**The Learning Society** Elisabeth Dunne, 2014-05-12 This text provides perspectives in British and international interpretations of a learning society and what the roles of core skills are The book covers what should be happening in theory and what is happening in practice and develops a critical awareness of the issues **Inside the Learning Society** Stewart Ranson, 1998-11-01 As an approach to the diverse and shifting learning needs of today the learning society labours under a definitional generosity which has led to three different models evolving with competing claims This book traces the history of the concept and lucidly lays out these three interpretive models learning for work learning for citizenship and learning for democracy The book's close scrutiny concludes with an analysis that synthesizes and sharpens our understanding of the learning society With due consideration given to the emerging critique and with chapters from public bodies engaged in implementing learning society principles Inside the Learning Society offers a comprehensive appraisal of ideas and practices This is a book of great significance for anyone concerned about or involved in the future of education **The Learning Society in a Postmodern World** Kenneth Wain, 2004 Lifelong learning has become a key concern as the focus of educational policy has shifted from mass schooling toward the learning society The shift started in the mid 1960s and early 1970s under the impetus of a group of writers and adult educators gravitating around UNESCO with a humanist philosophy

and a leftist agenda The vocabulary of that movement was appropriated in the 1990s by other interests with a very different performativist agenda emphasizing effectiveness and economic outcomes This change of interest described in the book has signified the death of education The Learning Society in a Postmodern World explores different theoretical resources to respond to this situation mainly those that propose some restoration of an educated public or to the contrary individual self creation and uses the works of a broad range of philosophers and thinkers notably MacIntyre Habermas Foucault Derrida Rorty and Baudrillard In addition it raises important questions about postmodern and poststructuralist responses to education in the postmodern world Its comprehensiveness and historical background make it an essential textbook for theoretical courses in lifelong learning and in educational theory in general A broad range of interests and subject matter make it important reading for educators policy specialists media specialists researchers on the subject of lifelong learning and on the relation between education and the postmodern world political theorists philosophers and philosophers of education
