## **Learning To Labor In New Times:**

Learning to Labor in New Times Nadine Dolby,Greg Dimitriadis,Paul E. Willis,2004 In this book an internationally renowned group of scholars reflects on the meaning and influence of what many consider to be the most influential book in critical education and critical cultural studies in the past three decades Learning to **Learning to Labor in New Times** Nadine Dolby,Greg Dimitriadis,2013-01-11 Learning to Labor in New Times foregrounds nine essays which re examine the work of noted sociologist Paul Willis 25 years after the publication of his seminal Learning to Labor one of the most frequently cited and assigned texts in the cultural studies and social foundations of education Youth Resistance Research and Theories of Change Eve Tuck,K. Wayne Yang,2013-11-26 Youth resistance has become a pressing global phenomenon to which many educators and researchers have looked for inspiration and or with chagrin Although the topic of much discussion and debate it remains dramatically under theorized particularly in terms of theories of change Resistance has been a prominent concern of educational research for several decades yet understandings of youth resistance frequently lack complexity often seize upon convenient examples to confirm entrenched ideas about social change and overly regulate what counts as progress As this comprehensive volume illustrates understanding and researching youth resistance requires much more than a one dimensional theory Youth Resistance Research and Theories of Change provides readers with new ways to see and engage youth resistance to educational injustices This volume features interviews with prominent theorists including Signithia Fordham James C Scott Michelle Fine Robin D G Kelley Gerald Vizenor and Pedro Noguera reflecting on their own work in light of contemporary uprisings neoliberal crises and the impact of new technologies globally Chapters presenting new studies in youth resistance exemplify approaches which move beyond calcified theories of resistance Essays on needed interventions to youth resistance research provide guidance for further study As a whole this rich volume challenges current thinking on resistance and extends new trajectories for research collaboration and justice *International Handbook of Urban Education* William T. Pink,George W. Noblit,2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in

terms of resources political will and policy actions to improve urban education

*Identity, Neoliberalism and Aspiration* Garth Stahl, 2015-01-09 In recent years

there has been growing concern over the pervasive disparities in academic achievement that are highly influenced by ethnicity class and gender Specifically within the neoliberal policy rhetoric there has been concern over underachievement of working class young males specifically white working class boys The historic persistence of this pattern and the ominous implication of these trends on the long term life chances of white working class boys has led to a growing chorus that something must be done to intervene This book provides an in depth sociological study exploring the subjectivities within the neoliberal ideology of the school environment in order to expand our understanding of white working class disengagement with education The chapters discuss how white working class boys in three educational sites enact social and learner identities focusing on the practices of meaning making and identity work that the boys experienced and the disjunctures and commonalities between them The book presents an analysis of the varying tensions influencing the identity of each boy and the consequences of these pressures on their engagement with education Drawing on Bourdieu s theoretical tools and a model of egalitarian habitus Identity Neoliberalism and Aspiration Educating white working class boys will be of interest to academics researchers and postgraduate students in the field of sociology of education and those from related disciplines studying class and gender

**Class Construction** , Class Reunion Lois Weis,2005-01-15 Noted scholar Lois Weis first visited the town of Freeway in her 1990 book Working Class Without Work In that book we met the students and teachers of Freeway s high school to understand how these working class folks made sense of their lives Now fifteen years later Weis has gone back to Freeway for Class Reunion This time her focus is on the now grown up students who are for the most part still working class and now struggling to survive the challenges of the global economy Class Reunion is a rare and valuable longitudinal ethnographic study that provides powerful provocative insight into how the lives of these men and women have changed over the last two decades and what their prospects might be for the future

Cutting Class Joe L. Kincheloe,Shirley R. Steinberg,2007-07-12 In these vivid thought provoking essays leading scholars draw from their own life experiences to explore the ways in which socio economic class has shaped their lives and educational practices Some experienced the sting of poverty as students while others tell stories of a privileged upbringing and moments of epiphany when they recognized the far reaching effects of class privilege Many in this volume tell stories of their successful and not so successful teaching experiences with students from various social classes providing valuable insights for teachers and other education professionals

**Working-Class Boys and Educational Success** Nicola Ingram,2018-05-15 This book examines the complex relationship between working class masculinities and educational success Drawing on a small sample of young men attending either a selective grammar or a secondary school in the same urban area of Belfast the author demonstrates that contrary to popular belief some working class boys are engaged with education are motivated to succeed and have high aspirations However the structures of schooling in a society where working class ness is seen as feckless tasteless and cultureless make the processes of becoming successful more challenging than they need to be This volume reveals the unique processes of reconciling success and

identities for individual working class boys and the important role schools have to play in this negotiation Highly relevant to those engaged in teacher training in socially unequal societies this book will also appeal to practitioners sociologists of education scholars of social justice and Bourdieusian theorists     *Precarious Enterprise on the Margins* Jessica Gerrard,2017-07-21 This book explores the contemporary conditions of marginal work within the context of persistent unemployment poverty and homelessness in wealthy nations Drawing from research concerning three cities Melbourne San Francisco and London Jessica Gerrard offers a rich account of one of the most precarious informal forms of work selling homeless street press The Big Issue and Street Sheet Combining analyses of sellers everyday work experiences with theorizations of marginality working and learning Gerrard provides much needed insight into contemporary forms of entrepreneurial and precarious work This book demonstrates that those who are unemployed and seemingly unproductive are in fact highly productive They value desire and seek practical work experience whilst also struggling to fulfill the basic needs that many of us take for granted     **Globalization, Critique and Social Theory** Harry F. Dahms,2015-11-16 In recent years under the impression and the burden of globalization and neoliberalism debates about the relationship between the theory and practice of progress including the theory and practice of social critique have gone through an unexpected and momentous revival renewal and rejuvenation     Laboring to Learn Lorna Rivera,2024-04-22 The American adult education system has become an alternative for school dropouts with some state welfare policies requiring teen mothers and women without high school diplomas to participate in adult education programs to receive aid Currently low income women of color are more likely to be enrolled in the lowest levels of adult basic education Very little has been published about women s experiences in these mandatory programs and whether the programs reproduce the conditions that forced women to drop out in the first place Lorna Rivera bridges the gap with this important study the product of ten years active ethnographic research with formerly homeless women who participated in adult literacy education classes before and after welfare reform She draws on rich interviews with organizers and participants in the Adult Learners Program at Project Hope a women s shelter and community development organization in Boston s Dudley neighborhood one of the poorest in the city Analyzing the web of ideological contradictions regarding work first welfare reform policies Rivera argues that poverty is produced and reproduced when women with low literacy skills are pushed into welfare to work programs and denied education She examines how various discourses about individual choice and self sufficiency shape the purposes of literacy how low income women express a sense of personal responsibility for being poor and how neoliberal ideologies and practices compromise the goals of critical literacy programs Throughout this study the voices and experiences of formerly homeless women challenge cultural stereotypes about poor women showing in personal and structural terms how social and economic forces shape and restrict opportunities for low income women of color     **Class in Education: Knowledge,, Pedagogy,, Subjectivity** Deborah Kelsh,Dave Hill,Sheila Macrine,2009-09-10 Class in Education argues for a materialist understanding of class in
