**Deborah Ascher Barnstone**

## Germany Architecture:

*Colonialism and Modern Architecture in Germany* Itohan Osayimwese, 2017-07-19 Over the course of the nineteenth century drastic social and political changes technological innovations and exposure to non Western cultures affected Germany's built environment in profound ways The economic challenges of Germany's colonial project forced architects designing for the colonies to abandon a centuries long highly ornamental architectural style in favor of structural technologies and building materials that catered to the local contexts of its remote colonies such as prefabricated systems As German architects gathered information about the regions under their influence in Africa Asia and the Pacific during expeditions at international exhibitions and from colonial entrepreneurs and officials they published their findings in books and articles and organized lectures and exhibits that stimulated progressive architectural thinking and shaped the emerging modern language of architecture within Germany itself Offering in depth interpretations across the fields of architectural history and postcolonial studies Itohan Osayimwese considers the effects of colonialism travel and globalization on the development of modern architecture in Germany from the 1850s until the 1930s Since architectural developments in nineteenth century Germany are typically understood as crucial to the evolution of architecture worldwide in the twentieth century this book globalizes the history of modern architecture at its founding moment **Before the Bauhaus** John V. Maciuika, 2005-05-05 Publisher Description *Architektur in Deutschland 1919-1939* Kennie Ann Laney-Lupton, Wojciech G. Lesnikowski, 1994 Such eclectic pluralism gives the lie to two widely held assumptions about modernist architecture in Germany that it was synonymous with Bauhaus style functionalism and that it came to an abrupt end with the Nazis accession to power in 1933 **The Transparent State** Deborah Ascher Barnstone, 2004-11-10 Examining the transformation of transparency as a metaphor in West German political thought to an analogy for democratic architecture this book questions the prevailing assumption in German architectural circles that transparency in governmental buildings can be equated with openness accessibility and greater democracy The Transparent State traces the development of transparency in German political and architectural culture tying this lineage to the relationship between culture and national identity a connection that began before unification of the German state in the eighteenth century and continues today The Weimar Republic and Third Reich periods are examined although the focus is on the postwar period looking at the use of transparency in the three projects for a national parliament the 1949 Bundestag project by Hans Schwippert the 1992 Bundestag building by Gunter Behnisch and the 1999 Reichstag renovation by Norman Foster Transparency is an important issue in contemporary architectural practice this book will appeal to both the practising architect and the architectural historian **Germany For Dummies** Donald Olson, 2009-07-01 From the Bavarian Alps to the Rhine from Berlin to the Black Forest Germany is packed with beer gardens castles art culture and a hopping nightlife Take it all in with this handy guide to your perfect Teutonic adventure Complete coverage of the big cities and small towns from Berlin and Munich to the

spa town of Baden Baden The best castles and palaces including the fairy tale style castles Neuschwanstein and Linderhof Suggestions for kid friendly attractions hotels and restaurant The country s best wines and wine regions Like every For Dummies travel guide Germany For Dummies Third Edition includes Down to earth trip planning advice What you shouldn t miss and what you can skip The best hotels and restaurants for every budget Lots of detailed maps *Modern Religious Architecture in Germany, Ireland and Beyond* Lisa Godson, Kathleen James-Chakraborty, 2019-03-07 Modernity and religion are not mutually exclusive Setting German and Irish church synagogue and mosque architecture side by side over the last century highlights the place for the celebration of the new within faiths whose appeal lies in part in the stability of belief they offer across time Inspired by radically modern German churches of the 1920s and 1930s this volume offers new insights into designers of all three types of sacred buildings working at home and abroad It offers new scholarship on the unknown phenomenon of mid century ecclesiastical architecture in sub Saharan Africa by Irish designers a critical appraisal of the overlooked Frank Lloyd Wright trained Andrew Devane and an analysis of accommodating difficult pasts and challenging futures with contemporary synagogue and mosque architecture in Germany With a focus on influence and processes alongside conservationists and historians it features critical insights by the designers of some of the most celebrated contemporary sacred buildings including Niall McLaughlin who writes on his multiple award winning Bishop Edward King Chapel and Amandus Sattler architect of the innovative Herz Jesu Kirche Munich **Germany** Christiane Freifrau von Richthofen, 1992 **Sustainable Architecture and Urbanism** Dominique Gauzin-Müller, 2002-07-01 Since the mid 1980s and in particular the 1992 environmental summit in Rio de Janeiro sustainability has become a global issue and the subject of international debate In the context of architecture sustainability implies the use of intelligent technology innovative construction methods ecologically friendly materials and use of environmentally friendly energy resources This book begins with an overview of the various approaches and developments in sustainable architecture followed by an in depth section on urbanism looking at several European towns In the third section the technologies materials and methods of ecological architecture are examined Concluding the volume are 23 sophisticated and innovative European case studies The author and architect Dominique Gauzin Müller has specialised on energy and environmental issues and ecological architecture for over 15 years **Modernism as Memory** Kathleen James-Chakraborty, 2018-01-15 After World War II West Germans and West Berliners found ways of communicating both their recent sufferings and aspirations for stable communities through buildings that fused the ruins of historicist structures with new constructions rooted in the modernism of the 1910s and 20s As Modernism as Memory illustrates these postwar practices undergird the approaches later taken in influential structures created or renovated in Berlin following the fall of the Wall including the Jewish Museum and the Reichstag the New Museum and the Topography of Terror While others have characterized contemporary Berlin s museums and memorials as postmodern Kathleen James Chakraborty argues that these environments are examples of an architecture of modern memory

that is much older more complex and historically contingent She reveals that churches and museums repaired and designed before 1989 in D ren Hanover Munich Neviges Pforzheim Stuttgart and Weil am Rhein contributed to a modernist precedent for the relationship between German identity and the past developed since then in the Ruhr region and in Berlin Modernism as Memory demonstrates that how one remembers can be detached from what one remembers contrasting ruins with recollections of modernism to commemorate German suffering the Holocaust and the industrial revolution as well as new spaces for Islam in the country
