Leaving Unemployment For Selfemployment An Empirical Study:

Leaving Unemployment for Self-Employment Frank Reize, 2012-12-06 The book presents an analysis of the transition from unemployment to self employment and its subsidisation with the so called bridging allowance in Germany On the basis of econometric models the determinants and the success of self employment among former unemployed are estimated at the individual as well as at the firm level By comparing different groups of the formerly unemployed it becomes evident that self employment is one successful route out of unemployment as self employment proves to be more stable than paid employment Therefore the bridging allowance reaches its aim of regaining stable employment for the unemployed However this

programme fails to create additional employment in the newly founded firms **Evaluating the Employment Effects of Job Creation Schemes in Germany** Stephan Lothar Thomsen, 2007-05-16 This book analyses the employment effects of job creation schemes for participating individuals in Germany Programs provide subsidized jobs that are additional in nature and of value for society International evidence on their effectiveness suggests that programs should be targeted to the needs of the unemployed and should be offered early in the period of unemployment Both questions are studied for job creation schemes in Germany **Applied Research in Environmental Economics** Christoph Böhringer, Andreas Lange, 2006-03-30

Sustainable development climate policy biodiversity conservation all these represent flash points at the intersection of environmental science economics and public policy This volume offers a snapshot of environmental economic research on a range of policy relevant problems Academic contributions are complemented by the views of policy makers on environmental policy priorities the usefulness of academic research for decision making and the future of applied research *Leaving*

Unemployment for Self-Employment Frank Reize, 2011-03-11 *Decentralised Government in an Integrating World* Dan Stegarescu, 2006-01-17 The book offers a comprehensive empirical analysis of the determinants of changes in the distribution of expenditure and revenue raising powers among fiscal tiers in OECD countries Using a new indicator of fiscal decentralisation which accounts for subnational decision making autonomy common decentralisation trends are investigated Then empirical evidence from panel analyses is provided for the role of costs preferences and institutions in explaining fiscal federal structures and for the impact of economic and political integration on the degree of government decentralisation particularly among EU countries Finally the historical experience of Germany is used to explore long term developments in the public sector *The Market Approach to Comparable Company Valuation* Matthias Meitner, 2006-08-18 Corporate

valuation using multiples is one of the most popular corporate valuation approaches In this book the different steps of this valuation approach such as the selection of comparable companies or the choice of the reference variables are discussed Then the circumstances required for a sound valuation e g the degree of efficiency of the equity market are described Additionally the book gives insight on how the state of the industry and or the company has an impact on the proper choice of the reference variables Finally it is shown how multi factor models can enrich the universe of valuation models While always

maintaining the academic rigor the author addresses practice relevant topics and delivers hands on solutions for typical valuation problems

Education and Labour Market Outcomes Charlotte Lauer,2006-01-17 This book offers a comprehensive empirical analysis of educational inequalities and their consequences on individual labour market outcomes for men and women in France and Germany two countries with different education systems Using microdata of either country the analyses mainly rely on econometric methods After a detailed comparison of the French and the German education systems the social determinants of school and post school attainment are analysed Then the extent to which education reduces the unemployment risk is examined distinguishing between risk of entering unemployment unemployment duration and recurrence of unemployment episodes Finally evidence is given on the impact of education on individual earnings prospects

Studies on Continuing Vocational Training in Germany Anja Kuckulenz,2007-07-13 This book offers a comprehensive empirical analysis of continuing vocational training in Germany Specific issues concerning continuing training that are debated in academia as well as in public are discussed Wage and productivity effects of training are analysed explicitly accounting for the heterogeneity of training participants Additionally different types of training that vary in the degree of firm specificity are considered Wage and productivity effects of training are compared to examine how the training rent is shared between employer and employee Finally evidence is given on whether positive externalities of continuing training exist
