Colquhoun,1971 **Lectures on Biostatistics** D. Colquhoun,1971 **Statistics in Social Science and Agricultural Research** Debasis Bhattacharya (Ph. D.),Soma Roychowdhury,2012 Papers presented at a mini meeting cum workshop held at Visva Bharati University with support from Institute of Mathematical Statistics *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1972 First multi year cumulation covers six years 1965 70 **Mathematical Problems in Biology** P. van den Driessche,2013-03-08 A conference on Some Mathematical Problems in Biology was held at the University of Victoria Victoria B C Canada from May 7 10 1973 The participants and invited speakers were mathematicians interested in problems of a biological nature and scientists actively engaged in developing mathematical models in biological fields One aim of the conference was to attempt to assess what the recent rapid growth of mathematical interaction with the biosciences has accomplished and may accomplish in the near future The conference also aimed to expose the problems of communication between mathematicians and biological scientists and in doing so to stimulate the interchange of ideas It was recognised that the topic spans an enormous breadth and little attempt was made to balance the very diverse areas Widespread active interest was shown in the conference and just over one hundred people registered The varied departments and institutions across North America from which the participants came made it both academically and geographically mixed The chief activity of the conference was the presentation of papers Nine invited guest speakers see table of contents each gave a one hour talk These covered a wide range of topics There were twenty five shorter twenty minute contributed papers and almost all papers were followed by a five minute question and discussion period Duplicated abstracts of presented papers were available at the meeting An evening informal discussion meeting of participants chaired by Dr A B Tayler and led by Drs E M Hagmeier E C **Experimental Design for Laboratory Biologists** Stanley E. Lazic,2016-12-08 A guide to designing lab based biological experiments that have low bias high precision and widely applicable results **Statistical Techniques in Bioassay** Z. Govindarajulu,2001-01-03 In the face of the ever increasing importance of statistical methods in medical research and practice the first edition of this publication has provided a sound and deep understanding of statistical methods in bioassay to many students and researchers In addition to the profound presentation of statistical methods of the first edition here the reader will find new material stemming from the recent statistical literature as well as data reflecting modern trends in general applied statistical research Examples are discussions on design and planning e g choices of dose levels an additional section in the chapter on Bayes methods and a new chapter on sequential estimation for the logistic model The book will be a valuable source of information to students in the experimental area of statistical aspects of biological assay professional statisticians with an interest in research in this topic teachers in statistics and biology and investigators in the biological and medical sciences who use bioassay in their work

Principles of Pharmacology D. T. Okpako, 1991-02-22 This volume first published in 1991 provides a useful and informative introduction to basic pharmacological principles and practice in the context of tropical medicine and diseases The author discusses the cultural and environmental factors that affect the use of drugs in the tropics BMDP Statistical Software Manual W. J. Dixon, Wilfrid Joseph Dixon, 1988-01-01 *BMDP Statistical Software Manual* Wilfrid Joseph Dixon, 1992-01-01 The BMDP package is an extensive collection of computer programs that aids students instructors and research professionals the world over in analyzing data Running on most mainframes minicomputers and PCs the BMDP software has capabilities ranging from plots and simple data description to more sophisticated techniques such as repeated measures analysis Practitioners in diverse fields from psychology sociology and economics to biology medicine and public health should find the BMDP programs of use Comparative Analyses of Ecosystems Jonathan Cole, Gary Lovett, Stuart Findlay, 2012-12-06 Arising from the third Cary Conference held in 1989 *Comparative Analyses of Ecosystems* investigates the utility and limitations of cross system comparisons in ecology The contributors all well known in their field support their conclusions on the use and meaning of such comparisons by presenting novel analyses of data utilizing a variety of cross system approaches in marine freshwater and terrestrial systems **Ecological Heterogeneity** Jurek Kolasa, Steward T.A. Pickett, 2012-12-06 An attractive promising and frustrating feature of ecology is its complex ity both conceptual and observational Increasing acknowledgment of the importance of scale testifies to the shifting focus in large areas of ecology In the rush to explore problems of scale another general aspect of ecological systems has been given less attention This aspect equally important is heterogeneity Its importance lies in the ubiquity of heterogeneity as a feature of ecological systems and in the number of questions it raises questions to which answers are not readily available What is heterogeneity Does it differ from complexity What dimensions need be considered to evaluate heterogeneity adequately Can heterogeneity be measured at various scales Is heterogeneity apart of organization of ecological systems How does it change in time and space What are the causes of heterogeneity and causes of its change This volume attempts to answer these questions It is devoted to identification of the meaning range of applications problems and methodology associated with the study of heterogeneity The coverage is thus broad and rich and the contributing authors have been encouraged to range widely in discussions and reflections vi Preface The chapters are grouped into themes The first group focuses on the conceptual foundations Chapters 1 5 These papers examine the meaning of the term historical developments and relations to scale The second theme is modeling population and interspecific interactions in heterogeneous environments Chapters 6 and 7 *Practical Immunoassay* W. R. Butt, 1984-06-01 *Biomolecular Kinetics* Clive R. Bagshaw, 2017-10-04 a gem of a textbook which manages to produce a genuinely fresh concise yet comprehensive guide Mark Leake University of York destined to become a standard reference Not just a how to handbook but also an accessible primer in the essentials of kinetic theory and practice Michael Geeves University of Kent covers the entire spectrum of approaches from the traditional steady state methods to a

thorough account of transient kinetics and rapid reaction techniques and then on to the new single molecule techniques Stephen Halford University of Bristol This illustrated treatment explains the methods used for measuring how much a reaction gets speeded up as well as the framework for solving problems such as ligand binding and macromolecular folding using the step by step approach of numerical integration It is a thoroughly modern text reflecting the recent ability to observe reactions at the single molecule level as well as advances in microfluidics which have given rise to femtoscale studies Kinetics is more important now than ever and this book is a vibrant and approachable entry for anyone who wants to understand mechanism using transient or single molecule kinetics without getting bogged down in advanced mathematics Clive R Bagshaw is Emeritus Professor at the University of Leicester U K and Research Associate at the University of California at Santa Cruz U S A *Urban Mobility Research in India* Ashish Verma, M.
