produced this for my own use only but figured that others may like to take advantage of what I've done Does this mean that the print is just smaller No not at all If you are familiar with these exercises you will know that they are repeated patterns which ascend and descend for two octaves diatonically To condense and simplify them and consequently eliminate an enormous amount of page turns I have shown the all important fingering on the first pattern as per the original then the repeated second pattern then changeover patterns between ascending and descending which are sometimes slightly different then finally the last pattern of each exercise which again is often very slightly different All of the exercises can be heard if required in the pdf version a free link is given at the end of the book **Catalogue ...** Dartmouth College,1901
