Leaving No Child Behind:

Leaving No Child Behind? Frederick M. Hess, Chester E. Finn, Jr., 2004-10 NCLB is the signal domestic policy initiative of the Bush administration and the most ambitious piece of federal education legislation in at least thirty five years Mandating a testing regime to force schools to continually improve student performance it uses school choice and additional learning resources as sticks and carrots intended to improve low performing schools and districts The focus is on improving alternatives to children in low performing schools Here top experts evaluate the potential and the problems of NCLB in its initial stages of implementation This first look provides valuable insights offering lessons crucial to understanding this dramatic change in American education Leave No Child Behind James Comer, 2008-10-01 The call to arms to leave no child behind in America has become popularly associated with the Bush administration s education plan a plan that actually diverges greatly from the ideals of the Children s Defense Fund which originated the concept Here in a bold and engaging new book Dr James Comer reclaims this now famous exhortation as a tool for positive and substantive change Far removed from the federal government s focus on standardized testing as the panacea for our educational ills Dr Comer s argument drawn from his own experiences as the creator of the School Development Program urges teachers policymakers and parents alike to work toward creating a new kind of school environment In so doing Dr Comer reignites a crucial debate as he details the evolution and many successes of his School Development Program since its inception thirty five years ago and he illustrates how his model for change has proven effective in public schools throughout the country Most important he offers proof that students from all backgrounds can learn at a high level adopt positive behavioral attitudes and prepare for a fulfilling adult life if they learn in schools that provide adequate support for their complete development schools that know that leaving no child behind should be much more than just a convenient political slogan Leave no child behind UNESCO, 2022-06-20 To leave no child behind UNESCO developed the first global report of this scope on boys disengagement from education bringing together qualitative and quantitative evidence from over 140 countries This report provides an overview on the global situation on boys disengagement from and disadvantage in education It identifies factors influencing boys participation progression and learning outcomes in education It also analyses responses by governments and partners and examines promising policies and programmes Finally it includes recommendations on how to engage boys with education and address disadvantage While girls continue to face severe disadvantages and inequalities in education the report shows that boys in many countries are at greater risk than girls of repeating grades failing to complete different education levels and having poorer learning outcomes in school No less than 132 million boys of primary and secondary school age are out of school They urgently require support As this report shows supporting boys does not mean that girls lose out and vice versa Addressing boys disengagement not only benefits boys learning employment opportunities income and well being it is also highly beneficial for achieving gender equality and desirable economic social and health outcomes **"Leave No**
