Geriatric Oncology Arti Hurria, Lodovico Balducci, 2009-07-14
Cancer and aging are integrally related Cancer incidence and mortality increase with age with most cancer diagnoses and deaths occurring in patients aged 65 and older The aging of the Baby Boomer population along with an overall increase in life expectancy points to a doubling of the U S population over age 65 by the year 2030 This demographic shift combined with the known association of cancer and aging is expected to bring about a rapid growth in the older cancer patient population It is clear that geriatric principles must become part of oncology care The evaluation and development of treatment recommendations for an older adult with cancer can be challenging for many reasons Tumor biology and response to therapy are affected by age In addition age related factors may impact treatment patterns tolerance and efficacy These age related factors include functional status declines comorbid conditions changes in cognitive function weakening of organ function decreases in physiologic reserve and faltering social support

Geriatric Oncology, An Issue of

Clinics in Geriatric Medicine Harvey Jay Cohen, Arati V. Rao, 2016-01-19 This issue of Clinics in Geriatric Medicine devoted to Geriatric Oncology is guest edited by Drs Harvey J Cohen and Arati V Rao of Duke University Medical Center Articles in this issue include Cancer and Aging General Principles Biology and Geriatric Assessment Cancer Screening in the Elderly Cancer Survivorship Management of Long term Toxicities Socioeconomic Considerations and Shared Care Models of Older Cancer Care Palliative Care and Symptom Management Management of Prostate Cancer in the Elderly Management of Breast Cancer in the Elderly Management of Lung Cancer in the Elderly Colorectal Cancer in the Elderly Myelodysplastic Syndrome and Acute Myeloid Leukemia in the Elderly Chronic Lymphocytic Leukemia and Other Lymphoproliferative Disorders and Monoclonal Gammopathies and Multiple Myeloma in the Elderly Practical Geriatric Oncology Arti Hurria, Harvey Jay Cohen, 2010-09-13 The risk of cancer increases with age and the number of older adults seeking treatment is increasing dramatically in line with the aging population The care of older patients differs from that of younger adults because of differences in the biology of the tumor age related differences in host physiology comorbidity burden and psychosocial issues which might impact the efficacy and side effects of cancer therapy Practical Geriatric Oncology is a comprehensive evidence based text that synthesizes the growing literature in this field and provides practical guidelines to the care of older adults with cancer Coverage includes patient assessment management of solid tumors and hematologic malignancies the impact of age on the pharmacology of cancer therapy surgical oncology and radiation oncology in the older adult symptom management and supportive care In addition to serving as core reading for oncologists and hematologists the book will also be a useful work for other healthcare professionals who provide oncology care including surgeons radiation oncologists palliative care doctors primary care providers geriatricians and nurses *Canine and Feline Geriatric Oncology* Alice Villalobos, 2017-11-29 Canine and Feline Geriatric Oncology Honoring the Human Animal Bond Second Edition provides a complete clinical approach to the most common neoplasias in geriatric dogs and cats Provides the tools needed to diagnose and treat aging pets with cancer and to help clients make the best decisions for themselves and their animals Addresses the what ifs that often arise during interactions with clients of aging pets with cancer and helps to determine when a pet should enter the hospice phase Features many vignettes and real life case studies to demonstrate the issues faced by clinicians and owners dealing with older dogs and cats with cancer and end of life issues Fully updated and expanded with new and revised information including new knowledge on palliative and hospice care and self care techniques for carers **Biological Basis of Geriatric Oncology** Lodovico Balducci, Martine Extermann, 2005 This volume highlights research issues specific to geriatric oncology in the field of carcinogenesis and cancer prevention and treatment based on the biologic interactions of cancer and age It conveys a sustainable way of thinking about cancer and aging Geriatric Oncology Martine Extermann, 2019 This book is intended as a comprehensive resource for clinicians and researchers seeking in depth information on geriatric oncology The coverage encompasses epidemiology the biology and patho physiology of aging and

cancer geriatric assessment and management hematologic malignancies solid tumors issues in patient care and research methods Since cancer is a disease of aging and people are living longer most cancer patients are now aged 70 and older Yet the more we age the more diverse we become in terms of our health biologic fitness and cancer behavior Typically however general oncology clinical trials address only a selected healthier and younger population of patients Geriatric oncology is the area of oncology that addresses these issues but while a wealth of knowledge has been accumulated information is often difficult to retrieve or insufficiently detailed The SpringerReference program in which this book is published offers an ideal format for overcoming these limitations since it combines thorough coverage with access to living editions constantly updated chapter by chapter via a dynamic peer review process ensuring that information remains current and pertinent

Geriatric Oncology Arti Hurria, Lodovico Balducci, 2009 The management of the older person with cancer is based on the estimate of life expectancy tolerance of treatment patient preference and socio economic barriers to treatment The thrust of this book is to make medical oncologists and other health professionals managing older patients with cancer aware of recent developments in geriatric assessment and in cancer management for the older adult After consulting this text the practitioner will be able to provide individualized treatment to the older cancer patient reflecting that patient's physiologic age and personal needs This book will also provide a scaffold to organize rapidly developing advances in geriatric assessment This is particularly relevant for oncologists since the majority of patients with cancer are 65 and older The target audiences for this book are oncologists of all specialties oncology nurses primary care physicians geriatricians and all other health professionals involved in the management of older patients with cancer *The Older Cancer Patient* Janine Overcash, PhD, ARNP, Lodovico Balducci, MD, 2003-04-30 Because cancer in the older adult may be present in combination with other chronic conditions including dementia and frailty multidisciplinary care is especially important This book provides nurses with essential information on the care and treatment of the older adult with cancer including An overview of cancer in the older adult and barriers to treatment Prevention and screening of cancer in the older adult How to perform a comprehensive geriatric assessment as a method for planning multidisciplinary care Practical applications of quality of life assessment and decision analysis Special considerations in radiation therapy and chemotherapy with the older adult Social and caregiver issues This book reflects lessons learned from a nurse physician team who planned and implemented the Senior Adult Oncology Program at the Moffit Cancer Center and Research Institute in Florida *Cancer and Aging* Martine Extermann, 2013 Outlining the complex interaction between the two phenomena Cancer is clearly an age related disease Recent research in both aging and cancer has demonstrated the complex interaction between the two phenomena This affects a wide spectrum of research and practice anywhere from basic research to health care organization Core examples of these close associations are addressed in this book Starting with basic research the first chapters cover cancer development mTOR inhibition senescent cells altering the tumor microenvironment and immune senescence affecting cancer vaccine

response Taking into account the multidisciplinary of geriatric oncology several chapters focus on geriatric and oncologic aspects in patient assessment treatment options nursing and exercise programs The book is rounded off by a discussion on the impact of the metabolic syndrome illustrating the interactions between comorbidity and cancer and a chapter on frailty This book provides the reader with insights that will hopefully foster his or her reflection in their own research and practice to further the development of this most exciting field Given the aging of the population worldwide and the high prevalence of cancer it is essential reading not only for oncologists and geriatricians but for all health practitioners **Geriatric**
