### **German Worker Working Class Autobiogra:**

The German Worker Alfred Kelly, 1987-11-20 In the two generations before World War I Germany emerged as Europe's foremost industrial power. The basic facts of increasing industrial output, lengthening railroad lines, urbanization, and rising exports are well known. Behind those facts, in the historical shadows, stand millions of anonymous men and women, the workers who actually put down the railroad ties, hacked out the coal, sewed the shirt collars, printed the books, or carried the bricks that made Germany a great nation. This book contains translated selections from the autobiographies of nineteen of those now forgotten millions. The thirteen men and six women who speak from these pages afford an intimate firsthand look at how massive social and economic changes are reflected on a personal level in the everyday lives of workers. Although some of these autobiographies are familiar to specialists in German labor history, they are virtually unknown and inaccessible to the broader audience they deserve. This book provides translations that are at once useful, interesting, and entertaining to a wide range of historians, students, and general readers.

**The French Worker** Mark Traugott, 2023-11-15 This anthology, drawn from the autobiographies of seven men and women whose lives span the nineteenth century, provides a rare glimpse of the everyday lives of workers in the age of early industrialization in France. Appearing for the first time in English, these stories vividly convey the ambitions, hardships, and reversals of ordinary people struggling to gain a measure of respectability. The workers' livelihoods are diverse: chair maker, embroiderer, joiner, mason, silk weaver, machinist, seamstress. Their stories of daily activities, work life, and popular politics are filled with lively, often poignant moments. We learn of dismal, unsanitary housing, disease, workplace accidents, and terrible hardship, especially for the children of the poor. We read of exploitation and injustice, of courtship and marriage, and of the sociability of the wine merchant's shop and the boardinghouse. Traugott's analytic introduction discusses the many shifts in French society during the nineteenth century. Used in combination with other sources, these autobiographies illuminate the relationship between changes in working conditions and in the forms of political participation and protest occurring as the century came to a close. This anthology, drawn from the autobiographies of seven men and women whose lives span the nineteenth century, provides a rare glimpse of the everyday lives of workers in the age of early industrialization in France. Appearing for the first time in English.

The Idea of Work in Europe from Antiquity to Modern Times Catharina Lis, 2016-12-05 This volume takes a fresh and innovative approach to the history of ideas of work, concerning perceptions, attitudes, cultures, and representations of work throughout Antiquity and the medieval and early modern periods. Focusing on developments in Europe, the contributors approach the subject from a variety of angles, considering aspects of work as described in literature, visual culture, and as perceived in economic theory. As well as external views of workers, the volume also looks at the meaning of work for the self-perception of various social groups, including labourers, artisans, merchants, and noblemen, and the effects of this on their self-esteem and social identity. Taking a broad chronological approach to the subject, it provides readers with a cutting-edge overview of research into the varying attitudes to

work and its place in pre industrial society      *The Happiness of the British Working Class* Jamie L. Bronstein, 2023-01-10 For working class life writers in nineteenth century Britain happiness was a multifaceted emotion a concept that could describe experiences of hedonic pleasure foster and deepen social relationships drive individuals to self improvement and lead them to look back over their lives and evaluate whether they were well lived However not all working class autobiographers shared the same concepts or valorizations of happiness as variables such as geography gender political affiliation and social and economic mobility often influenced the way they defined and experienced their emotional lives The Happiness of the British Working Class employs and analyzes over 350 autobiographies of individuals in England Scotland and Ireland to explore the sources of happiness of British working people born before 1870 Drawing from careful examinations of their personal narratives Jamie L Bronstein investigates the ways in which working people thought about the good life as seen through their experiences with family and friends rewarding work interaction with the natural world science and creativity political causes and religious commitments and physical and economic struggles Informed by the history of emotions and the philosophical and social scientific literature on happiness this book reflects broadly on the industrial era working class experience in an era of immense social and economic change      *The Stonemasons of Creuse in Nineteenth-century Paris* Casey Harison, 2008 The stonemasons were well known for their skills and their seasonal migration from central France but especially for their role in rebellion This book places the masons story within the larger history of nineteenth century Paris The coverage spans the long nineteenth century starting before 1789 and ending near 1914      *Class and Other Identities* Lex Heerma van Voss, Marcel van der Linden, 2002-06-01 With the onset of a more conservative political climate in the 1980s social and especially labour history saw a decline in the popularity that they had enjoyed throughout the 1960s and 1970s This led to much debate on its future and function within the historical discipline as a whole Some critics declared it dead altogether Others have proposed a change of direction and a more or less exclusive focus on images and texts The most constructive proposals have suggested that labour history in the past concentrated too much on class and that other identities of working people should be taken into account to a larger extent than they had been previously such as gender religion and ethnicity Although class as a social category is still as valid as it has been before the questions now to be asked are to what extent non class identities shape working people s lives and mentalities and how these are linked with the class system In this volume some of the leading European historians of labour and the working classes address these questions Two non European scholars comment on their findings from an Indian resp American point of view The volume is rounded off by a most useful bibliography of recent studies in European labour history class gender religion and ethnicity      *The Voice of the Past* Paul Thompson, 2017-02-24 Oral history gives history back to the people in their own words And in giving a past it also helps them towards a future of their own making Oral history and life stories help to create a truer picture of the past and the changing present documenting the lives and feelings of all kinds of people many otherwise hidden from history It explores personal and family

relationships and uncovers the secret cultures of work It connects public and private experience and it highlights the experiences of migrating between cultures At the same time it can bring courage to the old meaning to communities and contact between generations Sometimes it can offer a path for healing divided communities and those with traumatic memories Without it the history and sociology of our time would be poor and narrow In this fourth edition of his pioneering work fully revised with Joanna Bornat Paul Thompson challenges the accepted myths of historical scholarship He discusses the reliability of oral evidence in comparison with other sources and considers the social context of its development He looks at the relationship between memory the self and identity He traces oral history through its own past and weighs up the recent achievements of a movement which has become international with notably strong developments in North America Europe Australia Latin America South Africa and the Far East despite resistance from more conservative academics This new edition combines the classic text of *The Voice of the Past* with many new sections including especially the worldwide development of different forms of oral history and the parallel memory boom as well as discussions of theory in oral history and of memory trauma and reconciliation It offers a deep social and historical interpretation along with succinct practical advice on designing and carrying out a project *The Voice of the Past* remains an invaluable tool for anyone setting out to use oral history and life stories to construct a more authentic and balanced record of the past and the present **Reading**

**Literacy Practices of the Laboring Poor in France, 1800-1860** Steven Edward Rowe, 2002 Against Capitalism William A. Pelz, 2007 Typically the gains in living standards and political rights of Europeans are presented as flowing from the good graces of industrial capitalism In reality as this book proves it was the massive militant struggle of millions of average persons who forced concessions such as the welfare state and free elections to Parliament Without understanding the revolutionary vision and the pressure it placed on European rulers it is difficult to understand contemporary society

**The Red Flag** David Priestland, 2016-05-03 The best and the most accessible one volume history of communism now available A far reaching vividly written account Foreign Affairs In The Red Flag Oxford professor David Priestland tells the epic story of a movement that has taken root in dozens of countries across two hundred years from its birth after the French Revolution to its ideological maturity in nineteenth century Germany to its rise to dominance and subsequent fall in the twentieth century Beginning with the first modern Communists in the age of Robespierre Priestland examines the motives of thinkers and leaders including Marx Engels Lenin Stalin Castro Che Guevara Mao Ho Chi Minh Gorbachev and many others Priestland also shows how Communism in all its varieties appealed to different societies for different reasons in some as a response to

inequalities and in others more out of a desire to catch up with the West But paradoxically while destroying one web of inequality Communist leaders were simultaneously weaving another It was this dynamic together with widespread economic failure and an escalating loss of faith in the system that ultimately destroyed Soviet Communism itself At a time when global capitalism is in crisis and powerful new political forces have arisen to confront Western democracy The Red Flag is essential reading if we are to apply the lessons of the past to navigating the future Detailed and scholarly but written in lively prose this is a rich satisfying account of the most successful utopian political movement in history Publishers Weekly starred review
