Fidic Forms Of Contract:

The FIDIC Forms of Contract Nael G. Bunni, 2013-02-05 In September 1999 FIDIC introduced its new Suite of Contracts which included a new Red Yellow Silver and Green forms of contract The new Red Book was intended to replace the 1992 fourth edition of the Red Book with the ambition that its use would cease with time This ambition has not materialised and is unlikely to do so in the future Despite the importance of the 1999 Forms there has been very little published on the new concepts adopted in them and how they interact with the previous forms This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997 when the second edition of this book was published and relates them to key contracting issues It is written by a chartered engineer conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them Important features of this book include background and concepts of the various forms of contract a detailed comparison of the wording of the 1999 three main forms which although similar in nature it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned a range of decision tree charts analysing the main features of the 1992 Red Book including risks indemnities and insurances claims and counterclaims variations procedure for claims programme and delay suspension payments and certificates dispute resolution mechanisms and dispute boards a much enlarged discussion of the meaning of claim and dispute and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submittal of claims by a contractor and by an employer the FIDIC scheme of indemnities and insurance requirements and the methods of dispute resolution provided by the various forms of contract and five new chapters in this third edition the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards

FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms, the Red, Yellow and Silver Books, had not been amended or updated for nearly two decades since the first editions were published in 1999. Written by a specialist lawyer who was a member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview, the contracts are examined clause by clause with the aim of showing how each compares and contrasts with the others and how the second editions compare and contrast with the first. The first chapter describes how the Red, Yellow and Silver Books evolved from earlier contract forms and the distinctive characteristics of each before providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining in the second chapter key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books, the Employer's Representative's function in the Silver Book, including the new procedure for determinations as well as the Employer's obligations and contract administration. The Contractor's

obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books Chapters 6 to 14 deal respectively with plant materials and workmanship and staff and labour time related provisions in the three contracts including extensions of time and the Employer's right to suspend the works testing on and after completion and the Employer's taking over of the works defects after taking over acceptance of the works and unfulfilled obligations measurement in the Red Book the Contract Price and payment the new variations regime and adjustments to the Price termination and suspension care of the works and indemnities and Exceptional Events previously Force Majeure An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance These topics are examined in the final two chapters 15 and 16 which deal respectively with the new claims and dispute resolution provisions of the 2017 forms FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects Provides a clear and comprehensive guide to the 2017 FIDIC Red Yellow and Silver Books Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts Accessible to those with little or no familiarity with FIDIC contracts The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects including employers contractors engineers lawyers suppliers and project financiers sponsors
