Fields Of Wheat Hills Of Blood:

Fields of Wheat, Hills of Blood Anastasia N. Karakasidou, 2009-02-15 Deftly combining archival sources with evocative life histories Anastasia Karakasidou brings welcome clarity to the contentious debate over ethnic identities and nationalist ideologies in Greek Macedonia Her vivid and detailed account demonstrates that contrary to official rhetoric the current people of Greek Macedonia ultimately derive from profoundly diverse ethnic and cultural backgrounds Throughout the last century a succession of regional and world conflicts economic migrations and shifting state formations has engendered an intricate pattern of population movements and refugee resettlements across the region Unraveling the complex social political and economic processes through which these disparate peoples have become culturally amalgamated within an overarchingly Greek national identity this book provides an important corrective to the Macedonian picture and an insightful analysis of the often volatile conjunction of ethnicities and nationalisms in the twentieth century Combining the thoughtful use of theory with a vivid historical ethnography this is an important courageous and pioneering work which opens up the whole issue of nation building in northern Greece Mark Mazower University of Sussex

Two Oxen Ahead Paul Halstead, 2014-01-22 TWO OXEN AHEAD This revealing study of farming practices in societies around the Mediterranean draws out the valuable contribution that knowledge of recent practices can make to our understanding of husbandry in prehistoric and Greco Roman times It reflects increased academic interest in the formative influence of farming regimes on the societies they were designed to feed The author's intensive research took him to farming communities around the Mediterranean where he recorded observational and interview data on differing farming strategies and practices many of which can be traced back to classical antiquity or earlier The book documents these variables through the annual cycle from ploughing and sowing to harvesting and threshing interannual schemes of crop rotation and husbandry and the generational cycle of household development It traces the interdependence of these successive stages and explores how cultural tradition ecological conditions and access to resources shape variability in husbandry practice Each chapter identifies ways in which heuristic use of data on recent farming can shed light on ancient practices and societies

Extreme Politics Charles King, 2010-01-14 Why do some violent conflicts endure across the centuries while others become dimly remembered ancient struggles among forgotten peoples Is nationalism really the powerful force that it appeared to be in the 1990s This wide ranging work examines the conceptual intersection of nationalist ideology social violence and the political transformation of Europe and Eurasia over the last two decades The end of communism seemed to usher in a period of radical change an era of extreme politics that pitted nations ethnic groups and violent entrepreneurs against one another from the wars in the Balkans and Caucasus to the apparent upsurge in nationalist mobilization throughout the region But the last twenty years have also illustrated the incredible diversity of political life after the end of one party rule Extreme Politics engages with themes from the micropolitics of social violence to the history of nationalism
