## **Learning From The Links Mastering Management Using Lessons From Golf:**

**Learning From the Links** David K. Hurst, 2010-05-11 For the first time a seasoned business executive and avid golfer combines these two passions to explore what makes for top performance in each field Management consultant David K Hurst explores compelling links relating the two activities to explain clearly what every manager who plays golf may feel only intuitively that there is a deep systemic connection between them For on the tee as in the boardroom a player can't just hit and hope he or she must continually think ahead contemplate multiple scenarios and consider the downside of every decision And then everything depends on execution In Learning from the Links Hurst clarifies muddled thinking in both management and golf he deals squarely with the challenge of implementing a game plan and seeing it through Hurst takes to task the current head down instructional model used to teach golf and management He addresses the huge gulf between knowing what to do in a given situation and knowing how to do it This chasm is an ever present hazard both on the course and in an organization it keeps people from solving their problems and achieving their goals By examining golfers and managers struggles for improvement Hurst shows us why complex systems are so hard to change and how to set about changing them systematically Using the latest thinking from fields as diverse as neuroscience artificial intelligence art and anthropology Hurst's primary purpose is to help his readers make sense of their own experience to help them learn more effectively His practical advice is profusely illustrated with examples from both golf and management allowing the reader to move back and forth between his or her experiences in both activities Part business management book part strategy guide these are more than just lessons for one's game or one's office these are lessons for life *The New Ecology of Leadership* David K. Hurst, 2014-10-07 David Hurst has a unique knowledge of organizations their function and their failure both in theory and in practice He has spent twenty five years as an operating manager often in crises and turnaround conditions and is also a widely experienced consultant teacher and writer on business This book is his innovative integration of management practice and theory using a systems perspective and analogies drawn from nature to illustrate groundbreaking ideas and their practical application It is designed for readers unfamiliar with sophisticated management concepts and for active practitioners seeking to advance their management and leadership skills Hurst's objective is to help readers make meaning from their own management experience and education and to encourage improvement in their practical judgment and wisdom His approach takes an expansive view of organizations connecting their development to humankind's evolutionary heritage and cultural history It locates the origins of organizations in communities of trust and follows their development and maturation He also crucially tracks the decline of organizations as they age and shows how their strengths become weaknesses in changing circumstances Hurst's core argument is that the human mind is rational in an ecological rather than a logical sense In other words it has evolved to extract cues to action from the specific situations in which it finds itself Therefore contexts matter and Hurst shows how passion reason and power can be used to change and sustain organizations

for good and ill The result is an inspirational synthesis of management theory and practice that will resonate with every reader's experience *The Publishers Weekly*, 2002 *The British National Bibliography* Arthur James Wells, 2005

**Strategy & Business**, 2008 *Führungssysteme zwischen Stabilität und Wandel* Jörg Siebert, 2008-05-13 Jörg Siebert untersucht welchen Beitrag Führungssysteme zu Stabilität und Wandel leisten Es wird deutlich dass sie sowohl stabilisieren und damit Ordnung stiften als auch den Wandel fördern und damit die Agilität einer Organisation steigern können
