rheumatologic autoimmune diseases Conversely patients affected with the above mentioned autoimmune disorders are more frequently affected by AITD In this Research Topic constituted by nineteen papers we review and discuss new evidence about the association of other autoimmune diseases in patients with AITD Among other organ specific autoimmune disorders the associations of AITD with chronic autoimmune gastritis Cellini et al vitiligo Baldini E et al lichen Guarnieri et al psoriasis Ruffilli et al myasthenia gravis Lopomo and Berrih Aknin and glomerulopathies Santoro et al have been treated Also the associations of AITD in systemic autoimmune diseases have been treated as Sj gren s syndrome Baldini C et al systemic sclerosis Fallahi et al systemic lupus erythematosus Ferrari et al Antiphospholipid syndrome Versini sarcoidosis Fazzi et al the autoimmune inflammatory syndrome induced by adjuvants Watad et al rheumatoid arthritis Bliddal et al Hepatitis C Virus and mixed cryoglobulinemia Ferri et al and psoriathic arthritis Ruffilli et al Furthermore peculiar aspects associated with post partum thyroiditis have been reviewed too Di Bari et al Le Donne et al The exact pathogenetic mechanisms underlying the above reported associations are not completely known It has been hypothesized that the influence of genetic Copped and environmental factors Antonelli and Benvenga could lead to the onset of autoimmune phenomena in different organs in the same subject characterized by predominance of a Th1 immune pattern at the beginning and in the active phase of these disorders In conclusion an association of other autoimmune diseases in patients with thyroid autoimmunity has been shown and this Research Topic provides an extensive update of the literature and suggests interesting points for new investigations

Diagnostic criteria and methods and treatment are also discussed The overall aim of the volume is to review progress in our pathophysiological understanding of immune mediated CNS disorders in order to advance diagnostic and therapeutic approaches and ultimately improve outcomes for patients
