Fetal Pharmacology:

Fetal Pharmacology. Edited by Lars O. Boreus Symposium on Fetal Pharmacology, Stockholm, 1971,1973 **Prenatal Drug Exposure** National Institute on Drug Abuse,1985 This monograph is based upon papers presented at a technical review on prenatal drug exposure and consequences of maternal drug use which took place on September 24 25 1984 at Bethesda Maryland The meeting was sponsored by the Division of Clinical Research and Division of Preclinical Research National Institute on Drug Abuse The clinical papers have been published separately as NIDA Research Monograph 59 Current research on the consequences of maternal drug abuse Library of Congress Subject Headings: F-O Library of Congress. Subject Cataloging Division,1989 *Biological Reactive Intermediates* David Jollow,2012-12-06 The concept that detoxication is the inevitable result of biotransformation of xenobiotic compounds by mammalian systems has undergone modification since it was first described Indeed despite the fact that R T Williams popularized the notion he was among the first to caution that it was not possible to predict the biological activities of the resulting metabolites It has become increasingly apparent in recent years that not only do many metabolites of drugs and other chemicals display biological activity but also in many instances these metabolites play an important role in initiating several forms of cancer and are the cause of a variety of types of toxicity Thus it seems appropriate to collect in one volume a series of reports outlining advances in the study of the formation of chemically active intermediary metabolic products of chemicals mechanisms of toxicity or carcinogenesis and pathways for true detoxication of these chemicals The work of R T Williams beginning in the late 1920s and early 1930s marked the first concerted effort to understand the biotransformation of foreign chemicals in animals He investigated the metabolic pathway of numerous compounds in a wide variety of animal species while training large numbers of our colleagues who have been responsible for further advances in biochemistry pharmacology and toxicology Another pioneer in the study of drug metabolism B B **Library of Congress Subject Headings** Library of Congress,2012

Biomedical Index to PHS-supported Research ,1988 **Drug Therapy During Pregnancy** Tom K. A. B. Eskes,Mieczyslaw Finster,2013-10-22 Drug Therapy During Pregnancy is a collection of papers dealing with the risks and benefits of drug treatment for both mother and fetus One paper notes that the total use of medication during pregnancy in the Netherlands has decreased from 82.7 % to 71.7 % The paper also points out the lack of a relationship between the number or type of congenital anomalies and the use of medication Another paper assesses fetal drug exposure in two ways

firstly through the physicochemical characteristics of the drug and the way it is handled by the mother in order to estimate placental passage and fetal exposure Secondly through the utilization of pharmacokinetic models estimating the probable time course of drug concentrations in the fetus maternal unit One paper investigates the effects of hypertension during pregnancy in which the etiology of hypertension a group of disorders with one common abnormality remains unsolved with a clinical diagnosis that is not always accurate Treatment differs widely depending on the type chronic hypertension albuminuric hypertension and hypertensive crises during pregnancy One paper suggests that to prove any environmental exposure to a particular substance affecting pregnancy the exact timing of exposure must be established large samples are necessary possibly on a national or international scale The paper cites as example the four year documentation period of the 50% to 80% incidence of malformations due to thalidomide General medicine practitioners obstetricians gynecologists and researchers dealing with pharmacology pharmacokinetics toxicology or embryology will find the collection valuable

National Library of Medicine Current Catalog National Library of Medicine (U.S.),1973 First multi year cumulation covers six years 1965-70 **NIDA Research Monograph** ,1976 **Therapeutic Problems in Pregnancy** P.J. Lewis,2012-12-06 The image of obstetrics as a largely manipulative art has changed radically in recent years The risk to a healthy mother of pregnancy and labour has been markedly reduced and morbidity not mortality is the yardstick by which the quality of maternal care is judged We are now able to devote far more attention to the fetus whose growth patterns and behaviour in utero can be studied in detail by modern and sophisticated technical aids with a resultant improvement in perinatal mortality A patient with a pre existing general disease however still presents a problem which is best managed by close co operation between obstetrician and physician Essential hypertension diabetes heart disease thyroid disease and epilepsy are examples of disorders which require great care throughout pregnancy and during labour if good maternal and fetal results are to be obtained There are many questions still to be answered What is the place of hypotensive therapy in essential hypertension complicating pregnancy When should delivery take place in the pregnant diabetic How should the patient be delivered What should be her management during labour What is the risk of fetal abnormality in the epileptic patient who becomes pregnant whilst on anti epileptic drugs These questions and others have been the subject of a recent symposium in the Institute of Obstetrics and Gynaecology **Principles and Practice of Regional Anaesthesia** Graeme McLeod,Colin McCartney,Tony Wildsmith,2012-11-22 The fourth edition of this highly successful textbook discusses the practical applications of the various methods of regional anaesthesia including ultrasound as well as giving an account of their theoretical aspects The well established author team use their experience to provide a practical and stimulating book which reflects everyday clinical activity supplemented by high definition ultrasound images and schematic diagrams The book will also discuss the place of regional anaesthesia in current medical practice particularly with regard to pain processes ultrasound imaging and patient outcomes Regional anaesthesia is a rapidly expanding sub speciality of anaesthesia routine

provision of long lasting pain relief and the introduction of real time ultrasound block has fuelled a demand for cadaver and ultrasound based anatomy training courses Thus it is more important than ever to have a thorough grounding in this exciting subspecialty Library of Congress Subject Headings: P-Z Library of Congress.
