republic based on equal rights and consent of the people however it became important to establish that merit based rewards were within the grasp of ordinary Americans In response Americans embraced institutional merit in the form of procedures focused on drawing small distinctions among average people They also developed a penchant for increasing the number of winners in competitions what Kett calls selection in rather than selection out in order to satisfy popular aspirations Kett argues that values rooted in the Founding of the republic continue to influence Americans approach to controversies including those surrounding affirmative action which involve the ideal of merit Handbook of Motivation Science James Y.
