Dorot Jewish Division. Oral History Collection, American Jewish Committee. Oral History Library, 1974 Economics as an Evolutionary Science Anna Sachko Gandolfi, 2018-02-06 Economics is traditionally taken to be the social science concerned with the production consumption exchange and distribution of wealth and commodities Economists carefully track the comings and goings of the human household whether written small microeconomics or large macroeconomics and attempt to predict future patterns under different situations However in constructing their models of economic behavior economists often lose sight of the actual characteristics and motivations of

their human subjects In consequence they have found the goal of an explanatory and predictive science to be elusive Economics as an Evolutionary Science reorients economics toward a more direct appreciation of human nature with an emphasis on what we have learned from recent advances in evolutionary science The authors integrate economics and evolution to produce a social science that is rigorous internally coherent testable and consistent with the natural sciences The authors suggest an expanded definition of fitness as in Darwin's survival of the fittest emphasizing not only the importance of reproduction and the quality of offspring but also the unique ability of humans to provide material wealth to their children The book offers a coherent explanation for the recent decline in fertility which is shown to be consistent with the evolutionary goal of maximizing genetic success In addition the authors demonstrate the relevance to economics of several core concepts derived from biologists including the genetics of parent offspring conflict inclusive fitness theory and the phenomena of R selection and K selection The keystone of their presentation is a cogent critique of the traditional concept of utility As the authors demonstrate the concept can be modified to reflect the fundamental evolutionary principle whereby living things including human beings have been selected to behave in a manner that maximizes their genetic representation in future generations Despite the extraordinary interest in applying evolutionary biology to other disciplines Economics as an Evolutionary Science marks the first major attempt at a synthesis of biology and economics Scholarly yet accessible this volume offers unique and original perspectives on an entire discipline *George Burns and Gracie Allen* Cynthia Clements, Sandra Weber, 1996-08-23 In the minds of today's audiences George Burns was a solo act But in the history of show business he will long be remembered for his work with Gracie Allen Few performers have enjoyed so much popular and critical acclaim Together they enjoyed phenomenal success in vaudeville radio television and film Although they were celebrities the two performers enjoyed a life remarkably free of scandal After the death of Allen in 1964 Burns made commercials a music video and an exercise video He wrote books and won numerous awards and his nightclub and convention appearances did not stop until shortly before his death Through a thoughtful biography and detailed entries this book serves as a comprehensive reference to the careers of Burns and Allen together and individually The biography summarizes their rise as vaudeville performers their work in a range of media and Burns continued achievements after Allen's death Sections of the book cover their work on the stage on radio on television and in films Each section provides detailed entries for their performances including cast and credit information plot synopses and review excerpts Appendices list their awards personal appearances and archives and an extensive annotated bibliography cites and discusses sources of additional information **Prayers for the closet and the family** George Burns (D.D.), 1862 **THE COMPLETE WORKS from LOST & FOUND TIMES 1979-2005 Introduction by Jack A.
