was hailed as a welcome addition to the literature on music education because it serves to provide definition and unity to a broad and complex field. This new companion volume again with the sponsorship of MENC explores the significant changes in music and arts education that have taken place in the last decade. Notably several chapters now incorporate insights from other fields to shed light on multi cultural music education, gender issues in music education and non musical outcomes of music education. Other chapters offer practical information on maintaining musicians health, training music teachers and evaluating music education programs. Philosophical issues such as musical cognition, the philosophy of research, theory, curriculum and educating musically are also explored in relationship to policy issues. In addition to surveying the literature, each chapter considers the significance of the research and provides suggestions for future study. Covering a broad range of topics and addressing the issues of music education at all age levels from early childhood to motivation and self regulation, this handbook is an invaluable resource for music teachers, researchers and scholars.

Ethnomusicological Encounters with Music and Musicians Timothy Rice, 2016-04-22. Designed as a tribute to Robert Garfias who has conducted field work in more cultures than any other living ethnomusicologist, this volume explores the originating encounter in field work of ethnomusicologists with the musicians and musical traditions they study. The nineteen contributors provide case studies from nearly every corner of the world including biographies of important musicians from the Philippines, Turkey, Lapland and Korea, interviews with and reports of learning from musicians from Ireland, Bulgaria, Burma and India, and analyses of how traditional musicians adapt to the encounter with modernity in Japan, India, China, Turkey, Afghanistan, Morocco and the United States. The book also provides a window into the history of ethnomusicology since all the contributors have had a relationship with the University of Washington, home to one of the oldest programs in ethnomusicology in the United States. Inspired by the example of Robert Garfias, they are all indefatigable field researchers and among the leading authorities in the world on their particular musical cultures. The contributions illustrate the core similarities in their approach to the discipline of ethnomusicology and at the same time deal with a remarkably wide range of perspectives, themes, issues and theoretical questions. Readers should find this collection of essays a fascinating, indeed surprising glimpse into an important aspect of the history of ethnomusicology.
