Nye,2021-04-27 How conflicting ideas of nature threaten to fracture America s identity Amber waves of grain purple mountain majesties American invest much of their national identity in sites of natural beauty And yet American lands today are torn by conflicts over science religion identity and politics Creationists believe that the Biblical flood carved landscapes less than 10 000 years ago environmentalists protest pipelines Western states argue that the federal government s land policies throttle free enterprise Native Americans demand protection for sacred sites In this book David Nye looks at Americans irreconcilably conflicting ideas about nature A landscape is conflicted when different groups have different uses for the same location for example when some want to open mining sites that others want to preserve or when suburban development impinges on agriculture Some landscapes are so degraded from careless use that they become toxic anti landscapes Nye traces these conflicts to clashing conceptions of nature ranging from pastoral to Native American to military industrial that cannot be averaged into a compromise Nye argues that today s environmental crisis is rooted in these conflicting ideas about land Depending on your politics global warming is either an inconvenient truth or fake news America s contradictory conceptions of nature are at the heart of a broken national consensus **Chronology of the Death Valley Region in California, 1849-1949, and Place Names of the Death Valley Region in California and Nevada, 1845-1947** Theodore Sherman Palmer,1989-01-01 Chronology and Names of the Death Valley Region in California 1849 1949 **Biographical Dictionary of American and Canadian Naturalists and Environmentalists** George A. Francaviglia,2005-03-07 The Great Basin was the last region of continental North America to be explored and mapped and it remained largely a mystery to Euro Americans until well into the nineteenth century In Mapping

and Imagination in the Great Basin geographer historian Richard Francaviglia shows how the Great Basin gradually emerged from its cartographic silence as terra incognita and how this fascinating process both paralleled the development of the sciences of surveying geology hydrology and cartography and reflected the changing geopolitical aspirations of the European colonial powers and the United States Francaviglia s interdisciplinary account of the mapping of the Great Basin combines a chronicle of the exploration of the region with a history of the art and science of cartography and of the political economic and cultural contexts in which maps are created It also offers a compelling wide ranging discussion that combines a description of the daunting physical realities of the Great Basin with a cogent examination of the ways humans from early Native Americans to nineteenth century surveyors to twentieth century highway and air travelers have understood defined and organized this space psychologically and through the medium of maps Mapping and Imagination in the Great Basin continues Francaviglia s insightful richly nuanced meditation on the Great Basin landscape that began in Believing in Place

**Archive Style** Robin Kelsey, 2007-06-05 Archive Style successfully and beautifully reconciles or rather intertwines two viewpoints hitherto considered incompatible the logic of the archive and the issue of individual style Robin Kelsey shows with great historical rigor how the styles of illustrators Schott O Sullivan and Jones emerged from the very necessities of survey work and from personal resistance to the social and political structures framing such work Archive Style visual history at its best is a landmark study of nineteenth century American visual and scientific culture Francois Brunet Professor of American Art and Literature Universit Paris Diderot Paris 7 France In this stunningly original book Robin Kelsey takes a fresh look at nineteenth century survey prints and photographs Insisting that the distinctive pictorial style of these pictures emerged in response to particular historical needs he makes the case for a truly interdisciplinary approach to images He combines an art historian s attention to artistic innovation with a historian s concern for the larger ambitions of the government surveys to argue that aesthetic style is the product of both individual talent and larger cultural constraints Martha A Sandweiss Professor of American Studies and History at Amherst College Robin Kelsey s Archive Style is by far the most stimulating imaginative and far reaching study of nineteenth century American visual culture I have come across in recent years Drawing upon a wealth of research as well as recent advances in critical theory Kelsey persuasively reconstructs the historical
