Field Study Vintage International:

Field Study Rachel Seiffert, 2007-12-18 Rachel Seiffert author of *The Dark Room* powerfully evokes our need for human connection in this dazzling and haunting group of stories Set against immense political upheaval or evoking the intimate struggles between men and women parents and children this astonishing collection charts our desire for love our fragility and our strength From the title piece in which a young biologist conceals his discoveries at a polluted river from a local woman to the family aided by an enemy in *The Crossing* to the old man weighing his regrets in *Francis John Jones* 1924 Seiffert's acclaimed refined prose movingly captures the lives of her characters in their most essential secret moments

Global Knowledge Dynamics and Social Technology Thomas Petzold, 2017-05-31 This volume unpacks an intriguing challenge for the field of media research combining media research with the study of complex networks Bringing together research on the small world idea and digital culture it questions the assumption that we are separated from any other person on the planet by just a few steps and that this distance decreases within digital social networks The book argues that the role of languages is decisive to understand how people connect and it looks at the consequences this has on the ways knowledge spreads digitally This volume offers a first conceptual venue to analyse emerging phenomena at the innovative intersection of media and complex network research The Global Governed? Kate Pincock, Alexander Betts, Evan

Easton-Calabria, 2020-03-26 Examines refugees as important and neglected providers of protection and assistance **The SAGE Handbook of International Social Work** Karen H Lyons, Terry Hokenstad, Manohar Pawar, Nathalie Huegler, Nigel Hall, 2012-05-03 Social work is a profession that is increasingly involved with issues which have a global dimension This Handbook tackles the global local aspect of social work in its various forms and interrogates the key concerns that societies are facing through an international lens The contributors show that with an appreciation of commonalities and differences local practices and appropriate forms of international activity can be better developed Areas covered include Analysis of International social work Globalisation and indigenisation Social justice and human rights Poverty and livelihoods Ecological issues Migration Education theory research and practice Social work in different settings Religion and spirituality Responses to disasters and conflicts Life course perspectives Regional perspectives Future directions With a truly international range of contributions the Handbook incorporates perspectives from Asia Africa Europe Australasia the Middle East and the Americas It will be an invaluable resource for undergraduates postgraduates researchers and academics working in the fields of social work social welfare human services and community development worldwide as well as service providers and policy makers in the international arena Obligations and Omissions Rebecca Tiessen, Stephen Baranyi, 2017-06-12 On issues pertaining to women and girls Stephen Harper's federal government positioned Canada as a beacon of light in the world Programs were developed in relation to women's maternal health and the protection of the girl child but other actions point to an ambiguous and even contradictory approach that failed to address gender inequality In *Obligations and Omissions* contributors examine

Canada's equivocal and diminished role in working toward gender equality in the period between 2006 and 2015 Using a critical feminist lens to document analyze and challenge Canada's relations with the Global South chapters explore the extent to which matters of gender equality have been erased or exploited under the Harper government and the factors that explain these policy shifts While the contributors document successes in Canada's approach to some issues facing women and girls around the world they also show many problems with the ways that agenda was framed and implemented under the Conservative government Drawing on rich theoretical investigation empirical research and discourse analysis *Obligations and Omissions* reveals a complex picture of diverse practices underscoring the implications of these actions for communities in the Global South for Canada's image in the international community and for future governments in the pursuit of a renewed gender equality strategy

Legumes for Global Food Security Jose C. Jimenez-Lopez, Karam B. Singh, Alfonso Clemente, Matthew Nicholas Nelson, Sergio J. Ochatt, Penelope Mary Collina Smith, 2020-08-12

Enter the Animal Teya Brooks Pribac, 2021-02-01 Historically grief and spirituality have been jealously guarded as uniquely human experiences Although non human animal grief has been acknowledged in recent times its potency has not been recognised as equal to human grief Anthropocentric philosophical questions still underpin both academic and popular discussions In *Enter the Animal* Teya Brooks Pribac examines what we do and don't know about grief and spirituality She explores the growing body of knowledge about attachment and loss and how they shape the lives of both human and non human animals A valuable addition to the vibrant interdisciplinary conversation about animal subjectivity *Enter the Animal* identifies conceptual and methodological approaches that have contributed to the prejudice against nonhuman animals It offers a compelling theoretical base for the consideration of grief and spirituality across species and highlights important ethical implications for how humans treat other animals

Communities of Practice and Vintage Innovation Francesco Schiavone, 2013-09-25 This book focuses on the notion of vintage innovation and its application in various old technology based communities of practice Some communities of practice resist and react to technological change by adopting new technological products vintage products that extend the lifetime of their old favored products and practices There are a number of potential reasons for such strategic reactions which are analyzed by the author The book opens by reviewing the nature of technological change Old technology based communities of practice and their typical reactions to technological change are then discussed and the concept of vintage innovation introduced and explained The book presents four case studies of communities of users in which vintage innovation emerged analog photographers radio amateurs arcade videogame players and disc jockeys

China and International Theory Chih-yu Shih et al., 2019-03-27 Major IR theories which stress that actors will inevitably only seek to enhance their own interests tend to contrive binaries of self and other and inside and outside By contrast this book recognizes the general need of all to relate which they do through various imagined resemblances between them The authors of this book therefore propose the balance of relationships BoR as a new international relations theory to transcend

binary ways of thinking BoR theory differs from mainstream IR theories owing to two key differences in its epistemological position Firstly the theory explains why and how states as socially interrelated actors inescapably pursue a strategy of self restraint in order to join a network of stable and long term relationships Secondly owing to its focus on explaining bilateral relations BoR theory bypasses rule based governance By positing relationality as a key concept of Chinese international relations this book shows that BoR can also serve as an important concept in the theorization of international relations more broadly The rising interest in developing a Chinese school of IR means the BoR theory will draw attention from students of IR theory comparative foreign policy Chinese foreign policy East Asia cultural studies post Western IR post colonial studies and civilizational politics

The Rise of Animals Mikhail A. Fedonkin, 2007 An essential resource for paleontologists biologists geologists and teachers The Rise of Animals is the best single reference on one of earth s most significant events

Safety Culture in Nuclear Power Operations Bernhard Wilpert, Naosuke Itoigawa, 2001-09-13 Technical psychological and social aspects of industrial safety come under the rigorous scrutiny of scientists and engineers from a vast array of different backgrounds For many years as an immediate result of direct international governmental and popular concern the nuclear power industry has led the safety world

Safety Culture in Nuclear Power **Endurance and War** Jasen J. Castillo, 2014-04-09 Scholars and military practitioners alike have long sought to understand why some country s militaries fight hard when facing defeat while others collapse In Endurance and War Jasen Castillo presents a new unifying theory cohesion theory to explain why national militaries differ in their staying power His argument builds on insights from the literatures on group solidarity in general and military effectiveness in particular which argue that the stronger the ties binding together individuals in a group of any kind the higher the degree of cohesion that a group will exhibit when taking collective action including fighting in war Specifically he argues that two types of ties determine the cohesion and therefore the resilience of a nation s armed forces during war the degree of control a regime holds over its citizens and the amount of autonomy the armed forces possess to focus on training for warfighting Understanding why armed forces differ in their cohesion should help U S military planners better assess the military capabilities of potential adversaries like Iran and North Korea For scholars of international politics cohesion theory can help provide insights into how countries create military power and how they win wars

Hoaxes, Myths, and Manias Robert E. Bartholomew, 2010-11-02 Thinking is an innate ability that most people take for granted But like writing well or speaking effectively before the public thinking well is a skill that can be learned and improved with practice In this unique introduction to critical thinking Robert Bartholomew and Benjamin Radford first lay out the principles of critical thinking and then invite readers to put these principles to the test by examining a series of unusual and challenging case studies Assembling a wide range of bizarre but actual incidents from many cultures and various time periods they demonstrate how the tools of critical thinking can help to unravel alleged paranormal events and seemingly mysterious behavior What factors led to the Martian panic of 1938 Why did many people

conclude that an alien spaceship crashed in Roswell New Mexico in 1947 How do we explain the panic expressed by otherwise normal Southeast Asian men who came to believe that a contagious disease was causing their genitals to shrink or the frenzied dance manias that captivated thousands of Europeans during the Middle Ages Bartholomew and Radford show that reality is very much a social construction that cultural assumptions play a large part in our judgments about what is normal and what is deviant and that the use of critical reasoning is our best means of ensuring an objective perspective

Global Catastrophes and Trends Vaclav Smil, 2012-09-21 A wide ranging interdisciplinary look at global changes that may occur over the next fifty years whether sudden and cataclysmic world changing events or gradually unfolding trends Fundamental change occurs most often in one of two ways as a fatal discontinuity a sudden catastrophic event that is potentially world changing or as a persistent gradual trend Global catastrophes include volcanic eruptions viral pandemics wars and large scale terrorist attacks trends are demographic environmental economic and political shifts that unfold over time In this provocative book scientist Vaclav Smil takes a wide ranging interdisciplinary look at the catastrophes and trends the next fifty years may bring Smil first looks at rare but cataclysmic events both natural and human produced then at trends of global importance including the transition from fossil fuels to other energy sources and growing economic and social inequality He also considers environmental change in some ways an amalgam of sudden discontinuities and gradual change and assesses the often misunderstood complexities of global warming Global Catastrophes and Trends does not come down on the side of either doom and gloom scenarios or techno euphoria Instead Smil argues that understanding change will help us reverse negative trends and minimize the risk of catastrophe

Cognitive Work Analysis Kim J. Vicente, 1999-04-01 This book describes for the first time in pedagogical form an approach to computer based work in complex sociotechnical systems developed over the last 30 years by Jens Rasmussen and his colleagues at Ris National Laboratory in Roskilde Denmark This approach is represented by a framework called cognitive work analysis Its goal is to help designers of complex sociotechnical systems create computer based information support that helps workers adapt to the unexpected and changing demands of their jobs In short cognitive work analysis is about designing for adaptation The book is divided into four parts Part I provides a motivation by introducing three themes that tie the book together safety productivity and worker health The ecological approach that serves as the conceptual basis behind the book is also described In addition a glossary of terms is provided Part II situates the ideas in the book in a broader intellectual context by reviewing alternative approaches to work analysis The limitations of normative and descriptive approaches are outlined and the rationale behind the formative approach advocated in this book is explored Part III describes the concepts that comprise the cognitive work analysis framework in detail Each concept is illustrated by a case study and the implications of the framework for design and research are illustrated by example Part IV unifies the themes of safety productivity and health and shows why the need for the concepts in this book will only increase in the future In addition a historical addendum briefly describes the origins of the ideas

described in the book **Negativity in Democratic Politics** Stuart N. Soroka, 2014-04-14 This book explores the political implications of the human tendency to prioritize negative information over positive information Drawing on literatures in political science psychology economics communications biology and physiology this book argues that negativity biases should be evident across a wide range of political behaviors These biases are then demonstrated through a diverse and cross disciplinary set of analyses for instance in citizens ratings of presidents and prime ministers in aggregate level reactions to economic news across 17 countries in the relationship between covers and newsmagazine sales and in individuals physiological reactions to network news content The pervasiveness of negativity biases extends this book suggests to the functioning of political institutions institutions that have been designed to prioritize negative information in the same way as the human brain

Outdoor Learning: Past and Present Rosaleen Joyce, 2012-02-16 The book breaks new ground by placing outdoor learning in a theoretical historical and social context of changing understandings of children childhood and the use of the outdoors The books approach is based on the premise that ideas phase in and out of use depending on social and political contexts This perspective will help people to think about how present day attitudes regarding outdoor learning came to be where they came from and to question their newness The author argues that outdoor learning needs to be looked at in a historical context so that you can understand the contribution of previous educational thinkers on today s views and practices The main historical thinkers considered include Comenius Pestalozzi Froebel and Margaret McMillan as well as the views of more modern contributors and the Forest Schools in the UK Joyce makes it possible to look more critically at today s approaches and influences on outdoor learning She considers how children are regarded today within these approaches and whether these constructs are in the children s best interests Key features of this book include A reflective approach to practice Effective training for practitioners in their use of the outdoors recognising the different approaches required from those used in the indoor classroom This book is essential reading for all early years practitioners

The Sociology of Boredom Mariusz Finkielstein, 2025-06-16 A pioneering sociological exploration of boredom as a culturally and socially dependent emotion Does boredom have a history What can hunter gatherers teach us about boredom Is boredom experienced differently by those in different socio economic classes Is boredom a disease that is now globalized in a world of inequalities and marginalization Does boredom contribute to political movements wars terrorism or cultural revolutions What does boredom have to do with power How do high expectations contribute to being recurrently bored In The Sociology of Boredom Mariusz Finkielstein provides a new approach to conceptualizing interpreting and perceiving one of the most

widespread yet neglected human emotions Investigating boredom at both the macro and micro sociological level Finkielstein develops an original relational expectational theory as he explores boredom through the lenses of different social structure theories interactionist theory historical sociology sociology of emotions essentialism and constructivism and social anthropology Eight in depth chapters examine the social production of boredom in modernity and late modernity addressing topics such as the boredom of marginalized groups the concepts of busy boredom and consumer boredom the characteristics and consequences of workplace boredom the notion of smart boredom in the information society and more Containing detailed analyses of the nature of boredom and its connections to various spheres of social life *The Sociology of Boredom* is essential reading for advanced undergraduates postgraduates university lecturers and academic researchers in sociology and similar disciplines particularly those involved in studies on emotions or boredom studies

The Caribbean In World Affairs Jacqueline Anne Braveboy-wagner,J Braveboy-Wagner,2019-06-04 This book is intended not so much to supply new information concerning the external activities of the English speaking Caribbean countries as to fill a large gap in the growing literature on the subject by integrating the known information into an analytical framework or model as a first step toward theory building As such the book complements the descriptive works on the Caribbean that are already available or in production The book is also intended to reach the broader audience of those interested in small state foreign policy in general that is those persons to whom the formulation of a model is useful in facilitating comparisons with other countries of similar size Note that the aim is not to build a grand theory of small state or Caribbean foreign policy but rather to modify existing middle range theories of international relations to suit the Caribbean region
