The Allure of Nezahualcoyotl Jongsoo Lee, 2015-08 Lee offers a more realistic portrait of the legendary Aztec ruler Nezahualcoyotl derived from examination of original Nahuatl codices and poetry as well as Spanish chronicles The Rise of Civilizations Concerning Vedic Knowledge Henry Romano, Between 3300 and 2900 BC archaeologists believe that civilization the rise of Sumeria the Indus Valley Civilization and Egypt marked the beginning of complex cities The Neolithic Revolution when agriculture animal domestication pottery and the plow came together seems not to hold together as we explored in the final chapter of descending Treta Yuga There had already been millennia of critical discoveries and developments Why then the abrupt shift to city living stratified societies and overproduction of food and other goods for trade or export Archaeologists believe that man could finally do these things that he was using recent inventions to an additional advantage Our study of the yugas tells us that man suddenly wanted to do these things that he was using innovations known for millennia in new ways to suit his new motivation Several large cities existed before descending Dwapara Yuga but a new breed of city sprang up with Dwapara Yuga These were larger and more complex and built around commerce Many had shared granaries artisans districts and marketplaces and were typically made on trade routes along rivers and coasts We also see these cities first significant division of labor and societal stratification Artisans scribes and traders all became increasingly common occupations Furthermore there was of course the tax collector As a result governments began levying taxes on commerce as they had already levied tariffs on agriculture Sumeria and the city of Eridu are credited with being the first of the trend Urdu is believed to have risen along the banks of the Euphrates River around 3300 BC The famous city of Ur and dozens of others sprang up in the Tigris and Euphrates Valleys over the next 300 400 years and Babylon was not far behind Staging Words, Performing Worlds Gail A. Bulman, 2007 Staging Words presents new perspectives on Argentina Cuba Mexico and Venezuela and their theater by postulating that nation can be imagined and

reconstructed through the deliberate performance of intertexts The book shows how past artistic texts other plays stories newspaper articles songs or paintings can be manipulated and translated to create a new theatrical script and that this new script can expose an innovative space for interpreting the nation The introduction reviews theories of intertextuality nation and nationalism and applies them to Latin America Each chapter studies two to three plays and shows how the intertexts open up hidden connections and border spaces within texts and between texts that the new writer and reader fill with significance replacing the meaning of the pretext with their own This new textual voice permits texts to be restaged reconfigured and imagined in a way that is purely Latin American
