Theirs is an amazing wildly comical and very human journey through the Age of Dinosaurs **Where Do We Come From?**
Jan Klein, Naoyuki Takahata, 2013-03-09 From the moment it first began to contemplate the world three questions have occupied the human mind Where do we come from What are we Where are we going Artists notably Paul Gauguin religious thinkers philosophers and most recently scientists have all searched for answers Here the authors describe how scientists decipher human origin from the record encrypted in the DNA and protein molecules After explaining the nature of descent and the methods available for studying genealogical relationships they summarize the information revealed by the molecular archives about the Tree of Life and our location on one of its branches The knowledge thus gleaned allows them to draw conclusions about our identity our place in the living world our future and the ethical implications of the changed perspective

Why Us? James Le Fanu, 2010-04-06 In this daring treatise on the current state of scientific inquiry James Le Fanu challenges the common assumption that further progress in genetic research and neuroscience must ultimately explain all there is to know about life and man's place in the world On the contrary he argues the most recent scientific findings point to an unbridgeable explanatory gap between the genes strung out along the Double Helix and the beauty and diversity of the living world and between the electrical activity of the brain and the abundant creativity of the human mind His exploration of these mysteries and his analysis of where they might lead us in our thinking about the nature and purpose of human existence form the impassioned and riveting heart of *Why Us*
