## **Lacan And The Human Sciences:**

**Lacan & the Human Sciences** Alexandre Leupin, 1991-01-01 The psychoanalyst Jacques Lacan 1901-81 left a legacy of thought that increasingly commands the attention of American scholars and critics His provocative essays and wide ranging seminars and lectures attempted with remarkable success to bridge the supposedly unbridgeable gap between the humanities and modern science For some time his influence has shadowed the theoretical work being done in philosophy psychology anthropology women's studies and literature In *Lacan and the Human Sciences* eight eminent scholars examine how ideas entered these fields how well they were understood and adapted and what fruit they have produced The editor Alexandre Leupin whose introduction reveals the underpinnings of Lacan's thought views the book as a blueprint for overcoming the present impasses of scientific and humanistic discourses and their imaginary contradictions The essays demonstrate the interdisciplinary nature of Lacanian psychoanalysis The relevance of his work to epistemology is considered by Jean-Claude Milner François Regnault and Ellie Ragland Sullivan to anthropology by Jean-Joseph Goux to feminist studies by Jane Gallop and to literature by Dennis Porter and Denis Hollier The result is a book that points to a new and more pertinent way of dealing on one hand with the problems of epistemology and on the other with the question of literary theory in the humanities

**Lacan & the Human Sciences**, 1991 *Psychoanalysis and the Human Sciences* Louis Althusser, 2016-09-06 What can psychoanalysis a psychological approach developed more than a century ago offer us in an age of rapidly evolving hard to categorize ideas of sexuality and the self Should we abandon Freud's theories completely or adapt them to new findings and the new relationships taking shape in modern liberal societies In a remarkably prescient series of lectures delivered in the early 1960s the French philosopher Louis Althusser anticipated the challenges that psychoanalytic theory would face as politics moved away from structuralist frameworks and toward the elastic possibilities of anthropological and sociological thought *Psychoanalysis and the Human Sciences* translates Althusser's remarkable seminars into English for the first time making available to a wider audience the origins and potential future of radical political theory Althusser takes the important step in these lectures of distinguishing psychoanalysis from psychology and especially psychiatry which long resisted Freud's analytical concepts of the unconscious and overdetermination By freeing psychoanalysis from this bind Althusser can then apply these analytical concepts to the social and the political integrated with Marxist theory The result is an enlivened methodology for comprehending social organization and change that had a profound influence on the Frankfurt School and scholars who continue to work at the forefront of radical thought today Judith Butler Étienne Balibar and Alain Badiou

**Lacan, Jouissance, and the Social Sciences** Raul Moncayo, 2023-06-28 Exploring how a Freudian Lacanian approach to psychoanalysis intersects with social and cultural theory *Lacan Jouissance and the Social Sciences* demonstrates the significance of subjectivity as a concept for the study of leadership social psychology culture and political theory Raul Moncayo examines Lacan's notion of surplus jouissance in relation to four types

of socio economic value Productive Value Exchange Value Surplus Value and Profit Also drawing on the work of Slavoj i ek Moncayo contends that surplus production cannot be reduced to alienated labor but rather includes various levels of jouissance value In this way the jouissance that drives capitalization and organization can be theorized as constructive rather than destructive and encompass satisfaction and prosperity rather than individual suffering and asceticism or living with less This volume will be of great interest to psychoanalysts both in practice and in training and to academics and scholars of psychoanalytic studies Lacanian studies and social sciences

**Piaget, Philosophy, and the Human Sciences** Hugh J. Silverman,1997 Leading scholars place Piaget s theory of the development and nature of knowledge in the context of twentieth century European thought and compare his views with those of Freud Lacan Heidegger Foucault and writers of the Frankfurt school Piaget Philosophy and the Human Sciences surveys Piaget s work from a number of angles General discussions of the main conceptual oppositions of this theory are balanced with more specific debates Links between Piagetian and Freudian theory are explored as are links between Piaget s theory of self knowledge Foucault s account of discursive knowledge practices and Lacan s views on the symbolic power of language

Geography, History and Social Sciences Georges B. Benko,Ulf Strohmayer,2013-06-29 Georges Benko Societies are much messier than our theories of them Michael Mann The Sources of Social Power 1 Towards a unified social theory Why are there communication problems between the different disciplines of the social sciences And why should there be so much misunderstanding Most probably because the encounter of several disciplines is in fact the encounter of several different histories and therefore of several different cultures each interpreting the other according to the code dictated by its own culture Inevitably geographers view other disciplines through their own cultural filter and even a benevolent view remains ethnocentric It was in order to avoid such ethnocentricity that Fernand Braudel called for more unity among the social sciences in 1958 I wish the social sciences would stop discussing their respective differences so much and instead look for common ground on which to reach their first agreement Personally I would call these ways quantification spatial awareness and longue duree In its place at the center of the social sciences geography reduces all social reality to its spatial dimensions Unfortunately as a discipline it considers itself all too often to be in a world of its own There is a need in France for a figure like Vidal de la Blanche who could refocus attention away from issues of time and space towards space and social reality Geographic research will only take a step forward once it learns to address the problems facing all the sciences

*Lacan's Medievalism* Erin Felicia Labbie, One of the foundational premises of Jacques Lacan s psychoanalytical project was that the history of philosophy concealed the history of desire and one of the goals of his work was to show how desire is central to philosophical thinking In Lacan s Medievalism Erin Felicia Labbie demonstrates how Lacan s theory of desire is bound to his reading of medieval texts She not only alters the relationship between psychoanalysis and medieval studies but also illuminates the ways that premodern and postmodern epochs and ideologies share a concern with the subject the unconscious and language thus challenging notions of strict epistemological cuts Lacan s psychoanalytic work contributes to the medieval debate about universals by revealing how the unconscious relates to the category of the real By analyzing the systematic adherence to dialectics and the idealization of the hard sciences Lacan s Medievalism asserts that we must take into account the play of language and desire within the unconscious and literature in order to understand the way that we know things in the world and the manner in which order is determined Erin Felicia Labbie is assistant professor of English at Bowling Green State University

distinctive value of Lacanian concepts in approaching afresh topics such as communication identity otherness and inter subjectivity Avoiding the jargon and wilful obscurity that so often accompanies expositions of Lacan s psychoanalytic theories this book puts Lacanian ideas to work in practical and illuminating ways A handful of concepts draw from distinct moments in Lacan s teaching are contextualized and explained and applied to the task of exploring the psychological and unconscious dimensions of everyday life Notions such as the big Other full versus empty speech logical time imaginary and symbolic identification and the idea of the master signifier are brought to life via popular cultural references Revitalizing several Freudian and Lacanian concepts for everyday use Six Moments in Lacan asks and answers a series of compelling questions Why is it that each instance of speech implies a listener Why is the notion of subjectivity inadequate when it comes to the trans subjective nature of language Is it possible to elaborate a non psychological theory of identification Why is a Lacanian approach to the subject so at odds with models proposed by psychology Six Moments in Lacan provides an accessible and highly engaging introduction to Lacan and Lacanian psychoanalysis aimed at early practitioners and students in psychoanalysis psychotherapy and those studying upper undergraduate and postgraduate level psychology

Babich,2013-06-29 perceptual essences that can be rendered directly manifest in perception with the help of theoretically structured instruments serving as readable technologies Scientific knowledge should thus be understood as an extension of unassisted perception A perceptual fact has an outer horizon which separates it from the ground on which it appears and an inner horizon composed of a multiplicity of possible perceptual profiles organized by an invariant essence The perceiving subject can bring forth a representative sample of the profiles in question occasionally by making use of certain technological processes which are themselves subject to interpretation in terms of theoretical representations The theoretical entities described in these representations are not simply detected thanks to an inferential operation but rather they are directly perceived It follows from this that the correspondence between the manifest image and the scientific image is not done one to one but by a many to one or one to many application between contextually defined perceptual objects within contexts that

are mutually incompatible but complementary This should not however be understood as a form of conventionalism nor as a form of cultural relativism Pre comprehension which guides interpretation imposes strict limits to the descriptive categories which can be used and to the manner in which they can be linked to appropriate empirical objects The author applies his hermeneutic principles to the study of visual perception In fact this question is treated in the first part of the book
