**Wild Orchids of Scotland** Brian Allan, Patrick Woods, 1993 All 28 species of Scotland's wild orchids are described in detail and illustrated with colour photographs Up to date distribution maps and a comprehensive field key supplemented with line drawings should prove useful to professional botanists and amateur naturalists alike In the chapters on biology habitats and conservation the authors have combined their several areas of botanical expertise to present a complete picture of this group of plants Specially commissioned pictures were taken over three orchid seasons and there is a chapter on the photographic techniques used to capture the fragile beauty of these orchids in their sometimes remote and often threatened habitats

Monocots: Systematics and Evolution Karen L Wilson, David A Morrison, 2000-05-19 Monocots Systematics and Evolution presents leading work from around the world on non grass monocotyledons and includes reviews and current research into their comparative biology phylogeny and classification The papers are based on presentations at the Second International Conference on the Comparative Biology of the Monocotyledons Monocots II held in Sydney Australia in late 1998 Many were subsequently updated or extended to take into account new information All 72 papers have been peer reviewed
