Identifying networked flow as the key driver of networked creativity this new volume in the Springer Briefs series deploys concepts from a range of sub disciplines in psychology to suggest ways of optimizing the innovative potential of creative networks In their analysis of how to support these networks the contributing authors apply expertise in experimental social cultural and educational psychology They show how developing a creative network requires the establishment of an optimal group experience in which individual intentions inform and guide collective goals The volume represents a three fold achievement It develops a ground breaking new perspective on group creativity the notion of networked flow as a bridging concept linking the neuropsychological psychological and social levels of the creative process In addition the authors set out a six stage model that provides researchers with a methodological framework also by referring to the social network analysis for studying the creativity traditionally associated with interpersonal contexts Finally the book includes perceptive analysis of the novel possibilities opened up by second generation internet technologies particularly in social networking that seem destined to develop and sustain online creativity As a wide ranging exposition of a new direction in theoretical psychology that is laden with exciting possibilities this volume will inform and inspire professionals scholars and students alike

**Thinking Through Creativity and Culture** Vlad Petre Glaveanu, 2017-07-28 Creativity and culture are inherently linked Society and culture are part and parcel of creativity s process outcome and subjective experience Equally creativity does not reside in the individual independent of culture and society Vlad Petre Glveanu s basic framework includes creators and community from which new artifacts emerge and existing artifacts are developed He points to a relationship between self and other new and old specific for every creative act Using this multifaceted system requires that researchers employ ecological research in order to capture the heterogeneity and social dimensions of creativity Glveanu uses an approach based on cultural psychology to present creativity in lay terms and within everyday settings He concludes with a unitary cultural framework of creativity interrelating actors audiences actions artifacts and affordances      [A Dialectical Pedagogy of Revolt](#)

Brecht De Smet, 2015-01-27 In [A Dialectical Pedagogy of Revolt](#) Brecht De Smet offers an intellectual dialogue between the political theory of Italian Marxist Antonio Gramsci and the cultural psychology of Soviet thinker Lev Vygotsky within the framework of the Egyptian 25 January Revolution Their encounter affirms the enduring need for a coherent theory of the revolutionary subject in the era of global capitalism based on a political pedagogy of subaltern hegemony solidarity and reciprocal education Investigating the political and economic lineages and outcomes of the mass uprising of Tahrir Square De Smet discusses the emancipatory achievements and hegemonic failures of the Egyptian workers and civil democratic movements from the perspective of their inability to construct a genuine dialectical pedagogy      *Handbook of Research on Transformative Online Education and Liberation: Models for Social Equality* Kurubacak, Gulsun, Yuzer, T. Expertise, Communication, and Organizing Jeffrey W. Treem, Paul M. Leonardi, 2016-09-05 Expertise is an intriguing construct Though it is highly desired it is commonly characterized by exclusivity or being something esoteric making it both seemingly difficult to acquire and understand This opaqueness surrounding the nature of expertise in organizational contexts is coupled with greater demands for specialized work and employees increased reliance on communication technologies to complete tasks trends that further complicate the evaluation of workers knowledge and abilities This volume draws upon original works from scholars of diverse backgrounds to explore how recent changes in the structure of organizational life have altered the nature of expertise Specifically this book aims to challenge the perspective that organizational expertise exists to be recognized and utilized and offers an alternative lens that views expertise as emergent and constituted in communication among organizing actors Examining the intersection of communication and expertise within and across different contexts of organizing offers new insights into the discursive material and structural influences that contribute to an understanding of expertise This book offers a comprehensive view of organizational expertise by presenting theoretical frameworks for the study of expertise providing reviews of how the study of expertise has evolved applying perspectives on expertise to different domains of organizational practice and presenting new directions for the study of the intersection of expertise communication and organizing The result is a treatment that considers expertise in diverse forms and across a variety of contexts of organizing and in doing so provides valuable content to researchers from multiple disciplinary backgrounds

*Cognition, Communication and Interaction* Satinder P. Gill, 2007-10-26 This book examines the theoretical and methodological research issues that underlie the design and use of interactive technology The analysis directs attention to three human capacities cognition communication and interaction The examination of these capacities is embedded in understanding concepts of communication and interaction and their application conceptions of knowledge and cognition and the role of aesthetics and ethics in design

Digital Library Use Ann Peterson-Kemp, Nancy A. Van House, Barbara P. Buttenfield, 2003-10-10 Viewing digital libraries as sociotechnical systems networks of people and technology interacting with society The contributors to this volume view digital libraries DLs from a social as well as technological perspective They see DLs as sociotechnical systems networks of technology information artifacts and people and practices interacting with the larger world of work and society As Bruce Schatz observes in his foreword for a digital library to be useful the users the documents and the information system must be in harmony The contributors begin by asking how we evaluate DLs how we can understand them in order to build better DLs but they move beyond these basic concerns to explore how DLs make a difference in people s lives and their social worlds and what studying DLs might tell us about information knowledge and

social and cognitive processes The chapters using both empirical and analytical methods examine the social impact of DLs and also the web of social and material relations in which DLs are embedded these far ranging social worlds include such disparate groups as community activists environmental researchers middle school children and computer system designers Topics Documents and society the real boundaries of a library without walls the ecologies of digital libraries usability and evaluation information and institutional change transparency as a product of the convergence of social practices and information artifacts and collaborative knowledge construction in digital libraries

**Designs for Experimentation and Inquiry** Åsa Mäkitalo, Todd E. Nicewonger, Mark Elam, 2019-06-27 Designs for Experimentation and Inquiry examines how digital media is reconfiguring the established worlds of research education and professional practice It reflects on the theoretical methodological and ethical issues shaping contemporary engagements with digital learning and offers insights for both analysing and intervening in digital learning practices This insightful volume fills a gap in the current literature by bringing together experiences from Sociocultural Studies of Learning Science and Technology Studies and Design Studies Each chapter is an innovative case study examining a different aspect of digital media's role in research education and professional practice by exploring topics such as Learning practices and digitalized dialogue Digital design experiments Digitally mediated collaborations Ethical digital inquiry and design Expertly researched and written this book is a unique resource for scholars researchers and professionals working in the fields of digital design applied technology and the learning sciences The Preface and Introduction as well as Chapters 3 and 5 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

**Creating a Better World** Anna Clarke, 2009

**Minority Students in Special and Gifted Education** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Minority Representation in Special Education, 2002-08-30 Special education and gifted and talented programs were designed for children whose educational needs are not well met in regular classrooms From their inception these programs have had disproportionate representation of racial and ethnic minority students What causes this disproportion Is it a problem Minority Students in Special and Gifted Education considers possible contributors to that disparity including early biological and environmental influences and inequities in opportunities for preschool and K-12 education as well as the possibilities of bias in the referral and assessment system that leads to placement in special programs It examines the data on early childhood experience on differences in educational opportunity and on referral and placement The book also considers whether disproportionate representation should be considered a problem Do special education programs provide valuable educational services or do they set students off on a path of lower educational expectations Would students not now placed in gifted and talented programs benefit from raised expectations more rigorous classes and the gifted label or would they suffer failure in classes for which they are unprepared By examining this important

problem in U S education and making recommendations for early intervention and general education as well as for changes in referral and assessment processes Minority Students in Special and Gifted Education will be an indispensable resource to educators throughout the nation as well as to policy makers at all levels from schools and school districts to the state and federal governments
