Learning from Design Madelon Evers,2004     *Knowledge Management and Management Learning:* Walter R.J. Baets,2005-07-01 Knowledge Management and Management Learning Extending the Horizons of Knowledge Based Management examines a range of topical considerations in the field by utilizing dynamic and non linear systems behavior or the complexity paradigm From this examination have come a number of new and promising relevant extensions to knowledge management and its practice Many of the topics have been pulled from real world situations in actual companies and therefore these topical treatments reflect quantitative and qualitative research done within the knowledge management framework of actual company experience Offered are a series of topical treatments that extend the parameters of knowledge management and examine the practical implications of these extensions The book begins with an extended introduction and theoretical framework The contributing authors have written chapters that add to both the framework and the practical consequences of knowledge management Within this context the book illustrates why and how of knowledge management is important for companies     **Interactivation** Bert Bongers,2006     *Insights in Reinforcement Learning* Hado Philip van Hasselt,2011     **Human Computer Interaction Research in Web Design and Evaluation** Zaphiris, Panayiotis,Kurniawan, Sri,2006-09-30 This is a comprehensive book on Human Computer Interaction and Web design focusing on various areas of research including theories analysis design and evaluation It is not a book on web programming it provides methods derived from research to help develop more user friendly websites It highlights the social and cultural issues in web design for a wider audience Provided by publisher     A framework for evidence-based policy making using IT Hans Rudi Stol,2009     *Facilitating the Development and Use of Interactive Learning Environments* Charles P. Bloom,R. Bowen Loftin,2020-08-26 Intelligent tutoring technology is on the verge of a breakthrough into the mainstream of training and education Over the past 25 years researchers have learned not only what it takes to develop an effective intelligent tutoring system ITS but also what it takes to deploy and use one the true barometer of a technology s success This volume brings together a cross section of ITS researchers from academia industry and the government to talk about their experiences in ITS development and technology transfer both successful and unsuccessful Section 1 is devoted to detailed descriptions of tools and methods ITS developers can employ during development to facilitate technology adoption It includes discussions of the paradigmatic change in learning and instructional design that ITS fosters techniques for gathering design information for ITS domains where empirical or knowledge based methods are inappropriate and the conduct of cost benefits analyses to facilitate ITS funding decisions Sections 2 and 3 offer numerous case studies of ITS deployment from both industry and the government All of these case studies regardless of outcome provide valuable insights into the dos and don ts of ITS technology transfer This volume will be an invaluable resource for all researchers and developers of ITS as well as for managers and personnel in education and training organizations who must adopt and use ITS technology and information

systems and computing support organization professionals who must support it if it is to succeed    Reconciling Information Exchange and Confidentiality — A Formal Approach Wouter Gerard Teepe,2007 Het thema van de bescherming van persoonsgegevens is actueler dan ooit Een paradoxale eigenschap van persoonsgegevens is dat zowel het geheim houden als het uitwisselen ervan gedaan kan worden onder het argument van veiligheid Het geheim houden van persoonsgegevens verhoogt veiligheid doordat deze gegevens niet misbruikt kunnen worden Het uitwisselen van persoonsgegevens verhoogt veiligheid omdat het opsporingsdiensten helpt criminelen en terroristen te vangen Zowel de argumenten voor het geheim houden van gegevens als die voor het uitwisselen van gegevens zijn valide Het probleem is helder het uitwisselen van gegevens en het geheim houden van gegevens lijkt niet of althans moeilijk samen te kunnen gaan Dit is niet alleen een probleem in de discussie tussen de voorvechters van privacy en de voorstanders van verregaande opsporingsbevoegdheden Ook opsporingsdiensten zelf worstelen met het spanningsveld van uitwisseling versus geheimhouding het is makkelijker een subject bijvoorbeeld een verdachte in de gaten te houden als hij of zij daar niet op beducht is Wanneer het subject weet dat hij onderwerp van onderzoek is kan hij of zij bijvoorbeeld mogelijk bezwarende bewijzen vernietigen Hoe meer mensen binnen een opsporingsorganisatie weet hebben van een lopend onderzoek hoe groter de kans is dat er gelekt wordt naar het subject Aan de andere kant hoe meer mensen binnen opsporingsdienst weet hebben van een lopend onderzoek hoe meer mensen kunnen meehelpen met dat onderzoek Het hoofddoel van dit proefschift is om te onderzoeken of het mogelijk is om oplossingen voor dit spanningsveld te vinden De resultaten van het onderzoek zijn van fundamentele en praktische waarde Aan de fundamentele kant laten we zien dat een een aantal problemen berhaupt oplosbaar is Aan de praktische kant laten we zien dat deze oplossingen niet slechts theoretisch zijn maar ook zonder al te veel problemen kunnen worden toegepast om bestaande praktische problemen op te    **Applying Architecture and Ontology to the Splitting and Allying of Enterprises** Martinus Op 't Land,2008    *Legal Theory, Sources of Law and the Semantic Web* Alexander Boer,2009 Attempts to construct an integrated conceptual framework for the application neutral and problem neutral representation of sources of law using Semantic Web technology and concepts and some technically straightforward extensions to Semantic Web technology based on established practices found in fielded applications    **New Perspectives on Religious and Spiritual Education** Theo van der Zee,Terence J. Lovat,2012 Society is a complex phenomenon characterized by constant change often entailing conflict This is seen in our own times where philosophies and movements of individualism pluralism and globalization intersect and often collide Still even in this fast moving and highly materialist world religion and spirituality remain crucial aspects of human and social living and therefore must be among the many focusses of the modern school Teachers of Religious and Spiritual Education RSE are therefore expected to support students religious and spiritual understanding as well as their overall development How can they best meet this challenge This book is comprised of various interdisciplinary research findings drawn from international scholarship The findings are of a different order from each other

but all have in common an element of surprise sufficient to impel reflection and re thinking of many of the assumptions that normally underpin RSE The book therefore constitutes a contribution to ongoing understanding of the role played by religious and spiritual education and of the proper interface between RSE and the modern school contemporary curricula and the teacher of today Contributions by Robert Crotty Ola Erik Domaas Michael Fricke Liam Gearon Adrian Mario Gellel Eija Hanhimaki Laura Hirsto Tapani Innanen Terence Lovat Klaas Macha Emanuel P Magro Adil Mamodaly Fritz Oser Ulrich Riegel Inkeri Rissanen Sturla Sagberg Kirsi Tirri Theo van der Zee Karen Wenell **Digital Tools and Solutions for Inquiry-Based STEM Learning** Levin, Ilya,Tsybulsky, Dina,2017-03-31 In the digital age the integration of technology has become a ubiquitous aspect of modern society These advancements have significantly enhanced the field of education allowing students to receive a better learning experience Digital Tools and Solutions for Inquiry Based STEM Learning is a comprehensive source of scholarly material on the transformation of science education classrooms through the application of technology Including numerous perspectives on topics such as instructional design social media and scientific argumentation this book is ideally designed for educators graduate students professionals academics and practitioners interested in the latest developments in the field of STEM education *Digitally Transformed Education: Are We There Yet?* Margaret Leahy,Christophe Reffay,2025-05-30 This book constitutes the refereed post conference proceedings of the 4th IFIP TC 3 Open Conference on Computers in Education OCCE 2024 held in Bournemouth UK during February 27 March 1 2024 The 22 full papers and 3 short papers included in this volume were carefully reviewed and selected from 72 submissions They were organized in topical sections as follows Digital Education in Schools Higher Education and Communities Computing Education in Schools and Higher Education and Contributions of IFIP TC3 to Digital Education ECGBL2009- 4th European Conference on Games-Based Learning Bente Meyer,2010-12-01 **The Routledge Companion to Paradigms of Performativity in Design and Architecture** Mitra Kanaani,2019-12-06 The Routledge Companion to Paradigms of Performativity in Design and Architecture focuses on a non linear multilateral ethical way of design thinking positioning the design process as a journey It expands on the multiple facets and paradigms of performative design thinking as an emerging trend in design methodology This edited collection explores the meaning of performativity by examining its relevance in conjunction with three fundamental principles firmness commodity and delight The scope and broader meaning of performativity performative architecture and performance based building design are discussed in terms of how they influence today s design thinking With contributions from 44 expert practitioners educators and researchers this volume engages theory history technology and the human aspects of performative design thinking and its implications for the future of design *Animals, Ethics, and Engineering* Rosalyn W. towards an equitable and sustainable world the talents of design and critical thought are essential Featured case studies include graphic design internships today the dark web and media coverage of the 2016 US presidential election The fact that within this book such a wide array of practitioners scholars critics and professionals commit to addressing current injustices is already a positive sign Nonetheless it is essential that we guard against confusing the coercive force of moral imperatives with ethical deliberation when conceiving a foundation for action
