## **Georgia O'Keeffe Color And Conservation:**

**Georgia O'Keeffe** René Paul Barilleaux, Sarah Whitaker Peters, Georgia O'Keeffe, 2006 Georgia O'Keeffe 1887 1986 has become one of America's best known artists. This book, which accompanies an exhibition of the same name, centers on O'Keeffe's efforts to ensure proper conservation of the fragile surfaces of her paintings of bones, flowers, and landscapes. Based on previously unpublished correspondence between O'Keeffe and distinguished conservator Caroline Keck, this catalogue from the Mississippi Museum of Art presents entirely new information about the relationship between O'Keeffe's aesthetic vision and her distinctive handling of paint and pastel. O'Keeffe's use of color has long been regarded as a source of the great emotional power that animates her abstract renderings of natural forms. But little was known about her techniques because she surrounded her studio practices with a wall of secrecy. Her correspondence with Keck reveals that she was surprisingly traditional, sometimes making her own color chips and pastel sticks and even at times grinding her own pigments. The essays in *Georgia O'Keeffe Color and Conservation* consider the artist's enduring love of the very substance of color. Through close analysis of paintings and pastels with a continuous history of conservation, the essays document O'Keeffe's and Keck's painstaking efforts to restore damaged art to its original state. The discussion and accompanying illustrations will give readers an expanded understanding of the subtle beauty and diversity of O'Keeffe's painting methods.

*The Living Line* Robin Veder, 2015-04-07 Robin Veder s *The Living Line* is a radical reconceptualization of the development of late nineteenth and early twentieth century American modernism The author illuminates connections among the histories of modern art body cultures and physiological aesthetics in early twentieth century American culture fundamentally altering our perceptions about art and the physical and the degree of cross pollination in the arts *The Living Line* shows that American producers and consumers of modernist visual art repeatedly characterized their aesthetic experience in terms of kinesthesia the sense of bodily movement They explored abstraction with kinesthetic sensibilities and used abstraction to achieve kinesthetic goals In fact the formalist approach to

art was galvanized by theories of bodily response derived from experimental physiological psychology and facilitated by contemporary body cultures such as modern dance rhythmic gymnastics physical education and physical therapy Situating these complementary ideas and exercises in relation to enduring fears of neurasthenia Veder contends that aesthetic modernism shared industrial modernity's objective of efficiently managing neuromuscular energy In a series of finely grained and interconnected case studies Veder demonstrates that diverse modernists associated with the Armory Show the Soci t Anonyme the Stieglitz circle especially O Keeffe and the Barnes Foundation participated in these discourses and practices and that kin aesthetic modernism greatly influenced the formation of modern art in America and beyond This daring and completely original work will appeal to a broad audience of art historians historians of the body and American culture in general
