growing acknowledgement of the values ensconced in pluralistic social structures this book examines the manner in which indigenous people can function in modern states preserving their traditional customs while simultaneously adapting aspects of their culture to the challenges posed by modern life Whereas it was formerly assumed that these tribal frameworks were doomed to extinction and some states even encouraged such a process there has been a revival in their vitality linked to a recognition of their rights The book offers a comprehensive survey of various aspects of tribal life focusing on political issues such as the meaning of sovereignty legal issues dealing with the role of custom and social issues concerned with sustaining communal life A focused study is made of a whole series of legal factors relating to possession and ownership of land religious rites the nature of polygamous marriages the assertion of group rites the manner of peacefully resolving disputes and allied questions Recent judicial decisions are analysed as a reflection of the far reaching changes that have taken place in a process that has seen the former disregard of basic rights of indigenous people being replaced by an awareness of the injustices perpetrated in the past and a willingness to seek to redress them The comparison between approaches of different English speaking countries provides an account of interwoven developments **Dryland Lament** Peter R.

Major,2011-04-13 In Grounded Vision William Major puts contemporary agrarian thinking into a conciliatory and productive dialogue with academic criticism He argues that the lack of participation in academic discussions means a loss to both agrarians and academics since agrarian thought can enrich other ongoing discussions on topics such as ecocriticism postmodernism feminism work studies and politics especially in light of the recent upsurge in grassroots cultural and environmental activities critical of modernity such as the sustainable agriculture and slow food movements American Georgics Edwin C. Hagenstein,Sara M. Gregg,Brian Donahue,2011-01-01 From Thomas Jefferson s Monticello to Michelle Obama s White House organic garden the image of America as a nation of farmers has persisted from the beginnings of the American experiment In this rich and evocative collection of agrarian writing from the past two centuries writers from

Hector St Jean de Crevecoeur to Wendell Berry reveal not only the great reach and durability of the American agrarian ideal but also the ways in which society has contested and confronted its relationship to agriculture over the course of generations. Drawing inspiration from Virgil's agrarian epic poem *Georgics*, this collection presents a complex historical portrait of the American character through its relationship to the land. From the first European settlers eager to cultivate new soil to the Transcendentalist utopian and religious thinkers of the nineteenth century, American society has drawn upon the vision of a pure rural life for inspiration. Back to the land movements have surged and retreated in the past centuries yet provided the agrarian roots for the environmental movement of the past forty years. Interpretative essays and a sprinkling of illustrations accompany excerpts from each of these periods of American agrarian thought, providing a framework for understanding the sweeping changes that have confronted the nation's landscape.
