Geosciences on the Internet Andrew T. Stull, Duane A. Griffin, 1997-01-01 **Geoscience After IT** T.V.

Loudon, 2000-12-19 Most geoscientists are aware of recent IT developments but cannot spend time on obscure technicalities Few have considered their implications for the science as a whole Yet the information industry is moving fast electronic delivery of hyperlinked multimedia standards to support interdisciplinary and geographic integration new models to represent and visualize our concepts and control and manage our activities plummeting costs that force the pace To stay on course the scientist needs a broad appreciation of the complex and profound interactions of geoscience and IT not previously reviewed in a single work The book brings together ideas from many sources some probably unfamiliar that bear on the geoscience information system It encourages readers to give thought to areas that for various reasons they have taken for granted and to take a view on forces affecting geoscience the consequences for themselves and their organisations and the need to reconsider adapt and rebuild Practicing geoscientists with a general interest in how IT will affect their work and influence future directions of the science geoscientists familiar with IT applications in their own specialist field who need a broader perspective and students or educators specializing in IT applications in geoscience who require a top down overview of their subject will find this title valuable The IT background from this book should help geoscientists build a strategy for the new century Journal of Geoscience Education ,2007 Minerals Yearbook ,1997 *International Perspectives on Natural Disasters: Occurrence, Mitigation, and Consequences* Joseph P. Stoltman, John Lidstone, Lisa M. DeChano, 2007-03-11 Reports of natural disasters fill the media with regularity Places in the world are affected by natural disaster events every day Such events include earthquakes cyclones tsunamis wildfires the list could go on for considerable length In the 1990s there was a concentrated focus on natural disaster information and mitigation during the International Decade for Natural Disasters Reduction IDNDR The information was technical and provided the basis for major initiatives in building structures designed for seismic safety slope stability severe storm warning systems and global monitoring and reporting Mitigation or planning in the event that natural hazards prevalent in a region would suddenly become natural disasters was a major goal of the decade long program During the IDNDR this book was conceptualized and planning for its completion began The editors saw the need for a book that would reach a broad range of readers who were not actively or directly engaged in natural disasters relief or mitigation planning but who were in decision making positions that provided an open window for addressing natural disaster issues Those people were largely elected public officials teachers non governmental organization staff and staff of faith based organizations Those people for the most part come to know very well the human and physical characteristics of the place in which they are based With that local outreach in mind the editors intended the book to encourage readers to 1 *Library Literature* ,1998 Web Cartography Jan-Menno Kraak, Allan Brown, 2003-09-02 Maps and atlases are created as soon as information on our geography has been clarified They are used to find directions or to get

insight into spatial relations They are produced and used both on paper as well as on screen The Web is the new medium for spreading and using maps This book explains the benefits of this medium from the perspective of the user and the map provider Opportunities and pitfalls are illustrated by a set of case studies A website accompanies the book and provides a dynamic environment for demonstrating many of the principles set out in the text including access to a basic course in Internet cartography as well as links to other interesting places on the Web Professor Kraak looks at basic questions such as I have this data what can I do with it and discusses the various functions of maps on the web Web Cartography also looks at the particularities of multidimensional web maps and addresses topics such as map contents colour text and symbols map physics size and resolution and the map environment interface design site contents Choice ,1999 **The Changing Role of Geological Surveys** P.R. Hill,D. Lebel,M. Hitzman,M. Smelror,H. Thorleifson,2020-12-07 Senior managers and Heads of Geological Survey Organizations GSOs from around the world have contributed a collection of papers to provide a benchmark on how GSOs are responding to national and international needs in a rapidly changing world GSOs continue to provide key scientific information about Earth systems natural hazards and climate change As countries adopt sustainable development principles and the public increasingly turns to social media to find information about resource and environmental issues the generation and communication of Earth science knowledge become increasingly important This volume provides a snapshot of how GSOs are adapting their activities to this changing world The different national perspectives presented converge around several common themes related to resources environment and big data Climate change and the UN s Sustainable Development Goals provide an increased incentive for GSOs of the world to work in harmony to generate knowledge of Earth systems and to provide solutions for sustainable management of the planet The Current Role of Geological Mapping in Geosciences Stanislaw R. Ostaficzuk,2006-01-14 The book contains private views of experts from various countries on the role of geological mapping in sustainable development New technologies and concepts are presented which are either awaiting for recognition by Geological Surveys or are gradually applied in some survey The target of the book is well worded in the Summary and recommendations elaborated by the Ad Hoc Committee at the Advanced Research Workshop on Innovative Geological Cartography held under NATO sponsorship in Poland in November 2003 After the Summaries were issued by the end of 2003 the authors who presented their views at the Workshop gave a revised version of their papers with more new ideas and material Generally the book is addressed to cartographers in Geological Surveys geologists and geographers co operating with landuse planners ecologists and decision makers who may learn about the state of the art and the enormous information potential of the modern information technologies in Geosciences The book however gives no methodological recipes but as it was the authors intention may and shall be used as a guide book in modernizing Information Technologies at the local regional and national levels in Geosciences **Bulletin** ,1996 Monthly Catalog of United States Government Publications ,1998-07 History of Geoscience W. Mayer,R.M.

Clary, L.F. Azuela, T.S. Mota, S. Wołkowicz, 2017-06-06 The study of the Earth's origin, its composition, the processes that changed and shaped it over time, and the fossils preserved in rocks have occupied enquiring minds from ancient times. The contributions in this volume trace the history of ideas and the research of scholars in a wide range of geological disciplines that have paved the way to our present-day understanding and knowledge of the physical nature of our planet and the diversity of life that inhabited it. To mark the 50th anniversary of the founding of the International Commission on the History of Geology (INHIGEO), the book features contributions that give insights into its establishment and progress. In other sections, authors reflect on the value of studying the history of the geosciences and provide accounts of early investigations in fields as diverse as tectonics, volcanology, geomorphology, vertebrate palaeontology, and petroleum geology. Other papers discuss the establishment of geological surveys, the contribution of women to geology, and biographical sketches of noted scholars in various fields of geoscience.
