What are we going to do with a parcel of old stones wrote the director of an African museum a century and a half ago when one of my ancestors presented him with a splendid collection of fossils of mammal like reptiles Old stones however intriguing are difficult to interpret dusty and do not fit well in the neatly ordered contents of a house of learning Archaean geology which is the study of the Earth s history in the period from after 9 the end of planetary accretion 4 5 4 4 x 10 years ago up to the beginning 9 of the Proterozoic 2 5 x 10 years ago is much the same a parcel of old stones seemingly impossible to understand Yet these stones contain the history of our origins they can tell us a story that is interesting not just to the geologist for whom this book is primarily written but instead addresses the human condition in general      *Geology and Gold Deposits of the Hemlo Area* Thomas Lloyd Muir, 1991
