United States. National Aeronautics and Space Administration, 1968 *Apollo Moon Missions* Billy Watkins, 2007-12-01 In 1961 President John F Kennedy challenged the United States to land a man on the moon and return him safely to Earth before the end of the decade It seemed like an impossible mission and one that the Russians who had launched the first satellite and put the first man into Earth orbit would surely achieve before the Americans However the ingenuity passion and sacrifice of thousands of ordinary people from all walks of life enabled the space program to meet this extraordinary goal This is the story of fourteen of those men and women who worked behind the scenes without fanfare or recognition to make the Apollo missions successful [Come Fly with Me!](#) David C. Miller, 2022-05-04 In the late twentieth century we saw on television the first man to ever walk on the Moon my great great grandfather Neil Armstrong And then as the years went by there were movies and television shows that depicted space travel out in the universe Other solar systems were visited and other intelligent life forms were encountered most of them unfriendly It was very exciting and allowed our imagination to run free It was as if we were there and things were really happening It was an amazing thought But that allowed for a giant leap forward from walking on the Moon But what happened between walking on the Moon and visiting other solar systems There would have to be a first time a first mission out of our solar system The Genesis mission was that first time A lot was learned and tragedy narrowly escaped Future missions will rely on what we found out there and in some ways they will know what to expect **Congressional Record** United States.
