Fieldwork A Mystery:

Fieldwork Maureen Moore, 1987 Ethnographic Fieldwork Antonius C. G. M. Robben, Jeffrey A. Sluka, 2012-01-24 Newly revised Ethnographic Fieldwork An Anthropological Reader Second Edition provides readers with a picture of the breadth variation and complexity of fieldwork The updated selections offer insight into the ethnographer's experience of gathering and analyzing data and a richer understanding of the conflicts hazards and ethical challenges of pursuing fieldwork around the globe Offers an international collection of classic and contemporary readings to provide students with a broad understanding of historical methodological ethical reflexive and stylistic issues in fieldwork Features 16 new articles and revised part introductions with additional insights into the experience of conducting ethnographic fieldwork Explores the importance of fieldwork practice in achieving the core theoretical and methodological goals of anthropology Highlights the personal and professional challenges of field researchers from issues of professional identity fieldwork relations activism and the conflicts hazards and ethical concerns of community work Anthropological Fieldwork James Davies, Dimitrina Spencer, 2020-05-22 Anthropologists are affected by and affect others through emotional engagement they manage emotions or allow them to unfold as vehicles of understanding The contributors to this volume argue that participant observation is an embodied relational process mediated by emotions If fieldwork is to attain its fullest potential emotional reflexivity must complement the wider reflexive task of anthropologists This makes particular demands on the training of anthropologists and the contributors to this volume propose new ways of practising emotional reflexivity such as radical empiricism that enhance anthropological knowledge Emotions in anthropology are explored from a variety of methodological and theoretical standpoints drawing on fieldwork in Nepal the UK Taiwan Russia India and the Philippines **A Surface Resistivity** Method for Measuring Hydrologic Characteristics of Jointed Formations Patricia J. Leonard-Mayer, 1984 Report of Investigations ,1984 Torn Many Ways Max Krüger, Debora De Castro Leal, David Randall, Peter Tolmie, 2023-10-09 This edited collection brings together a range of experiences from the field largely in the context of CSCW and HCI It focuses specifically on the experiences of people who have worked in difficult tense delicate and sometimes conflictual and dangerous settings The tensions faced by researchers and more importantly how they manage to deal with them are often under remarked Unlike the bulk of published ethnographic work the chapters in this book deal more explicitly with the various practical problems that researchers with varying degrees of experience face Our aim in this book is to give a voice to researchers who have sometimes contended with unexpected issues and who sometimes have had to face them on their own We explore incidents which may entail emotional conflict embarrassment and shame feelings of isolation arguments with other members of a team political pressures and ideological confusions to name but a few Senior figures in research laboratories and elsewhere may provide intellectual direction and support but may not always recognise the personal and problematic nature of qualitative enquiry undertaken by relatively inexperienced researchers. The chapters examine feelings

of isolation the difficulty of taking sides the negotiation of personal ethical and political pressures in the field and dealing with conflicting visions of what the research should be about The book is a resource for those embarking on the challenges of working in unfamiliar or difficult settings and moreover should act as a reminder to academics who might have forgotten the practical issues that researchers can face and how they deal with them **Surviving Fieldwork** Nancy Howell,1990

Critical Management Research Emma Jeanes, Tony Huzzard, 2014-10-01 This is an invaluable collection of reflections and experiences from world class researchers undertaking Critical Management Studies CMS The editors and contributors reflect on ethics and reflexivity in critical management research and explore the identity of the critical researcher both as an individual and working within collaborative projects Using contemporary accounts from those engaged in real world fieldwork they outline what critical management is and explore its relationship to management research The book discusses the implications of critical management when Developing research questions Managing research relationships Using various methods of data collection Writing accounts of your research findings and analysis Grounded in practical problems and processes this title sets out and then answers the challenges faced by critical researchers doing research in organization and management studies Doing Anthropological Research Natalie Konopinski, 2013-08-15 Doing Anthropological Research provides a practical toolkit for carrying out research It works through the process chapter by chapter from the planning and proposal stage to methodologies secondary research ethnographic fieldwork ethical concerns and writing strategies Case study examples are provided throughout to illustrate the particular issues and dilemmas that may be encountered This handy guide will be invaluable to upper level undergraduate and postgraduate students who are studying or intending to use anthropological methods in their research Fieldwork, Participation and Practice Marlene de Laine, 2000-12-19 This timely and topical look at the role of ethics in fieldwork takes into account some of the major issues confronting qualitative researchers The main purposes of this book are twofold to promote an understanding of the harmful possibilities of fieldwork and to provide ways of dealing with ethical problems and dilemmas To these ends examples of actual fieldwork are provided that address ethical problems and dilemmas and posit ways of dealing with them On Knowing Humanity Eloise Meneses, David Bronkema, 2017-07-14 The development of a phenomenological approach to religion and the rise of perspectivism are challenging anthropology s exclusive rootedness in the ontology of secularism When considered with the increased interest in the anthropology of religion as an area of study it is clear that there is a growing need for non reductionist representations of Christian thought and experience in ethnography This volume is intended as a critique of anthropology s epistemological and ontological assumptions and a demonstration of the value added by an expanded set of parameters for the field The book s core argument is that while ethnographers have allowed their own perspectives to be positively influenced by the perspectives of their informants until recently anthropology has done little in the way of adopting these other viewpoints as critical tools for analysis precisely because it has represented those viewpoints from a limited

epistemological perspective With chapters organized around topics in epistemology and ontology written by scholars of anthropology theology and history and an afterword by Joel Robbins the book is essential reading for scholars of the anthropology of religion as well as other philosophically oriented social scientists theologians and those who are interested in gaining further insight into the human condition The Book of all 20 Methodologies to Improve and Profit from Customer Experience and Service Heverton Anunciação, 2023-12-04 In the past medicine worked like this a patient looked for a doctor who evaluated him carefully After the evaluation the doctor said to the patient Are you willing to abandon everything that has made you sick so far Only then do I accept to be your doctor Now I ask you Is your company willing to abandon all the bad processes and bad strategies that have given your customers a bad experience. The big problem is that in many cases we look for doctors pharmacists and software resellers and what they want most is to recommend medicines and CRM systems for a temporary cure or imaginary cure to serve the media or advertising What's wrong with that It is that in the customer service sector the side effect is worse than acting directly on the cause of the corporate pains that cause the bad experience to customers If professionals don t know how to hire and build a long term strategy your suppliers will always want you to come back for new software purchases and more software and not for a permanent cure The objective of this book is to bring the most widely used and effective standards on the market to serious professionals who really want to embrace and offer excellent customer service There is no methodology that will solve everything overnight but the right methodology will help the company to respond quickly and without repression As the conclusion I wrote in this book too a table that help you to identify Why when and how to use each one of those worldwide methodologies or tools to improve and profit from your customer service This book is part of the CRM and Customer Experience Trilogy called CX Trilogy which aims to unite the worldwide community of CX Customer Service Data Science and CRM professionals I believe that this union would facilitate the contracting of our sector and profession as well as identifying the best professionals in the market The CX Trilogy consists of 3 books and one Dictionary 1st 30 Advice from 30 greatest professionals in CRM and customer service in the world 2nd The Book of all Methodologies and Tools to Improve and Profit from Customer Experience and Service 3rd Data Science and Business Intelligence Advice from reputable Data Scientists around the world and plus the book The Official Dictionary for Internet Computer ERP CRM UX Analytics Big Data Customer Experience Call Center Digital Marketing and Telecommunication The Vocabulary of One New Digital World Redeeming Anthropology Khaled Furani, 2019-09-12 Anthropologists have invariably engaged in their discipline as a form of redemption whether to escape from social restriction nourish their souls reform their home polities or vindicate the natives Redeeming Anthropology explores how in pursuit of a secular science sired by the Enlightenment adherents to a faith in mankind have vacillated between rejecting and embracing theology albeit in concealed and contradictory ways Mining the biographical registers of the American British and French anthropological traditions Khaled Furani argues that despite all efforts to the contrary

theological sediments remain in this disciplining discipline Rather than continuing to forget deny and sequester it theology can serve as a mirror for introspection as a source of critique offering invaluable tools for revitalization for thinking anew not only anthropology s study of others cultures but also its very own reason Field Work Charles William Finley, James Sterling Tippett, James S. Tippett, 1925 Constructing Research Questions Mats Alvesson, Jorgen Sandberg, 2013-02-28 All researchers want to produce interesting and influential theories A key step in all theory development is formulating innovative research questions that will result in interesting and significant research Traditional textbooks on research methods tend to ignore or gloss over actual ways of constructing research questions In this text Alvesson and Sandberg develop a problematization methodology for identifying and challenging the assumptions underlying existing theories and for generating research questions that can lead to more interesting and influential theories using examples from across the social sciences Established methods of generating research questions in the social sciences tend to focus on gap spotting which means that existing literature remains largely unchallenged. The authors show the dangers of conventional approaches providing detailed ideas for how one can work through such problems and formulate novel research questions that challenge existing theories and produce more imaginative empirical studies Constructing Research Questions is essential reading for any researcher looking to formulate research questions that are interesting and novel The Anthropology of Religion, Magic, and Witchcraft Rebecca L. Stein, Philip L. Stein, Benjamin R. Kracht, Marjorie M. Snipes, 2024-07-16 This concise and accessible textbook introduces students to the anthropological study of religion It examines religious expression from a cross cultural perspective and exposes students to the complexities of religion in small scale and complex societies The chapters incorporate key theoretical concepts and a wide range of ethnographic material The fifth edition of The Anthropology of Religion Magic and Witchcraft offers a revised introduction covering the foundations of the anthropology of religion anthropological methods and a push toward decolonizing the anthropology of religion expanded coverage of symbols healing wizardry and the intersections of religion with other social institutions new case study material with examples drawn from around the globe especially from Indigenous communities marginalia in each chapter introducing provocative small case examples related to the chapter many of these can be used as prompts for further research small in class case studies or examples for hands on learning a new chapter on religion and healing especially useful for Anthropology programs without representation of four fields as it provides a wider and more interdisciplinary application of the discipline a consistent review of foundations from chapter to chapter linking material and enabling students to connect what they are learning throughout the course and further resources via a comprehensive companion website including interactive activities critical case studies updated study questions bibliographical suggestions including video and color images This is an essential guide for students encountering the anthropology of religion for the first time and also for those with an ongoing interest in this fascinating field Field Work John D. Nesbitt, Effects of Repeated Blasting on a Wood-frame House, 1984 The Study of

Ethnomusicology Bruno Nettl,1983 Building Communication Theories Fred L. Casmir,2013-10-16 Concern with various matters related to humans as they communicate has led to an increase in both research and theorizing during the second half of the 20th century As a matter of fact so many scholars and so many disciplines have become involved in this process that it is virtually impossible to understand and appreciate all that has been accomplished so far This book focuses on one important aspect of human sense making theory building and strives to clarify the thesis that theories do not develop in some sort of social intellectual or cultural vacuum They are necessarily the products of specific times insights and mindsets Theories dealing with the process of communication or communicating are tied to socio cultural value systems and historic factors that influence individuals in ways often inadequately understood by those who use them The process orientation of this book inevitably leads to an emphasis on the perceptions of human beings Thus the focus shifts from the subject or area called communication to the act of communicating Finally this volume offers insight into how the process of human sense making has evolved in those academic fields commonly identified as communication rhetoric speech communication or speech within specific socio cultural settings
