ENTANGLEMENT AND CLARIFICATION OF REASON AND MATHEMATICS DONG QIU, 2024-12-30 Socio economic empirical analysis must borrow mathematical tools but only focusing on mathematics and ignoring the underlying reason of phenomena can easily lead to hypothetical analysis which formally meets the standards but loses the soul of quantitative research This book emphasizes the eternal mission of scholars in the process of empirical analysis which is to distinguish between mathematics and reason and to clarify the two entangled in phenomena The first part is a systematic monograph the second part is a reading note on the relationship between mathematics and reason the third part is the essay of one matter one reason and the fourth part is the author's early thinking on the relationship between mathematics and reason which still serves as a warning to this day As the fifth book of Criticism Series of Contemporary Economic Statistics it applies to the same audience as the first four books This book incorporates the author's insights and experiences from reading and traveling and may serve as a teaching reference for graduate and undergraduate students to enhance the flexibility of statistical learning Many people believe that economic statistics are only for quantitative analysis but upon closer examination the focus is on the degree of phenomena that is measurement

Podolsky, 2025 As the first randomized controlled trial RCT in criminology and one of the earliest RCTs of a social program the Cambridge Somerville Youth Study CSYS represents a landmark study in the history of criminology The twin goals of the CSYS were first to evaluate the effects of a delinquency prevention intervention and second to investigate the development of delinquency and later criminal offending over the life course To achieve these objectives a renowned physician and professor of clinical medicine and social ethics at Harvard University Dr Richard C Cabot developed a novel and highly rigorous research design a matched pair randomized controlled trial with an embedded prospective longitudinal survey known today as a longitudinal experimental study Six hundred fifty boys later reduced to 506 from Cambridge and Somerville Massachusetts were enrolled in the study Described as character development through mentoring the prevention intervention officially started on June 1 1939 and ran until December 31 1945 Several follow ups including into middle age by Joan McCord indicated that the intervention did not benefit and may have even harmed the treatment group boys The present book provides a comprehensive historical understanding of the making of the CSYS This includes a focus on the
