Illustrated by Maps and Charts Robert Kerr (F.R.S.E.), 1811      *Captain James Cook and the Search for Antarctica* James C Hamilton, 2020-05-30 Two hundred and fifty years ago Captain James Cook during his extraordinary voyages of navigation and maritime exploration searched for Antarctica the Unknown Southern Continent During parts of his three voyages in the southern Pacific and Southern Oceans Cook narrowed the options for the location of Antarctica Over three summers he completed a circumnavigation of portions of the Southern Continent encountering impenetrable barriers of ice and he suggested the continent existed a frozen land not populated by a living soul Yet his Antarctic voyages are perhaps the least studied of all his remarkable travels That is why

James Hamilton's gripping and scholarly study which brings together the stories of Cook's Antarctic journeys into a single volume is such an original and timely addition to the literature on Cook and eighteenth century exploration. Using Cook's journals and the log books of officers who sailed with him, the book sets his Antarctic explorations within the context of his historic voyages. The main focus is on the Second Voyage 1772-1775, but brief episodes in the First Voyage during 1769 and the Third Voyage 1776 are part of the story. Throughout the narrative, Cook's exceptional seamanship and navigational skills, and that of his crew, are displayed during often difficult passages in foul weather across uncharted and inhospitable seas. Captain James Cook and the Search for Antarctica offers the reader a fascinating insight into Cook, the seaman and explorer, and it will be essential reading for anyone who has a particular interest in the history of the Southern Continent. Captain James Cook's first two voyages of exploration in 1768-71 and 1772-75 had drawn the modern map of the South Pacific Ocean and had opened the door on the discovery of Antarctica. These expeditions were the subject of Volumes I and II of Dr J.C. Beaglehole's edition of Cook's Journals. The third voyage, on which Cook sailed in 1776, was directed to the Northern Hemisphere. Its objective was the discovery of a Northern Passage by sea from the Pacific to the Atlantic Ocean, the North West Passage sought since the 16th century, which would have transformed the pattern of world trade. The search was to take Cook into high latitudes where, as in the Antarctic, his skill in ice navigation was tested. Sailing north from Tahiti in 1778, Cook made the first recorded discovery of the Hawaiian Islands. On March 7, he sighted the Oregon coast in 44°N. The remarkable voyage which he made northward along the Canadian and Alaskan coasts and through Bering Strait to his farthest north in 70°N nearly disproved the existence of a navigable passage towards the Atlantic and produced charts of impressive accuracy. Returning to Hawaii to refit, Cook met his death in a clash with the natives as tragic as it seems unnecessary. Dr Beaglehole discusses with sympathy and insight the tensions which led Cook, by then a tired man, into miscalculations alien to his own nature and habits. The volume and vitality of the records, both textual and graphic, for this voyage surpass those even for Cook's second voyage. The surgeons, William Anderson and David Samwell, both admirable observers, left journals which are also here printed in full for the first time. The documentation is completed, as in the previous volumes, by appendixes of documents and correspondence and by reproductions of original drawings and paintings, mainly by John Webber, the artist of the expedition. In Dr Beaglehole's words, no one can study attentively the records of Cook's third and last voyage. *A general history and collection of voyages and travels*. Robert Kerr, 1811.
