

Here's what the reviewers said about the best-selling story by the same author

The Incredible Journey

REVIEWER'S CHOICE

"The book is reconstructed with brilliance and understanding that will appeal to all lovers of animal stories".

THE GUARDIAN

"It is a very moving story, because of the needs of the journey and because of the deep feelings of the home-coming, in the human beings for their animals, in the animals for their trust that was not betrayed, and in all for their joy".

THE TIMES

LITERARY SUPPLEMENT

"A stirring and convincing account . . . Miss Burnford's treatment is almost free of sentimentality, and she has produced an animal adventure story which will appeal to adults and children alike".

WORD OF THE WEEK

"... from this carefully checked and completely authenticated story, in which guess work has been kept to a minimum, one seems to pass right into the world of Louis, Budge and Taro. And to understand them perfectly ... a little epic".

REVIEWER'S CHOICE

"It is a classic among animal stories".

Fields Of Noon:

The Fields of Noon [by] Sheila Burnford Sheila Every Burnford, **The Fields of Noon** Sheila Every Burnford, 1966

The Fields of Noon Sheila Burnford, 1961 Fields of Noon, 1968 Particles and Fields in the Magnetosphere Billy McCormac, 2012-12-06 This book contains the lectures presented at the Advanced Study Institute Earth's Particles and Fields 1969 which was held at the University of California Santa Barbara during the period August 4 through 15 1969 One hundred seventy persons from twelve different countries attended the Institute The authors and the publisher have made a special effort for rapid publication of an up to date status of the particles and fields in the earth's magnetosphere which is an ever changing research area Special thanks are due to the lecturers for their diligent preparation and excellent presentations The individual lectures and the published papers were deliberately limited the author's cooperation in conforming to these specifications is greatly appreciated The contents of the book are organized by subject area rather than in the order in which papers were presented during the Institute Many thanks are due to Drs Kinsey Anderson Sam Bame Leverett Davis Gilbert Mead Harry Elliot Kenneth Behannon Reimar Lust A W Schardt Carl Gunne Eilthammar and Martin Walt who served as session chairmen during the Institute and contributed greatly to its success by skillfully directing the discussion period in a stimulating manner after each lecture Dr Martin Walt and the Summary Panel worked hard to prepare an excellent summary of various aspects of particles and fields in the magnetosphere at the end of the Institute *Dawn-Dusk Asymmetries in Planetary Plasma Environments* Stein Haaland, Andrei Runov, Colin Forsyth, 2017-10-04 DawnDusk Asymmetries in Planetary Plasma Environments Dawn dusk asymmetries are ubiquitous features of the plasma environment of many of the planets in our solar system They occur when a particular process or feature is more pronounced at one side of a planet than the other For example recent observations indicate that Earth's magnetopause is thicker at dawn than at dusk Likewise auroral breakups at Earth are more likely to occur in the pre midnight than post midnight sectors Increasing availability of remotely sensed and in situ measurements of planetary ionospheres magnetospheres and their interfaces to the solar wind have revealed significant and persistent dawn dusk asymmetries As yet there is no consensus regarding the source of many of these asymmetries nor the physical mechanisms by which they are produced and maintained Volume highlights include A comprehensive and updated overview of current knowledge about dawn dusk asymmetries in the plasma environments of planets in our solar system and the mechanisms behind them Valuable contributions from internationally recognized experts covering both observations simulations and theories discussing all important aspects of dawn dusk asymmetries Space weather effects are caused by processes in space mainly the magnetotail and can be highly localized on ground Knowing where the source i.e. where dawn dusk location is will allow for a better prediction of where the effects on ground will be most pronounced Covering both observational and theoretical aspects of dawn dusk asymmetries *Dawn Dusk Asymmetries in Planetary Plasma Environments* will be a valuable resource for academic researchers in space physics planetary science

In Nature's Name Barbara T. Gates,2002-04 From the late eighteenth to the early twentieth century hundreds of British women wrote about and drew from nature Some like the beloved children s author Beatrix Potter who produced natural history about hedgehogs as well as fiction about rabbits are still familiar today But others have all but disappeared from view Barbara Gates recovers these lost works and prints them alongside little known pieces by more famous authors like Potter s field notes on hedgehogs reminding us of better known stories that help set the others in context The works contained in this volume are as varied as the women who produced them They include passionate essays on the protection of animals vivid accounts of travel and adventure from the English seashore to the Indian Alps poetry and fiction and marvelous tales of nature for children Special features of the book include a detailed chronology placing each selection in its historical and literary context biographical sketches of each author s life and works a comprehensive bibliography of primary and secondary literature and over sixty illustrations An ideal introduction to women s powerful and diverse responses to the natural world *In Nature s Name* will be treasured by anyone interested in natural history women or Victorian and Edwardian Britain *Climatological Data* ,1953 **Physical Signatures of Magnetospheric Boundary Layer Processes** J.A. Holtet,A. Egeland,2012-12-06 Summary of the NATO Advanced Research Workshop on Physical Signatures of Magnetospheric Boundary Layer Processes T A POTEIRA M I PUDOVKIN R W SMITH V M VASYLIUNAS and A EGELAND 451 PREFACE These proceedings are based on the invited talks and selected research reports presented at the NATO Advanced Workshop on PHYSICAL SIGNATURES OF MAGNETOSPHERIC BOUNDARY LAYER PROCESSES held at Sundvolden Hotel Norway 9-14 May 1993 The international political and scientific communities have gradually realized that the Earth s environment is more fragile than previously believed This has led to the establishment of international research programmes directed toward the understanding of Global Change The Earth s magnetosphere the Earth space is a part of our environment and physical processes in the magnetosphere and coupling between the solar energy stream the solar wind

and the Earth space are important in the complete understanding of our environment Variations in the electromagnetic and particle energy output of the Sun have a significant effect on global changes The energy transfer mechanisms at the dayside magnetospheric boundary layers and their ionospheric signatures are perhaps even more important to solar terrestrial research than the night side processes in this connection The dayside boundary layers and the polar cusps are the Earth's windows to outer space The present NATO ARW was the latest in a series of conferences focused on dayside magnetospheric phenomena It is five years since the preceding Workshop on Electromagnetic Coupling in the Polar Clefts and Caps was held at Lillehammer in September 1988 Opuscula Entomologica ,1960
