Learning Disabilities Abistive Technology 2nd Pb 1999:

Adult Learning Disorders Lorraine E. Wolf, Hope E. Schreiber, Jeanette Wasserstein, 2010-10-18 Recent advances in neuroimaging and genetics technologies have enhanced our understanding of neurodevelopmental disorders in adults. The authors in this volume not only discuss such advances as they apply to adults with learning disorders but also address their translation into clinical practice. One cluster of chapters addresses developmental concerns as children and adolescents with learning disorders approach young adulthood. Experts discuss dyslexia, language-based and writing disorders, perhaps the most widely studied group of learning disorders from the point of view of neuroimaging and genetic underpinnings. Chapters on the neuroscience of nonverbal math and executive function disorders are also included. Clinically oriented chapters with case studies, recommendations for accommodation, and considerations for evaluation follow. Study of specialized populations such as late high school students, college medical and law students further demonstrate how our expanded knowledge base may be applicable to clinical practice. The heterogeneity of adults with learning disorders, the complexity of their clinical presentation, and co-existing disorders are addressed from both a scientific and clinical point of view, demonstrating how empirical research and clinical practice inform each other. This volume will enhance the practice of clinicians and educators working with adults with neurodevelopmental disorders as well as providing essential current information for researchers of adults with learning disorders.

Sustaining Mobile Learning Wan Ng, Therese M. Cumming, 2015-07-16 Mobile technologies are one of the fastest growing areas of technology in education. For learners, they offer an appealing opportunity to transcend teacher-defined knowledge and approaches by being able to access multiple alternative sources of information anytime and anywhere. While the pace of engagement with and research into the educational applications of mobile technologies has picked up dramatically in the last decade, there is no consolidated view of how to sustain the practices or opportunities that are being explored. Sustainability is a complex but crucial issue in mobile learning as educational institutions are usually required to make substantial investments in mobile devices and associated technologies, time, and training to initiate mobile learning programs. The complexity of sustainable mobile learning programs is further exacerbated by the fast pace of change of digital technologies, where with every change new possibilities are opened up and investments required. In addition, educators are still attempting to reconcile institutions of formal education with informal mobile learning. The book addresses these issues with a particular focus on exploring the challenges surrounding the sustainability of mobile learning in K-12 and higher education, investigating the importance of sustaining mobile learning for diverse populations of students globally, discussing theoretical models for the sustainability of mobile learning, providing the reader with strategies for sustaining mobile learning. Presenting new research alongside theoretical models and ideas for practice, the book will appeal to researchers, academics, and postgraduate students in the fields of education and mobile learning as well as those working in teacher education.

Play development in children with disabilities Serenella Besio,Daniela Bulgarelli,Vaska Stancheva-Popkostadinova,2016-01-01 This book is the result of the first two year work of Working Group 1 of the network LUDI Play for children with disabilities LUDI is an Action 2014 2018 financed by COST it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the International Classification of Functioning Disability and Health WHO 2001 The principal objective of this book is to bring the LUDI contribution to the important topic of play in children with disabilities because today an international consensus on the definition of play and disabilities is still lacking The process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions to approach this topic through a common language at least all over Europe to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities to grant this topic the status of a scientific and social theme of full visibility and recognized authority Children with disabilities face several limitations in play due to several reasons impairments playgrounds toys and other play tools that are not accessible and usable environments and contexts that are not accessible nor inclusive lack of educational awareness and intentionality lack of specific psycho pedagogical and rehabilitative competence lack of effective intervention methodologies Moreover disabled children s lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement play for the sake of play is considered a waste of time The concept of play for the sake of play strongly refers to the distinction between play activities and play like activities Play activities are initiated and carried out by the player alone with peers with adults etc for the only purpose of play itself fun and joy interest and challenge love of race and competition ilinx and dizziness etc They have of course consequences on growth and development but these consequences are not intentionally pursued Play like activities are initiated and conducted by an adult with one or more children in educational clinical social contexts they are playful and pleasant but their main objective is other than play e g cognitive learning social learning functional rehabilitation child s observation and assessment psychological support psychotherapy etc This book then contributes to a clear distinction between play and play like activities that hopefully will bring to new developments in play studies
