Christopher Columbus's Naming in the 'diarios' of the Four Voyages (1492-1504) Evelina Guzauskyte, 2014-04-30

In this fascinating book Evelina Guzauskyte uses the names Columbus gave to places in the Caribbean Basin as a way to examine the complex encounter between Europeans and the native inhabitants Guzauskyte challenges the common notion that Columbus's acts of naming were merely an imperial attempt to impose his will on the terrain Instead she argues that they were the result of the collisions between several distinct worlds including the real and mythical geography of the Old World Portuguese and Catalan naming traditions and the knowledge and mapping practices of the Taino inhabitants of the Caribbean Rather than reflecting the Spanish desire for an orderly empire Columbus's collection of place names was fractured and fragmented the product of the explorer's dynamic relationship with the inhabitants nature and geography of the Caribbean Basin To complement Guzauskyte's argument the book also features the first comprehensive list of the more than two hundred Columbian place names that are documented in his diarios and other contemporary sources *The Columbian Exchange* Alfred W. Crosby Jr., 2003-04-30 Thirty years ago Alfred Crosby published a small work that illuminated a simple point that the most important changes brought on by the voyages of Columbus were not social or political but biological in nature The book told the story of how 1492 sparked the movement of organisms both large and small in both directions across the Atlantic This Columbian exchange between the Old World and the New changed the history of our planet drastically and forever The book *The Columbian Exchange* changed the field of history drastically and forever as well It has become one of the foundational works in the burgeoning field of environmental history and it remains one of the canonical texts for the study of world history This 30th anniversary edition of *The Columbian Exchange* includes a new preface from the author reflecting on the book and its creation and a new foreword by J R McNeill that demonstrates how Crosby established a brand new perspective for understanding ecological and social events As the foreword indicates *The Columbian Exchange* remains a vital book a small work that contains within the inspiration for future examinations into what happens when two peoples separated by time and space finally meet

A Historical Geography of Christopher

Columbus's First Voyage and his Interactions with Indigenous Peoples of the Caribbean Al M. Rocca, 2024-05-02

This book offers a unique account of Christopher Columbus's first voyage the most consequential voyage in world history It provides a detailed day by day account of the explorer's travels and activities richly illustrated with thematic maps This work expands our understanding of Columbus's first voyage by mapping his sea and land experiences offering both a historical and geographical exploration of his first voyage Traveling chronologically through events the reader builds a spatial insight into

Columbus's perspectives that confused and confirmed his pre-existing notions of Asia and the Indies driving him onward in search of new geographic evidence. Drawing from a diverse range of primary and secondary historical resources, this book is beautifully adorned with illustrations that facilitate an in-depth exploration of the connections between the places Columbus encountered and his subsequent social interactions with Indigenous people. This methodology allows the reader to better understand Columbus's actions as he analyzes new geographic realities with pre-existing notions of the Indies. Attention is given to Columbian primary sources which analyze how those materials have been used to create a narrative by historians. Readers will learn about the social and political structures of the Lucayan Ta'no and Carib peoples, achieving a deeper understanding of those pre-Columbian cultures at the time of contact. The book will appeal to students and researchers in the disciplines of history, geography, and anthropology, and the general reader interested in Columbus.

Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War Howard W. French, 2021-10-12. Revealing the central yet intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others, the accidental unearthing of the New World. Still others point to the development of the scientific method or the spread of Judeo-Christian beliefs, and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that for *Born in Blackness*, vitally reframing the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe's dehumanizing engagement with the dark continent. In fact, French reveals the first impetus for the Age of Discovery was not, as we are so often told, even today, Europe's yearning for ties with Asia, but rather its centuries-old

desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II Born in Blackness interweaves precise historical detail with poignant personal reportage In so doing it dramatically retrieves the lives of major African historical figures from the unimaginably rich medieval emperors who traded with the Near East and beyond to the Kongo sovereigns who heroically battled seventeenth century European powers to the ex slaves who liberated Haitians from bondage and profoundly altered the course of American history While French cogently demonstrates the centrality of Africa to the rise of the modern world Born in Blackness becomes at the same time a far more significant narrative one that reveals a long concealed history of trivialization and more often elision in depictions of African history throughout the last five hundred years As French shows the achievements of sovereign African nations and their now far flung peoples have time and again been etiolated and deliberately erased from modern history As the West ascended their stories siloed and piecemeal were swept into secluded corners thus setting the stage for the hagiographic rise of the West theories that have endured to this day Capacious and compelling Laurent Dubois Born in Blackness is epic history on the grand scale In the lofty tradition of bold revisionist narratives it reframes the story of gold and tobacco sugar and cotton and of the greatest commodity of them all the twelve million people who were brought in chains from Africa to the New World whose reclaimed lives shed a harsh light on our present world
