Fibreglass Boats Hugo du Plessis, 2005-12-01 Since it was first published 40 years ago Hugo du Plessis *Fibreglass Boats* has become a classic relied upon by owners surveyors and boat builders keen to understand how fiberglass behaves and obtain practical advice on working with GRP In a deliberately non technical manner he explains the peculiar nature of fiberglass its durability its weaknesses where it is likely to fail the effects of use and the weather plus the latest research into causes of the biggest worry for owners blistering and osmosis This masterly work will continue to be an invaluable source of reference for anyone wanting practical advice on working with GRP in order to make repairs and improvements correctly and thus extend the life of their boat *Fiberglass Boats* Hugo Du Plessis, 1996 Since its first edition in 1964 owners and professionals have relied upon this classic reference to understand the many facets of fiberglass boat construction Now completely updated it is an invaluable nontechnical resource for expert information on the principles of fiberglass construction as *Heart of Glass: Fiberglass Boats and the Men Who Built Them* Daniel Spurr, 2004-02-06 The fascinating story of fiberglass boats and the mavericks who dreamed them Nine out of ten sailors today own sturdy often beautiful fiberglass craft Fiberglass brought boating to the non rich but the history of that revolution has never been told Daniel Spurr rectifies this omission with his highly readable and affectionate account of the fiberglass boat from its earliest incarnation in World War II to the present day In the early days when shoestring genius was unfettered by industrial efficiency there were boats with tailfins boats baked in ovens and boats designed to be dropped from planes The voyage from those first ugly ducklings to the graceful boats of the 1990s makes a riveting adventure of triumph and ruin Along the way Spurr profiles landmark designs that now set the standards in the used boat market and he portrays the revolution in human terms introducing us to the vivid personalities who invented often in their garages and rarely at a profit the world of boating we know today
