Learning Twice:

Teaching Literacies in Diverse Contexts Sinéad Harmey, Bobbie Kabuto, 2023-04-24 Literacy education can take place in many locations and periods across the lifespan Literacy educators require flexibility and a deep toolbox to meet their students diverse needs regardless of whether they work in traditional school and college settings or in other environments with varied populations Teaching Literacy in Diverse Contexts shows how practical experiences can be used in creative ways to support educator development for teaching literacy in a global context Mentorship between a developing literacy educator and an experienced teacher educator is central to the book and to the practical experiences in training or professional development that it focuses on Chapters share the creative solutions discovered during mentorship that supported developing literacy educators to teach with authenticity in a number of contexts including the adult learning sector a rural community in Africa and alongside parents of very sick children The authors demonstrate how this can be done in a sensitive and culturally relevant manner by parents volunteers and teachers with varying degrees of experience in both formal and informal spaces Together the chapters build a crucial resource for preparing a broad range of literacy educators to teach literacy in many contexts where policy on how best to teach reading and writing to diverse student bodies ebbs and flows

Twice-Exceptional Boys Deborah Gennarelli, 2022-10-01 What happens in schools to children who are 2e Too often schools place focus on the disability and ignore the giftedness Because true abilities are not addressed and such children are placed with other educationally disabled children the gifted child loses the joy of learning The light goes out of his eyes While gifted girls are more likely to dumb down to fit in or withdraw into depression particularly if they are 2e and some boys may do the same more often the 2e boys develop behavior problems where they act out dramatically underachieve and engage in risky behaviors because they are frustrated and angry that their learning is stymied Some of these very bright young men may even end up in the juvenile justice system definitely the wrong environment for them As schools in the United States have swung toward an emphasis on science technology engineering and math STEM education the educational literature has taken a swing toward gender fairness as it relates to these fields Recent discussions include the fact that girls and women are underrepresented in STEM advanced coursework college degree programs and careers Because the discussions often focus on the reasons girls are excluded or why they sometimes exclude themselves from these endeavors boys are rarely mentioned The focus on girls has taken attention away from the fact that boys are experiencing equally troubling issues in school sometimes more so than girls According to the 2019 Digest of Education Statistics by the National Center for Education boys Were more likely to receive an out of school suspension Were expelled 2 1 2 times more than girls Were more likely to use illicit drugs Were twice as likely to be in a fight at school These inequalities also cross racial boundaries and appear to be more dramatic for minority boys Black boys were threatened or injured with a weapon at school more often than White boys Twice as many Black boys were expelled from school as compared to White boys Boys from minority and low

Giftedness, Creativity, and Talent Barbara Kerr, 2009-06-15 Library Journal Best Reference 2009 Educators have begun to recognize that identifying and accommodating students who are slower to learn may leave behind those who learn rapidly and think creatively The nature of intelligence the sources of innovation and the ways to nurture special abilities are now topics of great interest to scholars in a wide variety of disciplines and to the general public Policymakers ranging from school board members to leaders of nations must also make practical decisions about how communities and societies will treat their brightest most promising students With more than 400 entries these two volumes review research findings on giftedness talent and creativity and their effect on education training science and the arts government policy and everyday life The Encyclopedia of Giftedness Creativity and Talent provides a balanced objective assessment of the various perspectives on the nature of intelligence innovation and optimal states This state of the art resource covers all major facets of the field including achievement motivation artistic ability creative personality emotional intelligence gender differences genius intelligence testing learning styles minority underrepresentation multiple intelligences musical ability prodigies scientists self actualization thinking skills and more Key Themes Assessment and Identification Creativity Studies Cultural Issues Education Eminent People Exceptionalities Intelligence Neuroscience and Genetics Populations Programs and Interventions Psychological Issues Talent Domains Theories and Models Key Features Provides a balanced and critical discussion of the controversies that have animated research and theory making Clarifies which grouping and instructional strategies promote

the best outcomes in achievement and social emotional development of gifted children Helps educators make informed decisions about the identification strategies and the curriculum models that best meet their students needs Contains thousands of pertinent facts from the fields of education psychology sociology and the arts Evaluates policies that have hindered gifted children and makes a persuasive case for appropriately challenging and differentiated education Examines how giftedness creativity and talent were defined in the past and how current meanings have emerged *Literacy, Storytelling and Bilingualism in Asian Classrooms* Alice Honig, 2017-10-02 Contrary to previously held beliefs that bilingualism would hinder cognitive and language development in children research has shown that bilingual children show enhanced cognitive flexibility and an ability to better focus their attention This book explores both emergent literacy and bilingualism in children in four Asian countries Hong Kong Singapore Myanmar and Taiwan giving specific examples of how adults including parents teachers and other education professionals can use creative interaction as opposed to rote learning to increase children's interest in learning English as a second language This is especially important in the increasingly computer connected world where innovation can be key in making second language learning both interesting and effective Specific contributions to this volume include a case study of Taiwanese families analyzing home videos of their children's responses to the task of reading a Mandarin picture book of vocabulary instruction in Hong Kong which requires children to gain triple language proficiency Cantonese English and Mandarin of the relation between Cantonese proficiency amongst 5 year olds in Hong Kong and their receptiveness to learning new English vocabulary of the relation between English reading ability and Mandarin speaking ability amongst Singaporean children of the importance of teachers sensitivity to gender differences among 6 year olds in Singapore learning English as a second language of the active promotion of storytelling by teachers in Myanmar in order to develop children's interest in story structure and to stimulate early language skills and of an emphasis on family based emergent literacy activities for children in Taiwan This book was originally published as a special issue of *Early Child Development and Care* **Fear of God and the Beginning of Wisdom** Adam H. Becker, 2013-11-14 The School of Nisibis was the main intellectual center of the Church of the East in the sixth and early seventh centuries C E and an institution of learning unprecedented in antiquity *Fear of God and the Beginning of Wisdom* provides a history both of the School and of the scholastic culture of the Church of the East more generally in the late antique and early Islamic periods Adam H Becker examines the ideological and intellectual backgrounds of the school movement and reassesses the evidence for the supposed predecessor of the School of Nisibis the famed School of the Persians of Edessa Furthermore he argues that the East Syrian Nestorian school movement is better understood as an integral and at times contested part of the broader spectrum of East Syrian monasticism Becker examines the East Syrian culture of ritualized learning which flourished at the same time and in the same place as the famed Babylonian Rabbinic academies Jews and Christians in Mesopotamia developed similar institutions aimed at inculcating an identity in young males that defined them as beings endowed by their

creator with the capacity to study The East Syrian schools are the most significant contemporary intellectual institutions immediately comparable to the Rabbinic academies even as they served as the conduit for the transmission of Greek philosophical texts and ideas to Muslims in the early Abbasid period Developing the Physical Education Curriculum Luke E. Kelly, Vincent J. Melograno, 2014-12-10 This book presents a breakthrough achievement based curriculum ABC model designed to guide physical educators step by step through the process of translating curriculum theory into functional practice The ABC approach provides curriculum designers with a systematic decision making process for developing a curriculum that addresses unique and diverse needs And it allows designers to incorporate national state and local content and assessment standards in their curricula The book takes teachers through every phase of curriculum design foundational understanding of design development implementation and evaluation Further it shows teachers how to document that their curriculum is working a valuable asset in an era of budget cuts Other outstanding features include Opening Scenario Expected Outcomes and Making It Work special elements in each chapter to help future teachers understand how to apply the book's content in school settings instruction on implementing the curriculum and sharing it with others strategies for planning implementing and evaluating a curriculum and establishing credibility for it emphasis on student achievement as an indicator of a quality physical education program forms and worksheets completed examples and blanks that give future teachers a hands on approach to developing assessing and revising a curriculum Advances in Smart Computing and Applications Rajkumar Buyya, Savita Gandhi, Nirbhay Chaubey, Harshal Arolkar, Perna Agrawal, 2025-08-14 This book constitutes the refereed proceedings of the 1st International Conference on Advances in Smart Computing and Applications ICASCA 2025 held in Ahmedabad India during February 15-16 2025 The 25 full papers were presented in this volume were carefully reviewed and selected from 112 submissions They focus on Machine Learning Deep Learning Transfer Learning Neural Computing Artificial Intelligence Reinforcement Learning Recommendation systems Soft computing Intelligent Systems Pattern Recognition Natural Language Processing Big Data Analytics Networks Text Mining Web Mining Data Streams Image Processing Distributed Databases Block Chain **Reconstituting the Curriculum** M. R. Islam, Gary M. Zatzman, Jaan S. Islam, 2013-11-13 Based on groundbreaking new ideas this treatise signals a return to a rebuilding and reshaping of the curriculum as the primary tool for education This book presents a new definition of curriculum and what it should consist of with a view toward creating a more ethical educated and thinking person Rather than treating students as products for society this approach returns to a view of the curriculum as a tool for educating students to reason through problems be bold in creating new solutions and contribute to a more vibrant just world The university curriculum introduced in the post Renaissance era dominated by doctrinal philosophy is based on learning or skill development suitable for creating a learned society that would eventually serve the establishment This curriculum has been promoted as the only form suitable for the modern education system It has introduced a tremendous amount of tangible advancement in all fields of the

structured education system These tangible gains are often promoted as knowledge This has created confusion between education acquiring knowledge and learning training or skill development This book seeks to clarify the difference between these two divergent views of education It has been shown that the current curriculum is not conducive to increasing a student's knowledge because it is based on consolidating preconceived ideas that have been either passed on from previous generations or gained through personal experience In most cases this mode of cognition will not create a pathway for gaining knowledge that brings one closer to discovery The term education on the other hand is always meant to be a process of bringing forth one's inherent qualities and unique traits necessary and sufficient for increasing one's knowledge
