Air and Sea Power in World War I Maryam Philpott, 2013-05-30 The Great War tore the fabric of Europe apart killing over 35 million men and challenging the notion of heroism in war *Air and Sea Power in World War I* focuses on the experience of World War I from the perspective of British pilots and sailors themselves to demonstrate that the army centric view of war studies has been too limited The Royal Flying Corps created in 1912 adapted quickly to the needs of modern warfare driven by the enthusiasm of its men In contrast the lack of modernisation in the Royal Navy despite the unveiling of HMS Dreadnought in 1906 undermined Britain's dominance of the seas By considering five key aspects of the war experience this book analyses how motivation was created and sustained What training did men receive and how effectively did this prepare them for roles that were predominantly non combative How was motivation affected by their individual relationship with weaponry development and how different was defensive service on the Home Front when in close proximity to ordinary civilian life Finally *Air and Sea Power in World War I* looks at the changing reputation of the services during and after the conflict and the extent to which these notions were created by the memoirs of pilots and sailors Featuring new primary source material including the journals of service men themselves this book will be essential reading for students and scholars of World War I and of Naval Aviation and Military History

Film and the Holocaust Aaron Kerner, 2011-05-05 When representing the Holocaust the slightest hint of narrative embellishment strikes contemporary audiences as somehow a violation against those who suffered under the Nazis This anxiety is at least in part rooted in Theodor Adorno's dictum that To write poetry after Auschwitz is barbaric And despite the fact that he later reversed his position the conservative opposition to all artistic representations of the Holocaust remains powerful leading to the insistent demand that it be represented as it really was And yet whether it's the girl in the red dress or a German soldier belting out Bach on a piano during the purge of the ghetto in *Schindler's List* or the use of tracking shots in the documentaries *Shoah* and *Night and Fog* all genres invent or otherwise embellish the narrative to locate meaning in an event that we commonly refer to as unimaginable This wide ranging book surveys and discusses the ways in which the Holocaust has been represented in cinema covering a deep cross section of both national cinemas and genres

The Iranian Revolution And The Muslim World David Menashri, 2019-07-09 This book delineates the Islamic revolution's impact mainly on the Muslim Middle East and examines the first decade of the revolution It deals with the repercussions of the revolution in several Shi'i communities and examines Sunni polemical writings on the Shi'a and the Iranian revolution

The Russian Revolution and Civil War 1917-1921 Jonathan Smele, 2006-04-15 The Russian Revolution and Civil War in the years 1917 to 1921 is one of the most widely studied periods in history It is also somewhat inevitably one that has generated a huge flow of literature in the decades that have passed since the events themselves However until now historians of the revolution have had no dedicated bibliography of the period and little claim to bibliographical control over the literature *The Russian Revolution and Civil War 1917-1921* offers for

the first time a comprehensive bibliographical guide to this crucial and fascinating period of history The Bibliography focuses on the key years of 1917 to 1921 starting with the February Revolution of 1917 and concluding with the 10th Party Congress of March 1921 and covers all the key events of the intervening years As such it identifies these crucial years as something more than simply the creation of a communist state

Western Europe's Small Wars and Counterinsurgencies Since Napoleon Mark Lawrence, 2024-12-25 This book focuses on the wars that are normally relegated to the periphery of geopolitics at the heart of Europe's new military history The military history of the past two centuries of European history has tended to be viewed in the shadow of total war The impact and aftermath of the French upheaval of 1792 1815 the mid-century struggles for national unification the World Wars of 1914 18 and 1939 45 and the prospect of mutually assured destruction in the Cold War were all framed as a totalization of warfare and as a tragic pretext for projects of human rights collective security and political integration But this emphasis on large wars overlooks the impact of the wars waged by minor powers as well as the small wars and counterinsurgencies waged by great powers overseas The suppression of southern European revolutions in the 1820s Belgian independence Cuban struggles against Spanish rule and the wars of new imperialism ranging from Aceh to Annam all shaped the strategic and domestic environment in which the Great War happened and they reverberated on the post 1918 growth of totalitarianism Equally the post 1945 wars of decolonization militarized the culture and politics in the democratic and authoritarian states of the old continent in ways which belied the macro political identities of the Cold War

Reading the Roman Republic in Early Modern England Freyja Cox Jensen, 2012-08-03 Placing the reading of history in its cultural and educational context and examining the processes by which ideas about ancient Rome circulated this study provides the first assessment of the significance of Roman history broadly conceived in early modern England The existing scholarship preoccupied with republicanism in the decades before the Civil Wars and focusing on the major drama of the period has distorted our understanding of what ancient history really meant to early modern readers This study articulates the connections between the history of education reading and writing and challenges the schools of historical thought which associate a particular classical source with one set of readings here for the first time is an in depth analysis of the role of Roman history in creating an English latinate culture which encompassed far wider debates and ideas than the purely political

The Artist and the Eternal City Loyd Grossman,2021-08-03 This brilliant vignette of seventeenth century Rome its Baroque architecture and its relationship to the Catholic Church brings to life the friendship between a genius and his patron with an ease of writing that is rare in art history By 1650 the spiritual and political power of the Catholic Church was shattered Thanks to the twin blows of the Protestant Reformation and the Thirty Years War Rome celebrated both as the Eternal City and Caput Mundi the head of the world had lost its preeminent place in Europe Then a new Pope Alexander VII fired with religious zeal political guile and a mania for creating new architecture determined to restore the prestige of his church by making Rome the key destination for Europe s intellectual political and cultural elite To help him do so he enlisted the talents of Gianlorenzo Bernini already celebrated as the most important living artist no mean feat in the age of Rubens Rembrandt and Velazquez [A History of Global Consumption](#) Ina Baghdiantz McCabe,2014-08-27 In A History of Global Consumption 1500 1800 Ina Baghdiantz McCabe examines the history of consumption throughout the early modern period using a combination of chronological and thematic discussion taking a comprehensive and wide reaching view of a subject that has long been on the historical agenda The title explores the topic from the rise of the collector in Renaissance Europe to the birth of consumption as a political tool in the eighteenth century Beginning with an overview of the history of consumption and the major theorists such as Bourdieu Elias and Barthes who have shaped its development as a field Baghdiantz McCabe approaches the subject through a clear chronological framework Supplemented by illustrations in every chapter and ranging in scope from an analysis of the success of American commodities such as tobacco sugar and chocolate in Europe and Asia to a discussion of the Dutch tulip mania A History of Global Consumption 1500 1800 is the perfect guide for all students interested in the social cultural and economic history of the early modern period [Gold: How it Shaped History](#) Alan Ereira,2024-11-30 Gold is not what we think It is usually discussed in the context of wealth and art but this book has a broader subject so fundamental that it has been largely unremarked Informed by a mass of recent discoveries and a South American indigenous perspective it offers a new way of understanding the history of civilization Gold has been coinage treasure and adornment But it has been much more as the hidden driver of wars and revolutions the rise and fall of empires

and the transformation of societies As the sun traveled east to west across the sky gold incorruptible and corrupting flowed west to east hand to hand across the world That flow has brought empires to grow and collapse and driven plunder conquest and colonization It brought about wars and revolutions empowered new forms of arts and science and created the capitalist consumer economy that dominates us now All the gold people ever shaped still exists shining as new it can be mislaid but never decays Right from its first appearance on the west shore of the Black Sea long before the rise of Egypt and Mesopotamia gold crowned the first proto king Ever since it has been regarded as value incarnate with transcendental power The quantity we take has been increasing steadily for 6 500 years Now extraction accelerates Our gold mountain has doubled in the last fifty years Yet its price increases faster While the quantity doubled its buying power multiplied by six What does gold do that makes us want it so much As Alan Ereira reveals in this skilfully woven narrative gold is the hidden actor that shapes our story

Managing World Order Richard Alqaq, 2009-02-28 Since the end of the Cold War United Nations peace operations have become an established and prominent feature of world politics From Liberia to East Timor the UN now carries out extensive governance related functions and is a significant political force in Southern states and societies Here Richard Al Qaq leads us to a radical new understanding of the UN and its role in international politics He uncovers the political and socio economic import of such peace activities for subject societies and raises important questions about the functioning and dynamics of the global political order A critical view of the internal process of programmatic reform within the UN is elaborated by detailed studies of the politics of UN peace operations in three seminal cases of the 1990s in Somalia Rwanda and Angola This book is essential for understanding the new role of the UN especially in Africa and the politics of so called humanitarian intervention and peace building

India and the Early Modern World Jagjeet Lally, 2023-12-20 *India and the Early Modern World* provides an authoritative and wide ranging survey of the Indian subcontinent over the fifteenth to eighteenth centuries set within a global context This book explores questions critical to our understanding of early modern India How for instance were Indians religious beliefs their ways of life and the horizons of their learning changing over this period What was happening in the countryside and towns to culture and the arts and to the

state and its power Were such experiences comparable or linked to those in other parts of the world Can we speak of a global early modernity therefore within which India played an important role Organised thematically each chapter engages with such key issues debates and concepts covering wide ground as it connects compares and contrasts developments witnessed across early modern South Asia to those around the globe Drawing on the fruits of research in numerous fields over the past fifty years and rich in detail India and the Early Modern World is a pathbreaking volume written engagingly and accessibly with scholars students and non specialists in mind **Heathen** Kathryn Gin Lum,2022-05-17 American ideas about race owe much to the notion of an undifferentiated heathen world held together by its need of assistance This religious notion shaped American racial governance and undergirds American exceptionalism even as purported heathens have drawn on their characterization as such to push back against this national myth Transatlantic Relations and the Great War Kurt Bednar,2021-09-30 Transatlantic Relations and the Great War explores the relations between the Danube Monarchy of Austria Hungary and the modern US democracy and how that relationship developed over decades until it ended in a final rupture As the First World War drew to a close in late 1918 the Mid European Union was created to fill the vacuum in Central and Eastern Europe as the old Danube Monarchy of Austria Hungary was falling apart One year before in December 1917 the United States had declared war on Austria Hungary and overnight huge masses of immigrants from the Habsburg Empire became enemy aliens in the US Offering a major deviation from traditional historiography this book explains how the countdown of mostly diplomatic events in that fatal year 1918 could have taken an alternative course In addition to providing a narrative account of Austrian Hungarian relations with the US in the years leading up to the First World War the author also demonstrates how an almost total ignorance of the affairs of the Dual Monarchy was to be found in the US and vice versa This book is a fascinating and important resource for students and scholars interested in modern European and US history diplomatic relations and war studies Bridges and Boundaries Colin Elman,Miriam Fendius Elman,2001-04-13 Bridges and Boundaries offers a conversation between what might loosely be described as traditionalist diplomatic and military historians and political scientists who employ qualitative case study methods to examine international relations The book opens with a series of chapters discussing differences commonalities and opportunities for cross fertilization between the two disciplines To help focus the dialogue on real events and research the volume then revisits three empirical topics that have been studied at length by members of both disciplines British hegemony in the nineteenth century diplomacy in the interwar period and the causes of World War II and the origins and course of the Cold War For each of these subjects a political scientist a historian and a commentator reflect on how disciplinary guild rules have shaped the study of international events The book closes with incisive overviews by Robert Jervis and Paul W Schroeder Bridges and Boundaries explores how historians and political scientists can learn from one another and illustrates the possibilities that arise when open minded scholars from different disciplines sit down to talk **The Journal of the Engineering Institute of Canada** Engineering
