cook on his Voyages of Discovery J.C. Beaglehole, 2017-07-05 On his second expedition to the Pacific in the years 1772-5 Captain James Cook made a voyage which in the annals of exploration is unsurpassed for grandeur of design and execution and for variety of experience Cook traversed the Indian and Pacific Oceans in high latitudes demonstrating that the supposed Southern continent could not extend north of 60 Cook three times crossed the Antarctic Circle reaching his furthest south in 71° 10' and he proved himself a master of navigation in ice In the Pacific his discoveries or rediscoveries included the Tonga Islands Easter Island the Marquesas the New Hebrides and New Caledonia with the sub antarctic islands of South Georgia and the South Sandwich group Captain Furneaux commanding the consort ship examined the coasts of Tasmania The written and graphic records left by Cook himself and by his officers by the astronomer William Wales and the artist William Hodges by the naturalists J R and George Forster are remarkable in their volume and vitality The editor Dr J C Beaglehole here prints the full text of Cook's own journal constructed from two holograph MSS and several MS copies and a great part of Wales's journal This facsimile edition reprints the edition of 1961 along with the Addenda and Corrigenda published in 1969 The illustrations originally in colour are reproduced in black and white the fold outs divided to fit on separate pages and the volume split into two parts

Pathologies of Travel Richard Wrigley, George Revill, 2000 The essays in this volume which range across Europe America and Africa and from the 18th to the 20th centuries argue that the experience of travel and the business of representing that experience involved an obligatory engagement with the disturbing perception that travel's pleasures were inseparable from its dangers and ennui Despite the confidence of some medical authorities in their recommendations of the therapeutic benefits to be derived from change of air as a way of restoring a state of health such opinions failed to establish a consensus either amongst those who followed such peripatetic prescriptions or amongst the medical professions in general Mad doctors and climatologists alike were forced to adopt an essentially partisan stance in arguing their case for such recommendations and were confronted by rival practitioners who could marshal counter case histories which demonstrated diametrically opposed conclusions concerning the advisability of travel To this extent the history of travel and its pathologies is a particularly revealing instance of the way medical thinking was dependent on localised studies which might do more to challenge the universal applicability of generally accepted theories than they did to confirm their diagnostic reliability The essays collected here not only contribute to our understanding of the conception and application of a variety of medical ideas showing how they depended on beliefs about climate and corporeal constitution as well as often inconsistent data or reports culled from travellers and geographically dispersed case histories but also open up illuminatingly complex perspectives on the uncertainties and dangers of the phenomenon of modern travel
